Welding Journal (ISSN 0043-2296) is published monthly by the American Welding Society for \$120.00 per year in the United States and possessions, \$160 per year in foreign countries; \$7.50 per single issue for domestic AWS members and \$10.00 per single issue for nonmembers and \$14.00 single issue for international. American Welding Society is located at 550 NW LeJeune Rd., Miami, FL 33126-5671; telephone (305) 443-9353. Periodicals postage paid in Miami, Fla., and additional mailing offices. **POSTMASTER:** Send address changes to *Welding Journal*, 550 NW LeJeune Rd., Miami, FL 33126-5671. **Canada Post:** Publications Mail Agreement #40612608 Canada Returns to be sent to Bleuchip International, P.O. Box 25542, London, ON N6C 6B2

Readers of *Welding Journal* may make copies of articles for personal, archival, educational or research purposes, and which are not for sale or resale. Permission is granted to quote from articles, provided customary acknowledgment of authors and sources is made. Starred (*) items excluded from copyright.

Features

- 38** Exploring Welding through YouTube
This social medium gives welding a window to the world
A. Cullison et al.
- 42** What It Takes to Be an Underwater Welder
Underwater welding can be adventurous, but it is a demanding occupation that requires both physical and mental endurance
K. Campbell
- 49** Developing Guidelines for Numerical Welding Simulation
Welding simulation gives an alert to problems such as distortion and residual stresses before the arc is struck
C. Schwenk
- 52** Latest Developments in Welding Skills Training
Virtual welding as a tool in the training cycle is evaluated
S. Keitel and C. Ahrens

Welding Research Supplement

- 55-s** Filler Metal Influence on Weld Metal Structure of Microalloyed Steel
Three different filler metal formulas were evaluated as to their affect on the mechanical properties of X65 steel welds
N. Bajic et al.
- 63-s** A New Chromium-Free Welding Consumable for Joining Austenitic Stainless Steels
The performance of a new Ni-Cu-based welding consumable to weld 304L stainless steel was studied for weldability and fume control of Cr(VI)
J. W. Sowards et al.
- 77-s** Calorimetric Measurement of Droplet Temperature in GMAW
A calorimetric measurement system showed droplet temperature reaching a minimum at the transition from globular to spray transfer
E. J. Soderstrom et al.
