

Industrial Biotechnology

VOLUME 5 NUMBER 1 • SPRING 2009

contents

COVER: Color-enhanced electron micrograph of spore biogenesis in *Aspergillus* sp.

RNAi-mediated gene silencing in the industrial fungi *Thermophilus reesei* & *Aspergillus niger*

See Brody & Maiyuran, p. 53

DEPARTMENTS

- 1 News ... Science & business developments
- 12 Calendar ... Industry events

Feature Commentary

- 19 The Ninety Billion Gallon Biofuel Deployment Study
Highlights of the report
Sandia National Laboratories

ROUNDTABLE DISCUSSION

- 21 A comprehensive systems approach to understanding large-scale biofuels deployment in the US: 90 billion gallons
Larry Burns, Robert Carling, Matt Carr, Brent Erickson, and Todd West
- 30 Industry awaits EPA's estimates of life cycle greenhouse gas emissions for biofuels
Paul Winters
- 34 Maximizing IP value in an economic downturn (& beyond) in the life science industry
J. Peter Fasse, Jaclyn M. Mason, Sean M. Dean, and Gwilym J. O. Attwell

Feature Commentary

POINT OF VIEW

37 Energy & green technology innovation & regulations under the Obama Administration

How the Obama energy & commerce team will likely affect these sectors

Sandra P. Thompson, JD, PhD

Industry Report

40 Economic impact of US advanced biofuels production to 2030

Bio Economic Research Associates

Peer-review

53 RNAi-mediated gene silencing of highly expressed genes in the industrial fungi *Trichoderma reesei* and *Aspergillus niger*

Howard Brody and Suchindra Maiyuran
