My Life on a Raft

COVER STORY » The picture of the lipid bilayer in the cell membranes as a boring solvent for proteins has given rise to one that is much more dynamic, according to KAI SIMONS of the Max Planck Institute of Molecular Cell Biology and Genetics—revealing new mechanisms and targets for drug delivery.

30

Fork in the Road

Despite a great beginning, there is widespread apprehension that the European Research Council is too good to be true, that its largesse and reputation can't last. COLIN MACILWAIN asks: Will it lead EU science to success or lose its way?

36

The Counterfeiter

Drugs can pass through a dozen or more hands on the way to the pharmacy and a consumer's medicine cabinet, leaving many opportunities to substitute an inert or contaminated copy for a legitimate drug—and generate big profits for the counterfeiters behind the swap. BRENDAN BORRELL tells the story of how one of pharma's biggest enemies was nabbed in Houston, Texas.

DEPARTMENTS

13 Editorial**The Next New Thing**

Our conversation is about to get a lot more interesting.

BY SARAH GREENE

17 Notebooks**Lit Lazarus worms; A rare chance;****Dry out, put away; Shrinky****dink-idics; A mossy renaissance****22 Opinion****Time to Outsource Lab Management?**

Expert scientific asset management drives efficiency in R&D.

BY FRASER BLACK

23 Column**Why I Love Vendors**

Talks and posters are about where biology has been—but the booths with the sales pitches and freebies tell you where science is going.

BY STEVEN WILEY

42 Profile**Prize-Winning PhD**

Aaron Ciechanover didn't set out to win a Nobel Prize for discovering ubiquitin's all-important role in protein degradation. He was just trying to graduate.

BY KAREN HOPKIN

45 The Literature

Hot Papers: Debate lingers over how peptides enter cells; new clues explain how AMPK helps regulate cellular metabolism; human embryonic stem cells (hESCs) help repair an infarcted rat heart; a new mechanism lets plants respond to multiple stressors. Scientist to Watch: Aaron Wheeler.

49 Lab Tools**Can Mass Spec Really Do That?**

Unexpected applications of a technique best known as a proteomics powerhouse.

BY JEFFREY M. PERKEL

53 Bio Business**The Matchmaking Market**

Wanted: Small biotech, enjoys sequencing antibodies, manufacturing, and other temporary services. Call me.
