36 Security in the Ether

Information technology's next grand challenge will be to secure the cloud—and prove we can trust it.

By DAVID TALBOT

■ www.technologyreview.com/cloudsecurity Watch experts discuss security issues raised by cloud computing.

44 Trading Shares in Milliseconds

High-speed automated buying and selling of financial shares dominates the market. Will it lead to the next financial meltdown?

By BRYANT URSTADT

■ www.technologyreview.com/highspeedtrading Watch an interview with Manoj Narang, founder and head of Tradeworx.

50 The Geoengineering Gambit

As climate policy stalls, scientists and policy experts consider desperate plans to cool the earth.

By KEVIN BULLIS

■ www.technologyreview.com/geoengineering See scientists explain the pros and cons of geoengineering methods.

NOTEBOOKS

14 Integrating the Clouds

The next step in cloud computing is to link different systems.

By Vinton Cerf

14 Why Geoengineering?

We should study the costs and consequences of solar radiation management.

By M. Granger Morgan

15 The New News

"Journalism" and "the media" are not synonymous.

By Jay Rosen

TO MARKET

17–22

Technology Commercialized

Intel reader, molecular-gastronomy kit, make-your-own DNA ink, Rock phone, smart-

meter display, wireless USB hard drive, solar-powered backpack, and more.

■ www.technologyreview.com/pong Watch a Pong kit being put together.

Q&A

24 Mike Lynch

The cofounder and CEO of Autonomy explains how to teach computers that Nicole Kidman is not a cosmic ball of gas. By Jason Pontin

■ www.technologyreview.com/mikelynych Watch an interview with Mike Lynch.

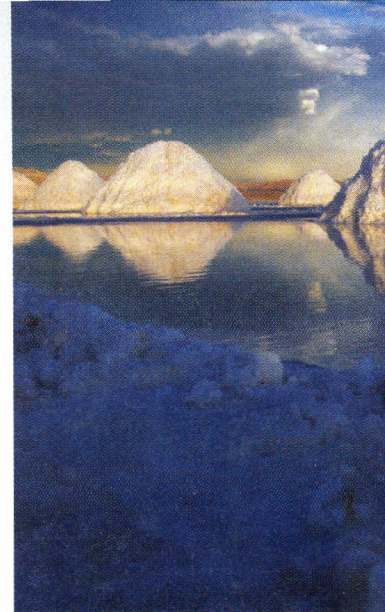

PHOTO ESSAY

26 The Lithium Rush

In the Bolivian Andes lies a vast salt flat that may shape the future of transportation.

By Antonio Regalado

■ www.technologyreview.com/lithium See additional images from the Salar de Uyuni.

BRIEFING

59–69

New Media

We assess the technologies that are destroying old ways of doing business and look into what will be left when the dust settles.

■ www.technologyreview.com/briefing/media Explore information and analysis on 20 new-media companies.

REVIEWS

70 Shoveling Water

Why does it take so long to commercialize new technologies?

By David Rotman

■ www.technologyreview.com/microfluidics

Explore IPVision's patent map showing progress in microfluidics.

73 True Match

How does the algorithm behind the dating service Match.com suggest potential mates?

By Emily Gould

75 The Future of Human Spaceflight

Astronauts: close to extinction?

By Jeff Foust

Do you know a young
innovator
who is going to
change the **future**
of **technology**?

Each year, Technology Review honors 35 leading young innovators from around the globe in our magazine, online, and at the annual Emtech@MIT conference. If you know someone under the age of 35 whose work in IT, biotech, medicine, materials science, energy, or transportation is making a significant impact, nominate them NOW for the 2010 TR35 awards!

NOMINATE TODAY!
