Volume 92 · Number 2 · March–April 2012

ORIGINAL PAPERS

- NMR spectroscopy as a screening tool to validate nutrition labeling of milk, lactose-free milk, and milk substitutes based on soy and grains**
Y.B. Monakhova · T. Kuballa · J. Leitz · C. Andlauer · D.W. Lachenmeier 109
- A highly sensitive sandwich ELISA for the determination of glycomacropeptide to detect liquid whey in raw milk**
N.A. Chávez · J. Jauregui · L.A. Palomares · K.E. Macías · M. Jiménez · E. Salinas 121
- Enhancing the in vitro Fe²⁺ bio-accessibility using ascorbate and cold-set whey protein gel particles**
A.H. Martin · G.A.H. de Jong 133
- A validated simple and rapid method for the simultaneous detection of both *Cronobacter* spp. and *Salmonella* spp. for infant formula quality control**
M. Soler · O. Ruiz-Rueda · M. Lopez-Siles · L. Calvó · E. Kaclíková · J.L. García-Gil 151

NOTES

- Physicochemical characteristics of goat's milk in Austria—seasonal variations and differences between six breeds**
H.K. Mayer · G. Fiechter 167
- Comparative evaluation of selected strains of lactobacilli for the development of antioxidant activity in milk**
V. Ramesh · R. Kumar · R.R.B. Singh · J.K. Kaushik · B. Mann 179
- A survey of soft cheeses in Greek retail outlets highlights a low prevalence of *Listeria* spp.**
A.S. Angelidis · S.S. Georgiadou · V. Zafeiropoulou · E.N. Velonakis · D.K. Papageorgiou · A. Vatopoulos 189
