CONTENTS

FEATURES

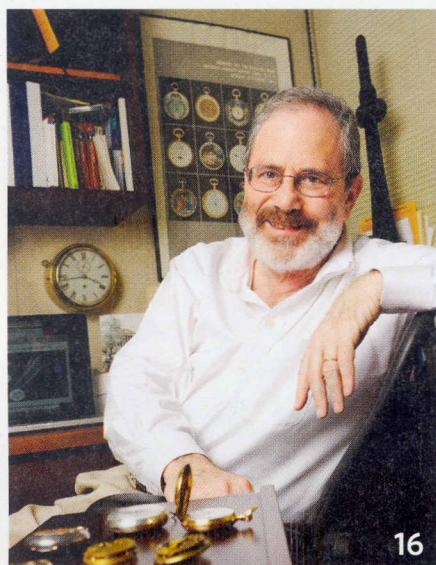

- 30** **The Birth of Optogenetics**
An account of the path to realizing tools
for controlling brain circuits with light
BY EDWARD S. BOYDEN

- 36** **Exosome Explosion!**
These small membrane vesicles do much
more than clean up a cell's trash—they
also carry signals to distant parts of the
body, where they can impact multiple
dimensions of cellular life.
BY CLOTILDE THÉRY

- 41** **Best Places to Work in Academia, 2011**
Whether it's attending a Scottish dance
party or asking physics buffs to custom
build your tools, researchers at this
year's top institutions are getting
creative at work.

DEPARTMENTS

12 Editorial

New New Things

Why we love our jobs—there's never a dull moment.

BY MARY BETH ABERLIN

16 Notebook

Scientist to Watch; Trading Pelts for Pestilence; C-ing with the Lights Out; One on One: Eleanor Simpson

24 Thought Experiment

The Scientist's Amanuensis

A virtual lab—where all sorts of parameters are monitored and recorded—promises researchers a higher degree of reproducibility.

BY PETER MURRAY-RUST
AND BRIAN BROOKS

26 Critic at Large

Desperately Seeking Radioisotopes

New strategies are needed to address the current and future shortages of radioisotopes that threaten medical research and treatment.

BY ROBERT E. SCHENTER

28 Modus Operandi

Smashing Crystals

A powerful new X-ray-generating laser is imaging smaller crystals than ever before.

BY RICHARD P. GRANT

48 The Literature

Centriole architecture; gut-protective bifidobacteria; lamprey thymus

50 Profile

Foresight

Studying the earliest events in visual development, Carla Shatz has learned the importance of looking at one's data with open eyes—and an open mind.

BY KAREN HOPKIN

53 Scientist to Watch

Harmit Malik

BY MEGAN SCUDELLARI

54 Lab Tools

How Green Is My Lab?

Doing science sustainably

BY JEFFREY M. PERKEL

57 Careers

Balancing Biases

How cognitive prejudices can influence research decisions and how the pitfalls of human nature can be avoided

BY JEF AKST

66 Reading Frames

A Scar Nobly Got

The story of the US government's efforts to stamp out smallpox in the early 20th century offers insights into the science and practice of mass vaccination.

BY MICHAEL WILLRICH

Capsule Reviews

BY RICHARD P. GRANT
