CONTENTS

FEATURES

32 **Taking Aim at Melanoma**
COVER STORY » Understanding oncogenesis at the molecular level offers the prospect of tailoring treatments much more precisely for patients with advanced cases of this deadliest of skin cancers.

BY KEITH T. FLAHERTY

38 **An Aspirin for Your Cancer?**
Can cancer—which can originate from, and often resemble, chronically inflamed tissue—be curtailed using familiar anti-inflammatory agents, without the side effects?

BY GIORGIO TRINCHIERI

44 **The Movement of Goods Around the Cell**
A biologist and a physicist collaborate on a decade-long exploration of the physical parameters of membrane traffic in eukaryotic cells.

BY PATRICIA BASSEREAU AND BRUNO GOUD

DEPARTMENTS

12 Editorial

The "Me Decade" of Cancer
Drugs that target specific tumors are harbingers of a new era of genetically informed medicine.
BY SARAH GREENE

18 Notebook

Taking Shape; PET Guerrilla; Family Affair; One on One: Preston Estep; Top 7 from F1000

28 Critic at Large

Imagining a Cure
For some cancer patients, close is not good enough.
BY NICHOLAS P. RESTIFO
AND MEGAN BACHINSKI

31 Thought Experiment

Medical Publishing for an N of One
New technologies and mind-sets required for information delivery in the age of genomics.
BY GEORGE D. LUNDBERG

50 Profile

Harvesting Ideas
Joy Ward is reaping the rewards of her studies on how plants handle global climate change—gathering academic accolades and presidential embraces along the way
BY KAREN HOPKIN

53 Scientist to Watch

Kelly Benoit-Bird
BY CARRIE ARNOLD

55 The Literature

Role of microRNAs in tracking and treating cardiovascular disease; dengue virus hijacks autophagosomes; liver regeneration modeled in 3-D; phenotype mapping of *E. coli*

58 Lab Tools

Vital Signs
New frontiers in the search for novel, noninvasive biomarkers
BY KELLY RAE CHI

61 Bio Business

Teaching an Old Drug New Tricks
Biotech companies hope to turn the practice of finding novel uses for existing compounds into big business.
BY MEGAN SCUDELLARI

74 Reading Frames

Cleaning Up After Ourselves
In the past, pollution drove the relentless search for new fuel sources. Rising levels of carbon dioxide should do the same.
BY RICHARD B. ALLEY

Capsule Reviews
BY BOB GRANT

76 Foundations

Ancient Anatomy, circa 1687
BY CRISTINA LUIGGI
