43-71 The TR35

This year's ninth annual list of innovators under the age of 35 showcases the world's smartest young scientists, technologists, and entrepreneurs. Get a preview of the future of technology.

■ www.technologyreview.com/tr35 Watch interviews with this year's TR35 winners.

72 OurTube

"Open video" could beget the next great wave in Web innovation—if it ever gets off the ground.

By DAVID TALBOT

■ www.technologyreview.com/openvideo Learn how to connect video to the Web, and hear a videographer's take on the technology.

78 The Electric Acid Test

Zero-emissions motorcycles and one wild race.

By ADAM FISHER

86 An Operating System for the Cloud

Google is developing a new OS for the Internet era. Should Microsoft be worried?

By G. PASCAL ZACHARY

■ www.technologyreview.com/smarterit Find out more about the future of computing.

14 From the Editor

NOTEBOOKS

10 Cleaning Coal

Converting coal to natural gas may be our best strategy for limiting carbon emissions.

By Andrew Perlman

10 A Consumer Revolution

Our collective demand for environmental responsibility has stimulated the market.

By Christina Lampe-Onnerud

12 Biological Solar

Combining synthetic biology and solar technology could trap carbon dioxide and produce fuel.

By David Berry

TO MARKET

23-28

Technology Commercialized

Sleep analyzer, hydrogen fuel cells, open-source automobile, human-piloted hydrogen aircraft, solar-powered umbrellas, and more.

Q&A

30 Aneesh Chopra

The nation's first CTO reboots America. By David Talbot

PHOTO ESSAY

34 Surface Restoration

Engineers restore high-resolution photos of the moon.

By Katherine Bourzac

■ www.technologyreview.com/moon See the restored moon images in detail.

BRIEFING

91-101

Electricity

Can we find economical ways to use alternative technologies that generate electricity without emitting carbon dioxide?

■ www.technologyreview.com/briefing Explore the businesses and technologies that will define the future of electricity.

REVIEWS

102

In Vino Veritas

Winemakers jaded by organic farming have turned to biodynamics. By Corby Kummer

106

Entangled Light, Quantum Money

The challenge and the financial possibilities of building quantum networks. By Mark Williams

108

When a Good Idea Works

Purity, openness, and simplicity are engines of design.

By John Maeda

HACK

110 Smart Meter

How secure are meters that monitor the smart grid?

By Erica Naone

DEMO

112 A Touch of Ingenuity

An inexpensive pressure-sensitive pad could make surfaces smarter.

By Kate Greene

■ www.technologyreview.com/

demo See the newest version of a multitouch interface.

Can piezoelectric nanogenerators make air travel safer?

Find the latest semiconductor research in IEEE *Xplore*

Wherever you find the most advanced semiconductor technology, chances are you'll find the IEEE *Xplore* digital library. That's because IEEE *Xplore* is filled with cutting-edge research—from CMOS technology and solid-state circuits, to developing smarter airplanes that can detect problems before they become catastrophes.

When it comes to semiconductors, the research that matters is in IEEE *Xplore*.

See for yourself. Read "Piezoelectric Nanogenerators for Self-Powered Nanodevices" only in IEEE *Xplore*.
