32 Searching for the Future of Television

Google and the geeks from Silicon Valley aim to revolutionize the 70-year-old TV industry. Conquering the Internet was easy by comparison.

By ROBERT D. HOF

SPECIAL SECTION

The Human Genome, a Decade Later

40 Ten years after scientists finished mapping our DNA, they have a far more complex picture of what determines our genetic fate.

By JON COHEN

46 The cancer genome could provide clues to treating the disease.

By EMILY SINGER

52 Joseph Nadeau is searching for the genome's dark matter.

By STEPHEN S. HALL

58 Will Electric Vehicles Finally Succeed?

The success of new plug-in hybrids and all-electric vehicles will depend on overcoming a familiar nemesis: battery costs.

By PETER FAIRLEY

NOTEBOOKS

10 Watching Viewers

Making television smarter requires understanding why it is our favorite gadget.

By Genevieve Bell and
Brian David Johnson

10 Electric Dreams

Success for vehicles with a plug, not a gas cap, rests on more than just technology.

By Dan Sperling

11 Disease Decoded

Sequencing the human genome has profoundly changed our understanding of biology and disease.

By David Altshuler

TO MARKET

13–18 Technology Commercialized

Sony Internet TV, pocket ultrasound scanner, medical exoskeletons, robotic surgical assistant, digital dashboard, and more.

GRAPHITI

20 Making Friends

Facebook still has lots of room to grow.

By Tommy McCall
and Matt Mahoney

O&A

22 Paul Sagan

The CEO of a company that delivers a large portion of Web traffic isn't worried that the Internet is running out of capacity.

By Brian Bergstein

PHOTO ESSAY

24 Rebuilding Architecture

Software is allowing architects to design buildings in radically new ways.

