

Contents

Original Papers

- Alberto D. Venica, Chen-Loung Chen and Josef S. Gratzl: Soda–AQ delignification of poplar wood. Part 1: Reaction mechanism and pulp properties 627
- Albert D. Venica, Chen-Loung Chen and Josef S. Gratzl: Soda–AQ delignification of poplar wood. Part 2: Further degradation of initially dissolved lignins 637
- Moritz Leschinsky, Gerhard Zuckerstätter, Hedda K. Weber, Rudolf Patt and Herbert Sixta: Effect of autohydrolysis of *Eucalyptus globulus* wood on lignin structure. Part 1: Comparison of different lignin fractions formed during water prehydrolysis 645
- Moritz Leschinsky, Gerhard Zuckerstätter, Hedda K. Weber, Rudolf Patt and Herbert Sixta: Effect of autohydrolysis of *Eucalyptus globulus* wood on lignin structure. Part 2: Influence of autohydrolysis intensity 653
- Tao Song, Andrey Pranovich, Ivan Sumerskiy and Bjarne Holmbom: Extraction of galactoglucomannan from spruce wood with pressurised hot water 659
- Umesh P. Agarwal and Sally A. Ralph: Determination of ethylenic residues in wood and TMP of spruce by FT-Raman spectroscopy 667
- Sofia Zahri, Amine Moubarik, Fatima Charrier, Gilles Chaix, Henri Baillères, Gérard Nepveu and Bertrand Charrier: Quantitative assessment of total phenol contents of European oak (*Quercus petraea* and *Quercus robur*) by diffuse reflectance NIR spectroscopy on solid wood surfaces 679
- Lothar Klarhöfer, Burkhard Roos, Wolfgang Viöl, Oliver Höfft, Stefan Dieckhoff, Volker Kemper and Wolfgang Maus-Friedrichs: Valence band spectroscopy on lignin 688
- Gunnar Almkvist and Ingmar Persson: Analysis of acids and degradation products related to iron and sulfur in the Swedish warship *Vasa* 694
- Gunnar Almkvist and Ingmar Persson: Fenton-induced degradation of polyethylene glycol and oak holocellulose. A model experiment in comparison to changes observed in conserved waterlogged wood 704
- Lars Nordstierna, Stig Lande, Mats Westin, Olov Karlsson and István Furo: Towards novel wood-based materials: Chemical bonds between lignin-like model molecules and poly(furfuryl alcohol) studied by NMR 709
- Shilo W. Weight and Vikram Yadama: Manufacture of laminated strand veneer (LSV) composite. Part 1: Optimization and characterization of thin strand veneers 718
- Shilo W. Weight and Vikram Yadama: Manufacture of laminated strand veneer (LSV) composite. Part 2: Elastic and strength properties of laminate of thin strand veneers 725
- Kweonhwan Hwang, EeDing Wong and Kohei Komatsu: Flexural, in-plane shear and nail shear properties of falcataria-rubberwood laminated veneer board for flooring 731
- Samuel L. Zelinka, Douglas R. Rammer and Donald S. Stone: Impedance spectroscopy and circuit modeling of Southern pine above 20% moisture content 737
- Luis García Esteban, Paloma de Palacios, Francisco García Fernández, Antonio Guindeo, Marta Conde and Victoria Baonza: Sorption and thermodynamic properties of juvenile *Pinus sylvestris* L. wood after 103 years of submersion 745
- Jonathan S. Schilling and Kaitlyn M. Bissonnette: Iron and calcium translocation from pure gypsum and iron-amended gypsum by two brown rot fungi and a white rot fungus 752
- Olaf Schmidt and Ute Moreth: Ribosomal DNA intergenic spacer of indoor wood-decay fungi 759

Short Notes

- Lennart Salmén, Hans Possler, Jasna S. Stevanic and Stefanie E. Stanzl-Tschegg: Analysis of thermally treated wood samples using dynamic FT-IR-spectroscopy 676
- Johannes Konnerth and Wolfgang Gindl: Observation of the influence of temperature on the mechanical properties of wood adhesives by nanoindentation 714

Book review

- Ken Ogata, Tomoyuki Fujii, Hisashi Abe and Pieter Baas: Identification of the timbers of Southeast Asia and the Western Pacific 765

- Personalia 766

Contents Volume 62
