Accreditation and Quality Assurance

Journal for Quality, Comparability and Reliability in Chemical Measurement

Volume 16 · Number 11 · November 2011

EDITORIAL

From competition back to cooperation?

P. De Bièvre 531

GENERAL PAPERS

Can the usual validation standard series for quantitative methods, ISO 5725, be also applied for qualitative methods?

S. Uhlig · L. Niewöhner · P. Gowik 533

Performance evaluation for proficiency testing with a limited number of participants

S. Wong 539

A metrological approach for the assessment of selenium status in human serum

P. Jitaru · C. Oster · G. Labarraque · S. Vaslin-Reimann · P. Fisicaro 545

PRACTITIONER'S REPORTS

Performance of commercial soil laboratories in a proficiency test program in Brazil

J.O. Agbenin · H. Cantarella 553

Standard Method Performance Requirements

A.R. Fox 561

Practical estimation of the uncertainty of analytical measurement standards

R.J.B. Peters · I.J.W. Elbers · M.D. Klijnstra · A.A.M. Stolker 567

DISCUSSION FORUMS

Reasonable scope for change

M.J.T. Milton 575

Alternative interpretations of the mole and the ideal gas equation

B.P. Leonard 577

LETTERS TO THE EDITOR

Comment on Editorial "Chemists' views on measurement results are influenced too much by statistical considerations and not enough by the application of simple metrological principles"

M. Thompson 583

Author's reply to the comment on "Chemists' views on measurement results are influenced too much by statistical considerations and not enough by the application of simple metrological principles"

P. De Bièvre 585

MEETING REPORT

Fourth Edition of the measurement science in chemistry summer school Poznań (Poland) 11–22 July 2011

E. Bulska · P.D.P. Taylor 587

CALENDAR OF EVENTS

Congress, conferences, workshops and courses 589
