CONTENTS

17 October 2013 / Vol 502 / Issue No 7471

IMPACT

EDITORIAL

- 271 **The maze of impact metrics**
Evaluators must heed scientists' concerns when tracking influence

FEATURES

- 287 **Impact**
Keeping tabs on research assessment as science evolves
- 288 **Judgement day**
Academics under pressure as governments assess research
- 291 **The golden club**
Have new publishing models taken the shine off premier journals?

Cover by Lorenzo Petrantoni.

COMMENT

- 295 **Open citations**
David Shotton
Making reference lists freely available to all could bring untold benefits
- 298 **The reuse factor**
Mark Hahnel
Why scientists should strive to make all research outputs citable

CAREERS

- 397 **Pack a punch**
How to craft a compelling impact statement

 nature.com/impact

THIS WEEK

EDITORIALS

- 271 **INFECTIOUS DISEASE**
High hopes
Avoiding hype over malaria vaccine
- 272 **EXOPLANETS**
Searching for life
Ways to find extraterrestrial intelligence

WORLD VIEW

- 273 **Time for global statistics we can count on**
Martin Rees
A call for an international agency to monitor data quality

RESEARCH HIGHLIGHTS

- 274 **SELECTIONS FROM THE SCIENTIFIC LITERATURE**
Cold turtles stay vigilant / Bees under stress / Mesh captures mountain fog / Energy-efficient jellyfish / Ozone hole warmed Africa

SEVEN DAYS

- 276 **THE NEWS IN BRIEF**
Indian cyclone causes chaos / Mercury treaty signed / New head for Russian space agency / Carbon-capture projects fall / Malaria trial wanes

NEWS IN FOCUS

- 279 **GOVERNMENT**
US shutdown hobbles research at National Institutes of Health campus
- 280 **NOBEL PRIZE**
Chemistry prize for computer modellers
- 281 **CLIMATE POLICY**
Sociologists bid to demystify the IPCC
- 282 **NUCLEAR FUSION**
ITER's research programme is reshaped
- 283 **HEALTH POLICY**
UK government faces hurdles over release of medical records for research
- 284 **REPRODUCTIVE BIOLOGY**
Regulators consider human trials for mitochondrial replacement technique

CAREERS

- 399 **COLUMN**
Birth and rebirth
Susie Crowe
A PhD experience can be sweeter second time around

399 CAREER BRIEFS

NATUREJOBS ADVERTISING FEATURE
Spotlight on genetics

COMMENT

BOOKS & ARTS

- 299 **INFORMATION TECHNOLOGY**
Slouching towards utopia
Melanie Moses
- 300 **QUANTUM PHYSICS**
Packet man
Graham Farmelo
- 301 **BOOKS IN BRIEF**
- 302 **GEOENGINEERING**
One cool solution
Nicola Jones

CORRESPONDENCE

- 303 Better estimates for bee populations / Rescuing the fitness of endangered species / Adapt conservation for warming flatlands / Metaphors help to promote science / Protect PubMed

