

CONTENTS

Editorial

- 57 **Effects of the level of feed intake and ergot contaminated concentrate on ruminal fermentation and on physiological parameters in cows**
B. Schumann, P. Lebzien, K.-H. Ueberschär, J. Spilke, M. Höltershinken, S. Dänicke
- 73 **Determination of ergot alkaloids in feed by HPLC**
M. Ruhland, J. Tischler
- 80 **Level of *Fusarium* infection in wheat spikelets related to location and number of inoculated spores**
R. Schuster, F. M. Ellner
- 88 **Spargelstangenuntersuchungen zur Haupterntezeit auf Infektionen mit *Fusarium* spp. und Kontaminationen mit Fumonisin B₁**
M. Goßmann, F. Beran, G. Bedlan, A. Plenk, S. Hamedinger, R. Öhlinger, H.-U. Humpf, C. Büttner
- 98 **Investigation of the distribution of deoxynivalenol and ochratoxin A contamination within a 26 t truckload of wheat kernels**
S. Biselli, C. Persin, M. Syben
- 105 **Cowpeas as growth substrate do not support the production of aflatoxin by *Aspergillus* sp.**
P. A. Houssou, M. Schmidt-Heydt, R. Geisen, P. Fandohan, B. C. Ahohuendo, D. J. Hounhouigan, M. Jakobsen

2009: MYCOTOXIN RESEARCH published by Springer
