38 The Measured Life

New types of devices that monitor activity, sleep, diet, and even mood could make us healthier.

By EMILY SINGER

■ www.technologyreview.com/selftracking See how self-tracking devices are being used.

46 The Perfect Scam

Crooks peddling fake antivirus software have gamed the Web in a billion-dollar rip-off.

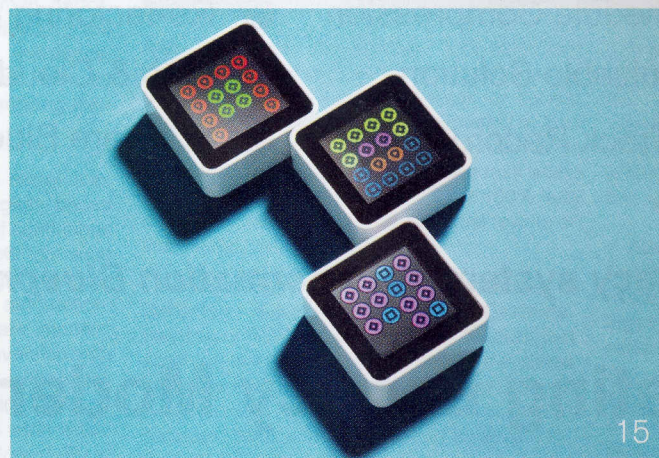

By DAVID TALBOT

■ www.technologyreview.com/malware Learn how a fake-antivirus attack happens.

52 Stem-Cell Gamble

After years of controversy, a therapy based on human embryonic stem cells is being tested in people.

By ANTONIO REGALADO

10 From the Editor

NOTEBOOKS

8 Fragile Steps

The dreams of millions ride on trials for a treatment that could allow the paralyzed to walk.
By Roman Reed

8 Nuclear Lessons

The Chernobyl and Fukushima accidents were failures of culture as well as technology.
By Najmedin Meshkati

9 Measured Progress

Apps to track the health of individuals are most powerful when we use them collectively.
By Rachel Maguire

TO MARKET

15–22 Technology Commercialized

Interactive game cubes, smart alarm clock, satellite-free navigation, glasses-free 3-D laptop, electric motorcycle, Chromebook, and more.

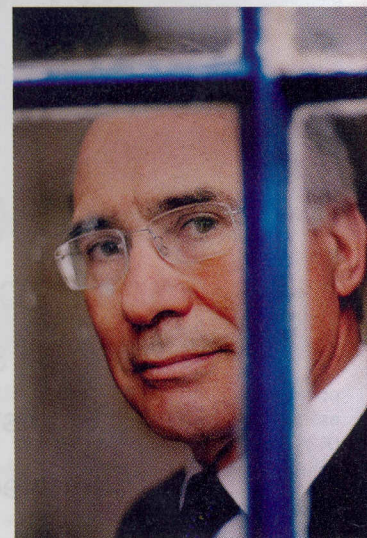

GRAPHITI

24 Material World

The future availability and cost of emerging technologies could depend on access to a handful of critical elements.

By Mike Orcutt

■ www.technologyreview.com/graphiti Explore an interactive version.

Q&A

26 Nicholas Stern

The former top economist for the World Bank says we need to ramp up investments in solutions to climate change.

By David Rotman

PHOTO ESSAY

30 Nuclear Cleanup

Twenty-five years after the Chernobyl disaster, the work goes on.
By Kevin Bullis

■ www.technologyreview.com/chernobyl View panoramas of the nuclear cleanup at Chernobyl.

BRIEFING

61–69 Social Networks

These online communities are redefining how we find and share information, but will operators be able to assuage privacy concerns?

70

REVIEWS

70 Better Cooking through Technology

A team of chefs, writers, and researchers have assembled a gigantic guide to the new technologies of cooking.

By Corby Kummer

76 Avoiding the "C" Words

Politicians and policy experts talk as if climate change can be an afterthought in energy policy. They should think again.

By Kevin Bullis

HACK

78 Seeing Robotics with New Eyes

A versatile robot uses a mish-mash of parts, including the Microsoft Kinect for "eyes."

By Erica Naone

■ www.technologyreview.com/hack See the Bilibot in action.

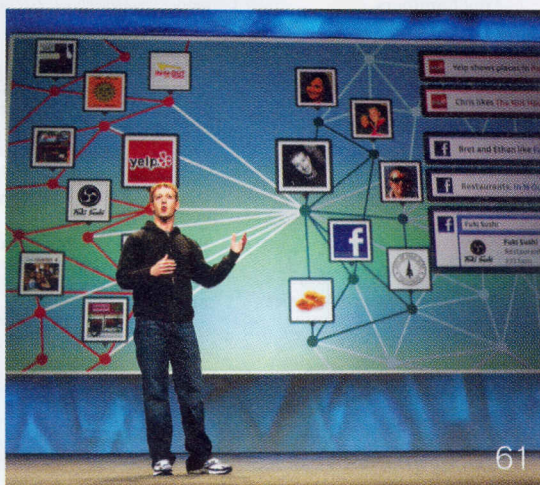

DEMO

80 Redesigning Solar Power

A new lab is inventing alternative ways to package and install solar cells. It could make solar power more affordable.

By Kevin Bullis

■ www.technologyreview.com/demo How solar arrays are made.
