Original Papers

Marcos Paulo Vicentim and André Ferraz: Alkaline-sulfite chemithermomechanical pulping of <i>Eucalyptus grandis</i> biotreated by <i>Ceriporiopsis subvermispota</i> under varied culture conditions	375
Cameron I. Thomson, Robert M. Lowe and Arthur J. Ragauskas: First characterization of the development of bleached kraft softwood pulp fiber interfaces during drying and rewetting using FRET microscopy	383
Thomas Q. Hu, Eric Yu, Brian R. James and Paolo Marcuzzan: The fate of phosphorus in the bleaching of spruce TMP with the new bleaching agent – THPS	389
M. Cristina Inalbon and Miguel Zanuttini: Dynamics of the effective capillary cross-sectional area during the alkaline impregnation of eucalyptus wood	397
Andres J. Soria, Armando G. McDonald and Steven R. Shook: Wood solubilization and depolymerization using supercritical methanol. Part 1: Process optimization and analysis of methanol insoluble components (bio-char)	402
Andres J. Soria, Armando G. McDonald and Bingjun B. He: Wood solubilization and depolymerization by supercritical methanol. Part 2: Analysis of methanol soluble compounds	409
Thomas Holmbom, Markku Reunanen and Pedro Fardim: Composition of callus resin of Norway spruce, Scots pine, European larch and Douglas fir	417
Callum A.S. Hill: The reduction in the fibre saturation point of wood due to chemical modification using anhydride reagents: A reappraisal	423
Torbjörn A. Lestander: Water absorption thermodynamics in single wood pellets modelled by multivariate near-infrared spectroscopy	429
Kyösti Karttunen, Asta Leinonen and Matti-Paavo Sarén: A survey of moisture distribution in two sets of Scots pine logs by NIR-spectroscopy	435
Qiang Wei, Brigitte Leblon, Ying Hei Chui and Shu Yin Zhang: Identification of selected log characteristics from computed tomography images of sugar maple logs using maximum likelihood classifier and textural analysis	441
Yukiko Ishikura and Takato Nakano: Compressive stress-strain properties of natural materials treated with aqueous NaOH	448
Narayana Srinivasan, Krishnan Jayaraman and Debes Bhattacharyya: Profile production in multi-veneer sheets by continuous roll forming	453
Kiho Jung, Akihisa Kitamori and Kohei Komatsu: Evaluation on structural performance of compressed wood as shear dowel	461
Francisco López-Suevos and Charles E. Frazier: Wood-adhesive interactions in a PVAc latex	468
Karin Jungnikl, Gerald Koch and Ingo Burgert: A comprehensive analysis of the relation of cellulose microfibril orientation and lignin content in the S2 layer of different tissue types of spruce wood (<i>Picea abies</i> (L.) Karst.)	475
Jong Sik Kim, Kwang Ho Lee, Chang Hyun Cho, Gerald Koch and Yoon Soo Kim: Micromorphological characteristics and lignin distribution in bamboo (<i>Phyllostachys pubescens</i>) degraded by the white rot fungus <i>Lentinus edodes</i>	481
George C. Chen: Synthesis of ethylene maleic anhydride copolymer containing fungicides and evaluation of their effect for wood decay resistance	488

Short Notes

Arndt Wolkenhauer, Georg Avramidis, Holger Militz and Wolfgang Viöl: Plasma treatment of heat treated beech wood – investigation on surface free energy	472
