

CIRCUIT CELLAR

THE MAGAZINE FOR COMPUTER APPLICATIONS

October 2010

Issue 243

SIGNAL PROCESSING

MCU-Based Doppler
Radar Transmission
& Reception

A Review of Essential
Frequency Domain
Instruments

Real-Time Feedback
with an LCD
Character Display

Build a Universal
Prototyping Board

PLUS
CPU TRANSPLANT

Use an FPGA to
Upgrade a Vintage
Calculator Design

INSIDE ISSUE

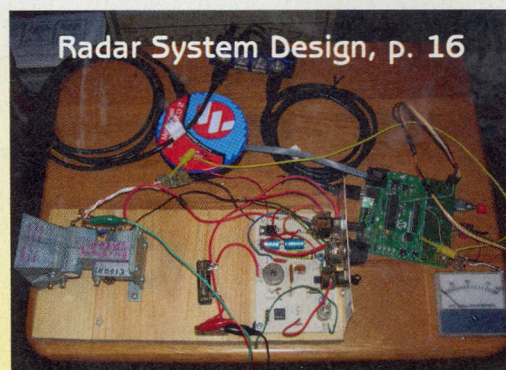

243

October 2010 • Signal Processing

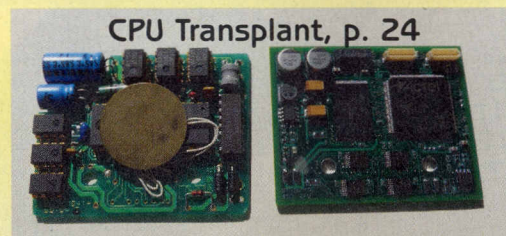

- 16** **Doppler Radar Design**
Steve Lubbers
- 24** **Calculator Brain Transplant**
Update a Vintage Design
with FPGA Technology
Monte Dalrymple
- 38** **Universal Prototyping Board**
James Lyman

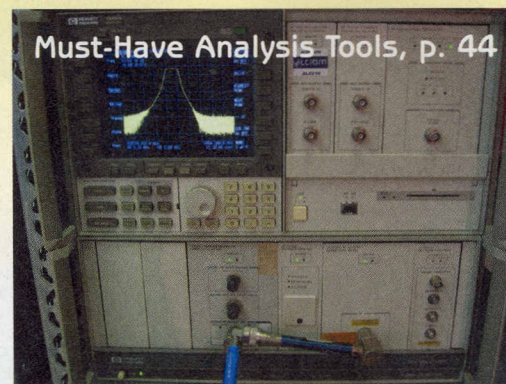

DIY Proto Board, p. 38

Radar System Design, p. 16

CPU Transplant, p. 24

Must-Have Analysis Tools, p. 44

- 12** **THE CONSUMMATE ENGINEER**
Filters, Filters Everywhere
George Novacek
- 44** **THE DARKER SIDE**
A Tour of the Lab (Part 2)
The Frequency Domain
Robert Lacoste
- 54** **ABOVE THE GROUND PLANE**
Avoiding Robotic FAIL
Expect the Unexpected
Ed Nisley
- 62** **FROM THE BENCH**
Real-Time Feedback
A Versatile LCD Character Display Module
Jeff Bachiochi
- 68** **SILICON UPDATE**
Live for Today
The 8-Bit MCU Still Matters
Tom Cantrell

- TASK MANAGER** **4**
Embedded Basics and Beyond
C. J. Abate
- NEW PRODUCT NEWS** **8**
- TEST YOUR EQ SOLUTIONS** **11**
- CROSSWORD** **74**
- INDEX OF ADVERTISERS** **79**
November Preview
- PRIORITY INTERRUPT** **80**
Sci-Fi Inspirations
Steve Ciarcia