By Katherine Bourzac

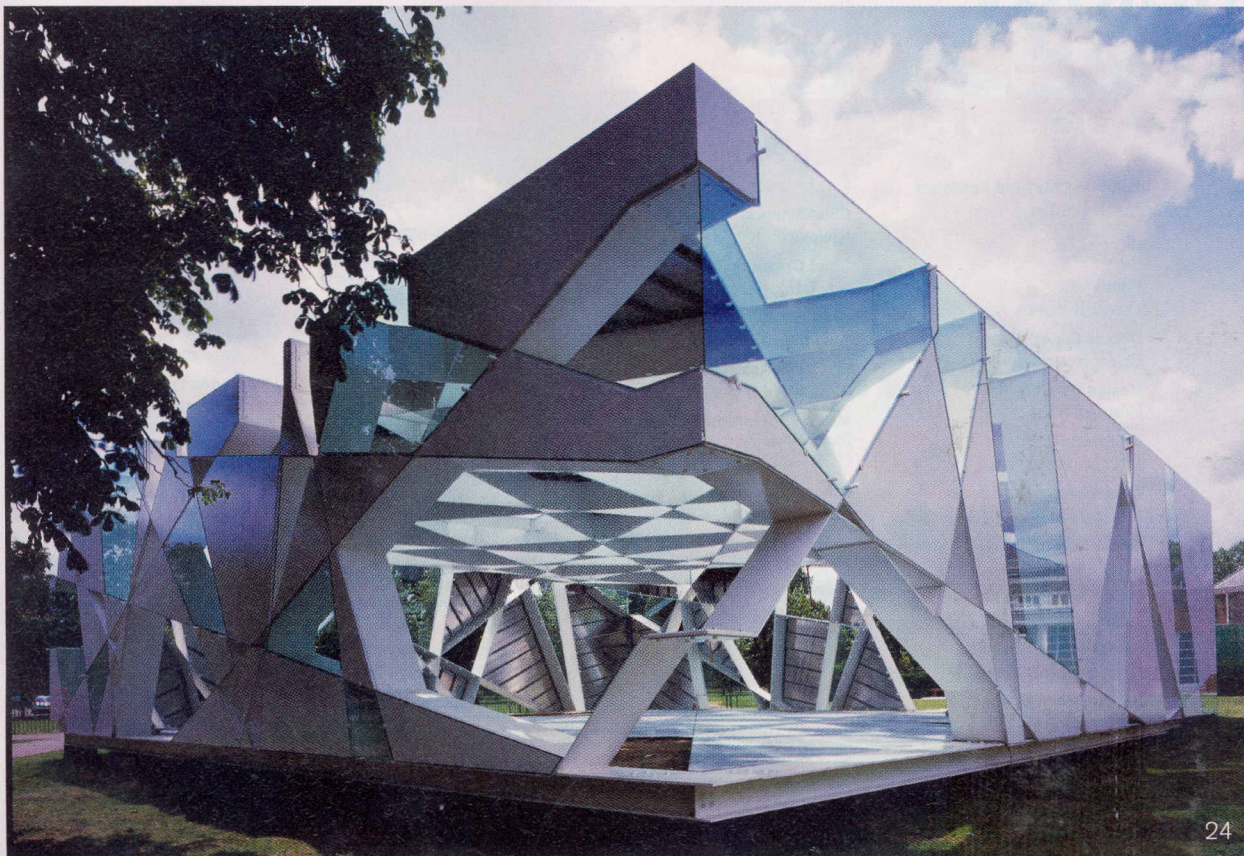

BRIEFING

65–73 The Smart Grid

Adding intelligence to the electric grid will reduce carbon emissions and make power more reliable—if we're willing to foot the bill.

■ www.technologyreview.com/smartgrid

Explore the technologies behind the smart grid.

REVIEWS

74 Serious Games

The virtual world of Second Life seemed like the next big thing, and then it was largely written off. Neither hypens nor detractors understood it.

By Julian Dibbell

76 Start Me Up

Online crowd-funding, supported by social technologies, provides a new business model for book publishing.

By Emily Gould

78 The New, More Awkward You

Robots that stand in for remote workers could force people to learn how to tolerate a new breed of social failings.

By Tom Simonite

■ www.technologyreview.com/telepresence

Watch the robot in action at *TR*.

HACK

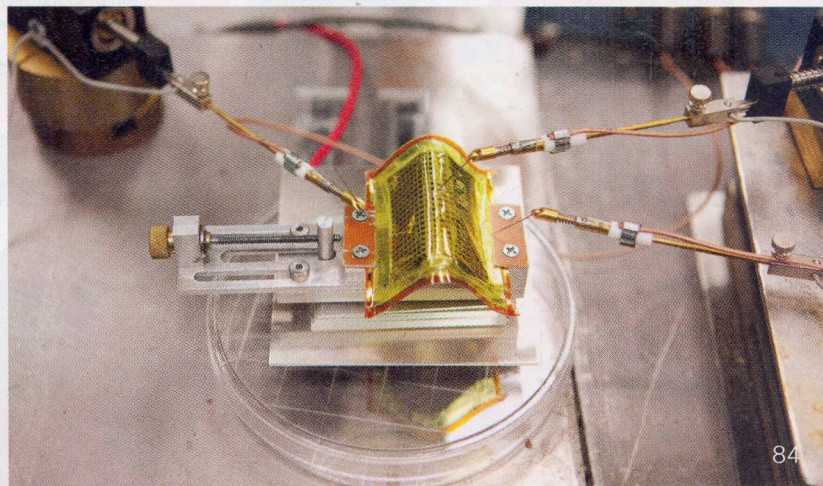

82 Microsoft Kinect

How the device responds to your voice and gestures.

By Erica Naone

■ www.technologyreview.com/hack

See the Microsoft Kinect taken apart.

DEMO

84 Printing Electronic Skin

Nanowire transistor arrays form sensors that match the sensitivity of human skin.

By Katherine Bourzac

■ www.technologyreview.com/demo

See researchers make electronic skin from nanowires.
