Welding Journal (ISSN 0043-2296) is published monthly by the American Welding Society for \$120.00 per year in the United States and possessions, \$160 per year in foreign countries: \$7.50 per single issue for domestic AWS members and \$10.00 per single issue for nonmembers and \$14.00 single issue for international. American Welding Society is located at 550 NW LeJeune Rd., Miami, FL 33126-5671; telephone (305) 443-9353. Periodicals postage paid in Miami, Fla., and additional mailing offices. **POSTMASTER:** Send address changes to *Welding Journal*, 550 NW LeJeune Rd., Miami, FL 33126-5671. **Canada Post:** Publications Mail Agreement #40612608 Canada Returns to be sent to Bleuchip International, P.O. Box 25542, London, ON N6C 6B2

Readers of *Welding Journal* may make copies of articles for personal, archival, educational or research purposes, and which are not for sale or resale. Permission is granted to quote from articles, provided customary acknowledgment of authors and sources is made. Starred (*) items excluded from copyright.

Features

- *22** Understanding Thermal Spray Technology
Thermal spray basics are explained and two new technologies emerging for the commercial market are revealed
M. F. Smith
- 28** Business Forecast 2012
Industry leaders put on their forecasting caps to see what the coming year might bring
M. R. Johnsen et al.
- 32** Using Thermal Spray Coatings for Corrosion Control
Thermal spray is an ideal technology for applying zinc, aluminum, and their alloys to many different steel structures for corrosion protection
F. Van Rodijnen
- 37** Manufacturing Outlook for 2012
Indicators are for the manufacturing sector to continue to grow going into 2012, but the dwindling number of qualified skilled workers might apply the brakes
D. Johnson
- 40** Incorporating Thermal Spray into Fabrication
The thermal spray process has matured to handle many different fabricating jobs
R. S. Brunhouse et al.
- *43** Update on Digital Inverter Technology in China
The use of digital technology in power sources is growing in China
G. Zhang

Welding Research Supplement

- 229-s** Oscillatory Marangoni Flow: A Fundamental Study by Conduction-Mode Laser Spot Welding
The effects of various amounts of a surface-active agent on weld pool formation characteristics were observed and an explanation of the differences proposed
S. Kou et al.
- *241-s** Ductile-Fracture Resistance in X100 Pipeline Welds Measured with CTOA
An evaluation is made of the usefulness of the modified double cantilever beam test specimen for determining ductility in pipe
E. Drexler et al.
- 249-s** Characteristics of Resistance Welding Magnesium Alloys AZ31 and AZ91
An investigation into the resistance welding of magnesium alloys imparts a better understanding of the characteristics of expulsion and cracking
H. Luo et al.
- 258-s** Manual Keyhole Plasma Arc Welding with Application
An experimental system is introduced that uses a sensor-controlled plasma arc welding process to join pipe
X. R. Li et al.
