COVER

Photograph by Bruce Peterson

41 **TR10**

Synthetic life. Better batteries for electric vehicles. Gestural interfaces. Secure cloud computing. Our annual list of 10 technologies that will transform the world.

By TR EDITORS

■ www.technologyreview.com/tr10 See technology demos and interviews with researchers.

58 **The Rare-Earth Crisis**

Today's electric cars and wind turbines rely on metals mined mainly in China. Will a shortage of these materials curtail the clean-tech industry?

By KATHERINE BOURZAC

■ www.technologyreview.com/rareearth See the only rare-earth mine in the United States.

64 **You Are the Ad**

From privacy menace to online advertisers' dream: how Facebook wants to turn us all into marketers.

By ROBERT D. HOF

10 **Letters**14 **From the Editor**

NOTEBOOKS

12 **Smarter Phones**

High-powered handsets offer few advantages for developing nations.

By Robert Fabricant

12 **Forecasting Futures**

How to spot emerging technologies that will change the world.

By Brad Feld

13 **Rare Talents**

Metals crucial to electronics are in short supply, and so are the skills needed to solve the problem.

By Karl Gschneidner

TO MARKET

19–26 **Technology Commercialized**

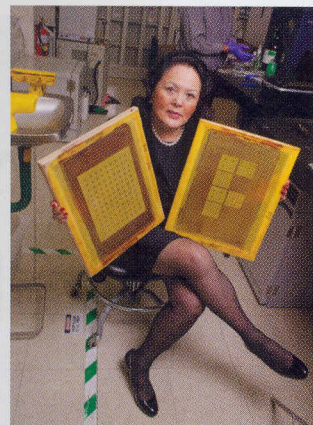

Super phone, mobile diagnostics, artificial vision, more active Bluetooth headset, fuel-cell-powered USB charger, wearable stress sensor, and more.

GRAPHITI

28 **Water Power**

Decisions about future energy sources will need to consider water consumption.

By Mike Orcutt

Q&A

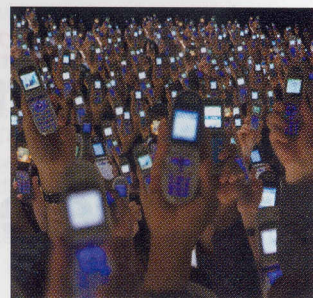

30 **Una Ryan**

A biotech executive explains her innovative model for funding diagnostic tests in poor countries.
By Emily Singer

PHOTO ESSAY

32 **Rocket Road**

SpaceX wants to become the commercial heir to NASA.
By Brittany Sauser

BRIEFING

71–79 **Mobile Devices**

Smart phones are surging in popularity and may come to dominate consumer electronics.

REVIEWS

80 **It's Not a Game**

Putting a computer on *Jeopardy!* warps the public understanding of what artificial intelligence is.
By Jaron Lanier

82 The Cost of Life

It's time to consider price when evaluating new medicines.

By Amanda Schaffer

84 A New Reality

Applications that overlay information on a smart-phone screen will change the way we interact with the world.

By Paul Boutin

HACK

86 Look, No Hands

Google's robotic car can drive itself.

By Erica Naone

DEMO

88 Photographic Manipulation

A hackable camera opens new possibilities for digital photos.

By Tom Simonite

■ www.technologyreview.com/demo See how a hacked camera creates new images.
