Original Papers

Yuki Tobimatsu, Toshiyuki Takano, Hiroshi Kamitakahara and Fumiaki Nakatsubo: Studies on the dehydrogenative polymerizations (DHPs) of monolignol β -glycosides: Part 4. Horseradish peroxidase-catalyzed copolymerization of isoconiferin and isosyringin	495
Yuki Tobimatsu, Toshiyuki Takano, Hiroshi Kamitakahara and Fumiaki Nakatsubo: Studies on the dehydrogenative polymerization of monolignol β -glycosides: Part 5. UV spectroscopic monitoring of horseradish peroxidase-catalyzed polymerization of monolignol glycosides	501
Anders Holmgren, Liming Zhang and Gunnar Henriksson: Monolignol dehydrogenative polymerization <i>in vitro</i> in the presence of dioxane and a methylated β - β' dimer model compound....	508
Jorge Rencoret, Gisela Marques, Ana Gutiérrez, David Ibarra, Jiebing Li, Göran Gellerstedt, J. Ignacio Santos, Jesús Jiménez-Barbero, Ángel T. Martínez and José C. del Río: Structural characterization of milled wood lignins from different eucalypt species	514
Rumana Rana, Günter Müller, Annette Naumann and Andrea Polle: FTIR spectroscopy in combination with principal component analysis or cluster analysis as a tool to distinguish beech (<i>Fagus sylvatica</i> L.) trees grown at different sites	530
Mehmet Sefik Tunc and Adriaan R.P. van Heiningen: Hydrothermal dissolution of mixed southern hardwoods	539
Marie Bäckström, Marie-Claude Kolar and Myat Htun: Characterisation of fines from unbleached kraft pulps and their impact on sheet properties	546
Trairat Neimsuwan, Siqun Wang and Xiaofei Philip Ye: Effects of refining steam pressure on the properties of loblolly pine (<i>Pinus taeda</i> L.) fibers	556
Carl S. Modén and Lars A. Berglund: Elastic deformation mechanisms of softwoods in radial tension – Cell wall bending or stretching?	562
John F. Hunt, Jane O'Dell and Chris Turk: Fiberboard bending properties as a function of density, thickness, resin, and moisture content	569
Andrés Dieste, Andreas Krause and Holger Militz: Modification of <i>Fagus sylvatica</i> (L.) with 1,3-dimethylol- 4,5-dihydroxyethylene urea (DMDHEU): Part 1. Estimation of heat adsorption by the isosteric method (Hailwood-Horrobin model) and by solution calorimetry	577
Ivón Hassel, Pierre Berard and Kohei Komatsu: Development of wooden block shear wall – Improvement of stiffness by utilizing elements of densified wood	584
Xinfeng Xie, Barry Goodell, Yuhui Qian, Michael Peterson and Jody Jellison: Significance of the heating rate on the physical properties of carbonized maple wood	591
Dinesh Fernando and Geoffrey Daniel: Exploring Scots pine fibre development mechanisms during TMP processing: Impact of cell wall ultrastructure (morphological and topochemical) on negative behavior	597
John Simonsen, Hua Chen, Jeffrey J. Morrell, Camille Freitag and Milo Clauson: Pentachlorophenol migration from treated wood exposed to simulated rainfall	608
Diana N. Obanda, Todd F. Shupe and W. James Catallo: Resistance of <i>Trichoderma harzianum</i> to the biocide tebuconazol – Proposed biodegradation pathways	613

Short Notes

Xiao-Ping Guo and Yuan-Zong Lai: On the variation of acid-labile aryl ether unit content in wood lignin	527
Chuan-Ling Si, Zhong Liu, Yan-Fang Su, Jin-Kyu Kim and Young-Soo Bae: Coumarins and secoiridoid glucosides from bark of <i>Fraxinus rhynchophylla</i> Hance	553
Heng Gao, Diana N. Obanda, Todd F. Shupe, Chung Y. Hse and Dennis R. Ring: Antifungal activities of heartwood extracts of Port-Orford cedar extractives	620
Irawan W. Kusuma and Sanro Tachibana: Antifungal secoabietane dialdehyde and bisabolane-type terpenoids from the heartwood of <i>Cryptomeria japonica</i> D. Don	624
