COVER

Photo illustration by Jana Leon

36 Moore's Outlaws

The growing threat of cyber crime, espionage, and warfare.

By DAVID TALBOT

■ www.technologyreview.com/cybersecurity Watch a video about worsening security and the risk of cyber war.

44 Can AIDS Be Cured?

Researchers are pursuing radical new strategies to eliminate HIV from the body.

By JON COHEN

52 Solar's Great Leap Forward

Suntech CEO Zhengrong Shi made China a powerhouse in photovoltaics. Now he plans to make solar power as cheap as conventional electricity.

By KEVIN BULLIS

■ www.technologyreview.com/suntech Hear the CTO of Suntech explain the company's advanced solar technology.

NOTEBOOKS

12 Militarizing Cyberspace

To preserve the open Internet, we must stop the cyber arms race. *By Ronald Deibert*

12 Preventing HIV

We should treat high-risk populations before they have been exposed. *By Robert Grant*

14 Photovoltaics Come of Age

Solar panels are cheap enough to become a major component of green energy. *By Ken Zweibel*

TO MARKET

17-22

Technology Commercialized

A robot to help with weight loss, personal AC, solar recharger, portable hotspot, pocket-sized bomb detector, electric delivery vehicle, and more.

GRAPHITI

24 The Global Broadband Spectrum

A detailed chart shows which countries have fast broadband and which don't. *By Tommy McCall and Matt Mahoney*

Q&A

26 Buzz Aldrin

The Apollo astronaut says: forget the moon, let's colonize Mars.

By Brittany Sauser

PHOTO ESSAY

28 Robot in the OR

The da Vinci robot can shorten surgical recovery times.

By Emily Singer

BRIEFING

59-70

Computer Security

Cyber attacks are inspiring new defenses for networks, personal computers, and smart phones.

REVIEWS

72 America's Broadband Dilemma

The FCC aims to bring the country's Internet access up to speed. *By Bobbie Johnson*

74 The Argument over Aging

A drug to slow the decline is on the horizon, some researchers say. Others don't believe it. *By Karen Weintraub*

76 The German Experiment

A decade ago, the German government set a premium price on alternative power sources. *By Evan I. Schwartz*

HACK

78 iPad 3G

A peek inside the tablet reveals how it connects to the world. *By Erica Naone*

■ www.technologyreview.com/hack See an interactive version.

28

DEMO

80 Inexpensive, Unbreakable Displays

Researchers at Hewlett-Packard are making silicon electronics on rolls of plastic. The result could be flexible, cheap displays. *By Katherine Bourzac*

■ www.technologyreview.com/demo Watch a video of HP's printing process in action.

88 The Long Fight Ahead

When researchers found the cause of AIDS in the early 1980s, their work had only just begun. *By Matt Mahoney*

Can tactile computing prevent a car accident?

Find the latest computing research in IEEE *Xplore*

Wherever you find the most advanced computing technology, chances are you'll find the IEEE *Xplore* digital library. That's because IEEE *Xplore* is filled with cutting-edge research—from software engineering and parallel architecture, to tactile computing that can help you avoid a car accident.

When it comes to computing, the research that matters is in IEEE *Xplore*.

See for yourself. Read "Tactile and Multisensory Spatial Warning Signals for Drivers," only in IEEE *Xplore*.
