

Industrial Biotechnology

ISSN 1550-9087

VOLUME 5 NUMBER 4
WINTER 2009

The journal of biobased industries

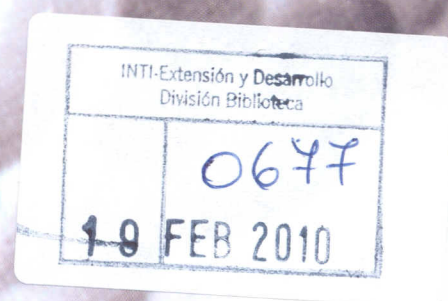

Programa de
Biotecnología
003

ORIGINAL RESEARCH

Analysis of *A. niger* glucoamylase
strain pedigree by CGH & qRT-PCR

Sensitization & irritation by
guayule chemicals

Enablement & utility requirements
for biotech patents

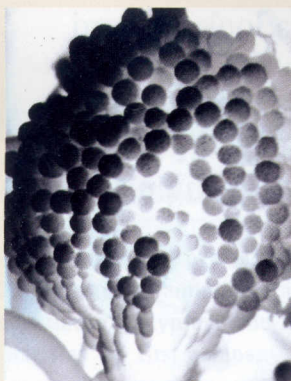

Mary Ann Liebert, Inc.  publishers

Industrial Biotechnology

VOLUME 5 NUMBER 4 • WINTER 2009

contents

Aspergillus sp., SEM

Aspergillus sp. scanning electron micrograph. Image taken by CW Mims. Photo courtesy of Howard Brody, Novozymes.

See Cherry et al, p. 237

DEPARTMENTS

193 News...Science & business developments

206 Calendar...Industry events

Feature Commentary

LETTER TO THE EDITOR

210 Synthetic biology and the sustainable chemistry revolution

Kevin A. Jarrell

POINT OF VIEW

213 Attempting to bridge the gap: Cultivating meaningful dialogue between industry & environmentalists

Gillian Madill

ROUNDTABLE DISCUSSION

216 Algae production systems: Opportunities & challenges

Harrison Dillon, Ron Pate, Edward Shonsey, and Craig Smith

227 Patenting more than a mere idea: Testing the bounds of enablement

John D. Garretson and Lauren Murphy Pringle

Industrial Biotechnology

VOLUME 5 NUMBER 4 • WINTER 2009

contents

Feature Commentary cont'd

230 Biofuels patents: The year in review & a look forward to 2010

Sandra P. Thompson

232 Industrial biotechnology in China amidst changing market conditions

Elizabeth Nesbitt

Peer Review

ORIGINAL RESEARCH

237 Analysis of an *Aspergillus niger* glucoamylase strain pedigree using comparative genome hybridization & real-time quantitative polymerase chain reaction

Barbara Cherry, Elena V. Bashkirova, Alfredo Lopez de Leon, Qiming Jin, Hiroaki Udagawa, Hiromi Takano, Shinobu Takagi, and Randy M. Berka

245 Evaluation & control of potential sensitizing & irritating chemical components in natural rubber latex extracted from the industrial crop guayule

Katrina Cornish, Jali L. Williams, Melissa Kirk, Valerie H. Teetor, and Dennis T. Ray
