FEATURES

34 Do Fish Have Personalities?

COVER STORY » Animal personality researchers say they've observed meaningful and consistent individual differences in behavior among organisms including hermit crabs, squirrels, sheep, spiders, and, lizards, to name a few. But, ALLA KATSNELSON asks, should scientists call those differences "personality?" Hear from others who question whether these consistent, individual differences in behavior are a distinct phenomenon, whether called "personality" or not.

40 Seeing in Numbers

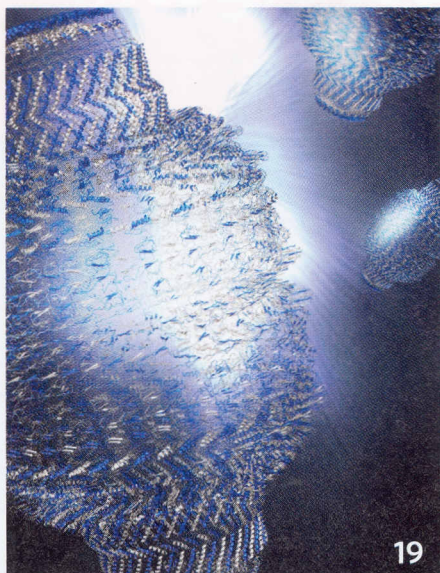

ARUP K. CHAKRABORTY, head of a computational immunology research group at the Massachusetts Institute of Technology, tells the story of how he has used his background in physical science to help elucidate how the immune system turns on in response to infection.

49 Best Places to Work for Postdocs, 2010

How did your institution fare? Plus, KATHERINE BAGLEY finds that postdocs' values may be changing, as this year's top institutions are praised for supporting family values, whereas funding topped the list last year.

DEPARTMENTS

- 13 Editorial**
Stimulating Science
 Crowdsourced wisdom on how to disperse the budget dollars
 BY SARAH GREENE
- 19 Notebooks**
Package delivery; Behind the curtain; Golden opportunity; Sweet relief; Slime and punishment
- 29 Opinion**
Porn: Good for us?
 Scientific examination of the subject has found that as the use of porn increases, the rate of sex crimes goes down.
 BY MILTON DIAMOND
- 33 Column**
To Join or Not to Join
 The benefits of membership to a scientific society are decreasing every year. Lately, I'm asking: Why bother?
 BY STEVEN WILEY
- 56 Profile**
It's Electric
 One Saturday afternoon in the lab of Erwin Neher changed the entire field of electrophysiology.
 BY KAREN HOPKIN
- 61 The Literature**
Hot Papers: Secrets of seedling development; amyloid's link to memory loss; how autophagy can help cell survival; why biofuels could increase greenhouse gases. Scientist to Watch: Stephen Smith.
- 67 Lab Tools**
Structure Made Simple
 A step-by-step guide to reaching into structural biology databases and extracting the most for your research.
 BY JEFFREY M. PERKEL

- 73 Bio Business**
A Penny Saved
 Eight surprising ways to save from \$10,000 to \$6,000,000
 BY VICTORIA STERN
- 76 Careers**
Pimp Your PowerPoint
 Start designing attention-grabbing presentations that stand out from the typical snoozers.
 BY BOB GRANT
