

Aluminium Structures

Domes of the Enel plant

F.M. Mazzolani

Shear panels for seismic protection

G. De Matteis, G. Brando, F.M. Mazzolani

Fatigue of friction stir welds

S. Kahl

Buckling of plate assemblies

Zhang Qilin, Tang Hailin, Wu Yage

Distortional elastic buckling

N. Kutanova, T. Peköz, F. Soetens

Pinned connections in truss girders

B.W.E.M. van Hove, F. Soetens

Fire classification of cross-sections

O.R. van der Meulen, J. Maljaars, F. Soetens

Analysis of frames exposed to fire

J. Maljaars, F. Soetens

Contents HERON 55 (2010) no. 3 / 4

Editorial	169
F. Soetens	
Aluminium domes of the Enel plant in Civitavecchia, Italy	171
F. M. Mazzolani	
Experimental and numerical analysis of pure aluminium shear panels for seismic protection of structures: An overview	187
G. De Matteis, G. Brando, F.M. Mazzolani	
The influence of small voids on the fatigue strength of friction stir welds in the aluminium alloy AA6061-T6	223
S. Kahl	
Effective section calculation of aluminium plate assemblies under uniform compression considering interactive local buckling	235
Zhang Qilin, Tang Hailin, Wu Yage	
Distortional elastic buckling for aluminium: Available prediction models versus design specifications	251
N. Kutanova, T. Peköz, F. Soetens	
Experimental research on pinned connections in aluminium truss girders	269
B.W.E.M. van Hove, F. Soetens	

**Cross-sectional classification of aluminium beams
subjected to fire** 285

O.R. van der Meulen, J. Maljaars, F. Soetens

**Experimental and numerical analyses of aluminium frames
exposed to fire conditions** 303

J. Maljaars, F. Soetens
