30 Power Failure

COVER STORY » Does mitochondrial dysfunction lie at the heart of common, complex diseases like cancer and autism?

BY MEGAN SCUDELLARI

36 Wrestling with Recurrent Infections

Clostridium difficile is evolving more robust toxicity, repeatedly attacking its victims, and driving the search for alternative therapies to fight the infection.

BY GAYATRI VEDANTAM
AND GLENN S. TILLOTSON

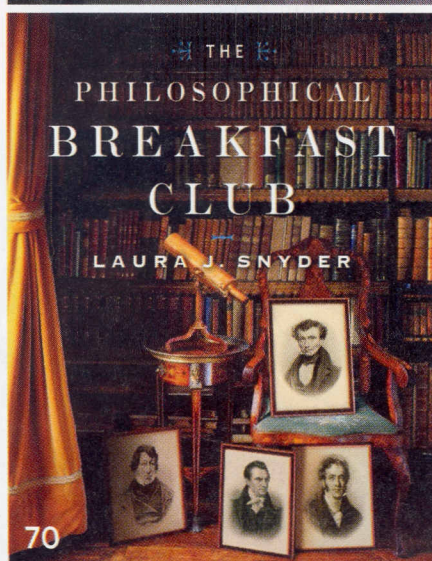

43 Best Places to Work in Industry, 2011

By forging new relationships and finding novel uses for existing technologies, this year's top companies are employing creative ways to advance their science.

DEPARTMENTS

14 Editorial

Channeling the Microbiome

The new discipline of sociomicrobiology is revealing life's struggle tooth and nail—and gut.

BY SARAH GREENE

18 Notebook

One Hip Dino; Lobster-Pot Science; New Blood for Gene Therapy; One-on-One: Dustin Rubenstein

26 Thought Experiment

Skeleton Keys

There are a surprising number of unknowns about how our limbs come to be symmetrical.

BY LEWIS WOLPERT

28 Critic at Large

If Bacteria Can Do It...

Learning community skills from microbes

BY H. STEVEN WILEY

49 The Literature

Crystallizing membrane proteins; secreted protein necessary for cell division; hangover headaches; how T cells remain quiescent

52 Profile

Making the Gradient

Ron Kaback didn't believe that electrochemical gradients could power the transport of sugars and amino acids across cell membranes—until he proved that they do.

BY KAREN HOPKIN

57 Lab Tools

Going with the Flow

A guide to the new wave of budget, easy-to-use flow cytometers

BY KELLY RAE CHI

61 Careers

Simplifying Teaching

How to make your teaching more efficient, effective, and enjoyable without slighting your lab projects

BY HANNAH WATERS

70 Reading Frames

Wanted: Another Scientific Revolution

In the 19th century, four friends changed the way scientists viewed themselves. It's time for another shake-up.
