COVER (NEWSSTAND)

37 10 Emerging Technologies, 2009

A cyborg beetle. A liquid battery for capturing solar energy. An intelligent software assistant. Superfast memory. Paper diagnostic tests and cheaper Web access. Our pick of this year's top 10 technologies that will change the world.

By THE EDITORS

■ www.technologyreview.com/tr10 Watch videos exploring each of the technologies in this year's TR10.

56 A Zero-Emissions City in the Desert

Oil-rich Abu Dhabi is building a green metropolis. Should the rest of the world care?

By KEVIN BULLIS

■ www.technologyreview.com/masdar See the solar-power technology that Masdar is developing for its ambitious and innovative green project.

64 But Who's Counting?

No one really knows how many people visit websites. A San Francisco startup and Google are both working to change that.

By JASON PONTIN

ESSAY

70 The Family Business

Modern physics through the generations.

By GINO SEGRÈ

NOTEBOOKS

10 Global Health

Medical tests for poor countries need to be properly field-tested.

By José Miguel Trevejo

10 Solving AI

We need a new language for artificial intelligence.

By Pedro Domingos

11 Green Nuclear

Why nuclear power should be part of the renewable-energy portfolio.

By Andrew Kadak

FORWARD

13 TB Drug Compliance

Paper diagnostic strips and text messaging could help thwart tuberculosis in poor countries.

14 Nanotube Electronics

Prototypes, including new materials for displays, bring practical nanotube devices closer to commercial reality.

15 Buzz Meter

Data mining sheds light on what makes news.

16 Electric Avenue

Despite high-profile announcements, electric vehicles and plug-in hybrids will remain rare sights for now.

18 Captcha Arms Race

Researchers are looking for the next step in spam deterrents.

20 Networking Thrives

Communications companies buck the fourth-quarter slide.

TO MARKET

23-26 Technology Commercialized

180° surveillance camera, volume-limiting headphones, 3-D webcam, pill ID, Internet car radio, one-touch data backup, fuel cell to go, energy-saving insulation, eyelash lengthener.

Q&A

28 Padmasree Warrior

Cisco's CTO tells us what role her federal counterpart should play. By David Talbot

PHOTO ESSAY

30 Growing Nanotube Forests

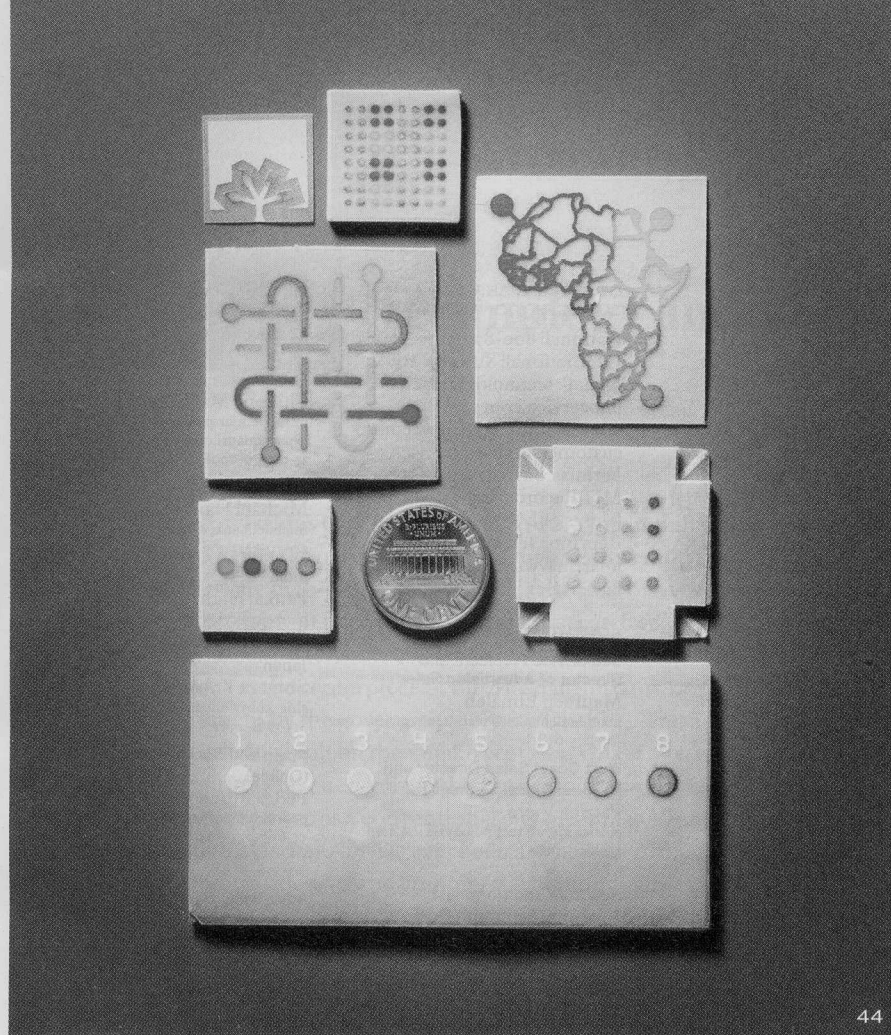

Carefully grown carbon nanotube arrays could be the basis of new energy storage devices and chip cooling systems.

By Katherine Bourzac

REVIEWS

80 Personalized Campaigning

Fattened voter databases will prove to be among the 2008 presidential race's most enduring legacies. By David Talbot