OBITUARY

- 304 **David Barker (1938–2013)**
Cyrus Cooper

FUTURES

- 402 **The meaning of life**
Ronald D Ferguson

CONTENTS

17 October 2013 / Vol 502 / Issue No 7471

RESEARCH

NEW ONLINE

305 Papers published this week at nature.com

NEWS & VIEWS

306 FORUM: GENOMICS

Comparisons across cancers

Biological and clinical insight from pan-cancer studies

Alan Ashworth; Thomas J Hudson

SEE ARTICLE P.333

307 PHYSICAL CHEMISTRY

Combs for molecules

Frequency combs enable impulsive Raman spectroscopy in microscopy

Yaron Silberberg SEE LETTER P.355

309 STEM CELLS

Reprogramming *in situ*

Generation of iPS cells from adult mouse cells *in vivo*

Alejandro De Los Angeles &

George Q Daley SEE ARTICLE P.340

310 ASTROPHYSICS

Super-luminous supernovae on the rise

The nature of the brightest supernovae

Daniel Kasen SEE LETTER P.346

312 CANCER

Killing from the inside

Cationic amphiphilic drugs selectively target tumour cells

Paul Sattig & Konrad Sandhoff

313 MATERIALS SCIENCE

To bind or not to bind

A method for controlling the orientation of particle-cell interactions

Andrea J O'Connor & Frank Caruso

314 MULTIPLE SCLEROSIS

An old drug plays a new trick

Benzotropine promotes axon remyelination in mouse models of MS

Hartmut Wekerle & Edgar Meinl

SEE ARTICLE P.327

PERSPECTIVE

317 **HEALTH SCIENCES** Criteria for the use of omics-based predictors in clinical trials

L M McShane et al.

ARTICLES

321 **EARTH SCIENCES** Olivine crystals align during diffusion creep of Earth's upper mantle

T Miyazaki, K Sueyoshi & T Hiraga

327 **DRUG DISCOVERY** A regenerative approach to the treatment of multiple sclerosis

V A Deshmukh et al. SEE N&V P.314

333 **CANCER** Mutational landscape and significance across 12 major cancer types

C Kandoth et al. SEE N&V P.306

340 **STEM CELLS** Reprogramming *in vivo* produces teratomas and iPS cells with totipotency features

M Abad et al. SEE N&V P.309

LETTERS

346 **ASTROPHYSICS** Slowly fading super-luminous supernovae that are not pair-instability explosions

M Nicholl et al. SEE N&V P.310

STEM CELLS

Living image

The Yamanaka factor cocktail creates iPS cells in living mice. PAGE 340

350 **QUANTUM PHYSICS** Deterministic entanglement of superconducting qubits by parity measurement and feedback

D Ristè et al.

355 **OPTICS** Coherent Raman spectro-imaging with laser frequency combs

T Ideguchi et al. SEE N&V P.307

359 **CLIMATE SCIENCES** Molecular understanding of sulphuric acid-amine particle nucleation in the atmosphere

J Almeida et al.

364 **PALAEONTOLOGY** Chelicerate neural ground pattern in a Cambrian great appendage arthropod

G Tanaka, X Hou, X Ma,

G D Edgecombe & N J Strausfeld

368 **NEUROSCIENCE** A juvenile mouse pheromone inhibits sexual behaviour through the vomeronasal system

D M Ferrero et al.

372 **CELL BIOLOGY** Diabetic hyperglycaemia activates CaMKII and arrhythmias by O-linked glycosylation

J R Erickson et al.

377 **GENETICS** A statin-dependent QTL for *GATM* expression is associated with statin-induced myopathy

L M Mangravite et al.

381 **MOLECULAR BIOLOGY** HELQ promotes RAD51 paralogue-dependent repair to avert germ cell loss and tumorigenesis

C A Adelman et al.

385 **BIOCHEMISTRY** Hidden specificity in an apparently nonspecific RNA-binding protein

U-P Guenther et al.

389 **GENETICS** Migrating bubble during break-induced replication drives conservative DNA synthesis

N Saini et al.

393 **GENETICS** Pif1 helicase and Polδ promote recombination-coupled DNA synthesis via bubble migration

M A Wilson et al.

CHEMISTRY MASTERCLASS

Turn to page 304

- S49 EDITORIAL**
Chemistry masterclass
Michelle Grayson
- S50 DRUG DISCOVERY**
Structure-led design
Receptor structures are showing the way to new drugs
- S53 Q&A**
Gerhard Ertl
Pondering the big questions
- S54 Q&A**
Dan Shechtman
Creating leaders and encouraging technological entrepreneurship
- S56 Q&A**
Robert Grubbs
Applying organometallic catalysis to many different processes
- S57 Q&A**
Richard R. Ernst
Keeping science in balance

Laureate Richard R. Ernst's love of Tibetan art helps him to maintain a balance out of the lab (see page S57).

- S59 Q&A**
Richard Schrock
Making progress with olefin metathesis: taking the technology to its limits
- S60 ENERGY**
Fuelling the future
How will biofuels and advanced solar technologies help to power the future?
