34 Prescription: Networking

A new urban network suggests how technology could remake health care.

By DAVID TALBOT

■ www.technologyreview.com/healthcare Watch interviews with the CIO of Boston Medical Center, an emergency physician, and a Harvard economist.

44 Natural Gas Changes the Energy Map

The United States has vast supplies of this cleaner fossil fuel. But how should we use it?

By DAVID ROTMAN

■ www.technologyreview.com/naturalgas Learn about the geology of the Marcellus shale and see how companies drill for natural gas.

52 Intelligence Explained

Brain researchers might finally be zeroing in on why some people are smarter than others.

By EMILY SINGER

■ www.technologyreview.com/intelligence See a 3-D video of Emily Singer's brain scan and an interview with neuroscientist Richard Haier.

NOTEBOOKS

14 Clean Gas

Here's the policy we need to exploit our natural-gas resources.

By Daniel Weiss

14 Do No Harm

History can guide us on the wise use of technology in medicine.

By Stanley Reiser

15 The Nature of Intelligence

A look at the potential role of genes in education.

By Robert Plomin

TO MARKET

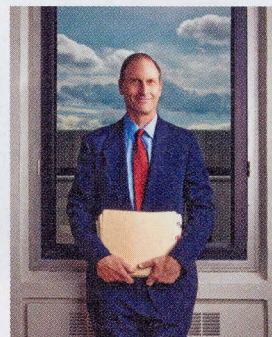

17-22

Technology Commercialized

Irex e-reader, low-power laptop screen, cell-phone subway finder, augmented-reality

mobility aid, giant multitouch display, desktop smart phone, vehicle-to-grid system for plug-in hybrids, and more.

■ www.technologyreview.com/arbook Watch a video to see an augmented-reality book come alive.

Q&A

24 David Blumenthal

The National Coordinator for Health IT explains how electronic networks can improve U.S. health care and how the government will spend \$21 billion. By David Talbot

IMAGING

26 Time Travel Through the Brain

Over the last 100 years, the way we visualize and understand the complexity of the brain has evolved. By Moheb Costandi

■ www.technologyreview.com/brainpics See a slide show featuring more images of the brain.

BRIEFING

59-71

Transportation

The effort to curb global warming requires alternatives to petroleum-fueled internal-combustion engines. We look at some of the cleaner transportation technologies of the future.

■ www.technologyreview.com/briefing Explore the businesses and technologies that will define transportation in years to come.

REVIEWS

72 Nuclear Power Renaissance?

Thirty years after Three Mile Island, nuclear power is still too risky. But now the risks have shifted from physical to financial. By Matthew L. Wald

74 Green Genes

The first transgenic primates able to pass on their foreign genes are both a stunning medical advance and a troubling peek into the future.

By Amanda Schaffer

Can piezoelectric nanogenerators make air travel safer?

Find the latest semiconductor research in IEEE *Xplore*

Wherever you find the most advanced semiconductor technology, chances are you'll find the IEEE *Xplore* digital library. That's because IEEE *Xplore* is filled with cutting-edge research—from CMOS technology and solid-state circuits, to developing smarter airplanes that can detect problems before they become catastrophes.

When it comes to semiconductors, the research that matters is in IEEE *Xplore*.

See for yourself. Read "Piezoelectric Nanogenerators for Self-Powered Nanodevices" only in IEEE *Xplore*.
