ORIGINAL PAPERS

- Application of HS-SPME–GC-MS-derived variables for monitoring ripening-induced changes in cheese volatile compounds**
N.P. Milosavljević · P.D. Blagojević · D.S. Savić · N.S. Radulović **321**
- Physicochemical properties and biological activities of ovine caseinate hydrolysates**
D.J. Daroit · A.P.F. Corrêa · M.M. Canales · J.G. Coelho · M.E. Hidalgo · D.M. Tichota · P.H. Risso · A. Brandelli **335**
- Encapsulation of ascorbic acid in liposomes prepared with milk fat globule membrane-derived phospholipids**
B. Farhang · Y. Kakuda · M. Corredig **353**
- Effect of some external factors on the content of biogenic amines and polyamines in a smear-ripened cheese**
T. Komprda · E. Rejchrtová · P. Sládková · L. Zemánek · L. Vymřátilová **367**
- Viscoelastic properties and overall sensory acceptability of reduced-fat Petit-Suisse cheese made by replacing milk fat with complex coacervate**
C. Ramírez-Santiago · C. Lobato-Calleros · H. Espinosa-Andrews · E.J. Vernon-Carter **383**

NOTE

- Predicting conjugated linoleic acid (CLA) composition in Brazilian dairy products by multiple regression analysis based models**
J.C. Nunes · A.G. Torres **399**

ERRATUM

- Erratum to: NMR spectroscopy as a screening tool to validate nutrition labeling of milk, lactose-free milk, and milk substitutes based on soy and grains**
Y.B. Monakhova · T. Kuballa · J. Leitz · C. Andlauer · D.W. Lachenmeier **415**
