Original Papers

Christian Lehringer, Notburga Gierlinger and Gerald Koch: Topochemical investigation on tension wood fibres of <i>Acer</i> spp., <i>Fagus sylvatica</i> L. and <i>Quercus robur</i> L.	255
Nursen Binbuga, Christopher Ruhs, Julia K. Hasty, William P. Henry and Tor P. Schultz: Developing environmentally benign and effective organic wood preservatives by understanding the biocidal and non-biocidal properties of extractives in naturally durable heartwood	264
Simon R. Przewloka, Douglas M. Crawford, Douglas R. Rammer, Donald L. Buckner, Bessie M. Woodward, Gan Li and Darrel D. Nicholas: Assessment of biodeterioration for the screening of new wood preservatives: Calculation of stiffness loss in rapid decay testing	270
Oleksandr Skyba, Peter Niemz and Francis W.M.R. Schwarze: Degradation of thermo-hygro-mechanically (THM)-densified wood by soft-rot fungi	277
Asta Leinonen, Anni M. Harju, Martti Venäläinen, Pekka Saranpää and Tapio Laakso: FT-NIR spectroscopy in predicting the decay resistance related characteristics of solid Scots pine (<i>Pinus sylvestris</i> L.) heartwood	284
Cihat Tascioglu, Paul Cooper and Tony Ung: Effects of fixation temperature and environment on copper speciation in ACQ treated red pine	289
Izabela Ratajczak, Stanisław K. Hoffmann, Janina Goslar and Bartłomiej Mazela: Fixation of copper(II)-protein formulation in wood: Part 1. Influence of tannic acid on fixation of copper in wood	294
Stanisław K. Hoffmann, Janina Goslar, Izabela Ratajczak and Bartłomiej Mazela: Fixation of copper-protein formulation in wood: Part 2. Molecular mechanism of fixation of copper(II) in cellulose, lignin and wood studied by EPR	300
Monika Stasiewicz, Andrzej Fojutowski, Aleksandra Kropacz and Juliusz Pernak: 1-Alkoxymethyl-X-dimethylaminopyridinium-base ionic liquids in wood preservation	309
Primož Oven, Maks Merela, Urša Mikac and Igor Serša: 3D magnetic resonance microscopy of a wounded beech branch	322
Felipe Ramírez, Jürgen Puls, Virgilio Zúñiga, Bodo Saake: Sorption of corn cob and oat spelt arabinoxylan onto softwood kraft pulp	329
Ming-Zhu Pan, Ding-Guo Zhou, Chang-Tong Mei, James Deng, Xiang-Ming Wang and S.Y. Tony Zhang: Effects of thermomechanical refining conditions on the morphology and thermal properties of wheat straw fibre	338
Bruno Esteves, José Graça and Helena Pereira: Extractive composition and summative chemical analysis of thermally treated eucalypt wood	344
Takato Nakano: Analysis of cell wall swelling on the basis of a cylindrical model	352
Sergei R. Loskutov and Antonina A. Aniskina: Swelling of larch wood in organic liquids	357
Bojan Bučar and Aleš Straže: Determination of the thermal conductivity of wood by the hot plate method: The influence of morphological properties of fir wood (<i>Abies alba</i> Mill.) to the contact thermal resistance	362

Short Notes

George C. Chen: Synthesis and evaluation of phosphortriamidates in wood for thermal and fungal decay protection	318
Yuhe Deng, Jiayan Luo, Dexing Zai, Ling Xuan, Zhenghua Han, Chunping Dai, Heng Xu, Martin Feng and Guangbo He: Study of the retarding mechanism of citric acid during gypsum particleboard manufacturing	368

Obituary

William Edwin (Ted) Hillis	372
