

Industrial Biotechnology

The journal of biobased industries

ISSN 1550-9087

VOLUME 6 NUMBER 1
FEBRUARY 2010

ORIGINAL RESEARCH

Enzymatic corn wet milling process:
Enzyme optimization & commercial trial

Centrifugal recovery of *Sinorhizobium*
from starch industry wastewater

Laccase-initiated cross-linking
of sulfonated lignin end groups

Mary Ann Liebert, Inc.  publishers

Industrial Biotechnology

VOLUME 6 NUMBER 1 • FEBRUARY 2010

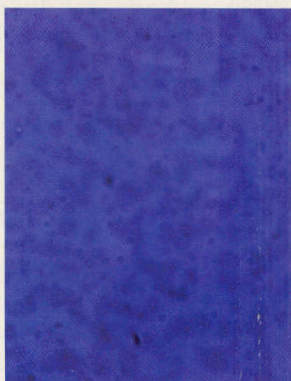

contents

DEPARTMENTS

- 1** News...Science & business developments
- 11** Calendar...Industry events

Feature Commentary

- 18** Adjusting the life of a US patent due to Patent Office delay
Cherylyn Esoy Mizzo, Jack Brennan, and John B. Pegram
- 22** The patent application superhighway: Opportunities to fast-track patent applications
Sandra P. Thompson
- 25** Updating industrial biotech patent strategies: Practical advice in light of recent case history
R. Brian McCaslin

Sinorhizobium meliloti

Optical micrograph of the rhizobium *S. meliloti*, safranin stained

See ROUISSI et al, p. 41

Industrial Biotechnology

Industry Report

- 27** Canada's bioeconomy: Strengths, resources & future directions

BIOTECCanada

Peer Review

ORIGINAL RESEARCH

- 34** Enzymatic corn wet milling process:
Enzyme optimization & commercial trial
Vijay Singh, David B. Johnston, and Soon L. Neoh
- 41** Centrifugal recovery of rhizobial cells from fermented
starch industry wastewater & development of stable
formulation
Tarek Rouissi, Rojan P. John, Satinder K. Brar, Rajeshwar Dayal Tyagi,
and Danielle Prévost
- 50** Sulfonation of phenolic end groups in lignin directs
laccase-initiated reactions towards cross-linking
Dimitri Areskog, Paula Nousiainen, Jiebing Li, Göran Gellerstedt, Jussi Sipilä,
and Gunnar Henriksson
