

COVER

Steep terrain: To move a therapy from the research lab to the doctor's office requires a huge investment in clinical trials, which are growing more costly and more complex every year. See the special section beginning on page 209.

CHEMISTRY

Reaction-Driven Restructuring of Rh-Pd and Pt-Pd Core-Shell Nanoparticles
F. Tao et al.

Reducing or oxidizing conditions segregates rhenium or palladium at the surface of Rh-Pd (but not Pt-Pd) nanoparticles, facilitating the tuning of their catalytic properties.
10.1126/science.1164170

SOCIOLOGY

Multi-University Research Teams: Shifting Impact, Geography, and Stratification in Science

B. F. Jones, S. Wuchty, B. Uzzi

Over the past 30 years, scientific papers have become increasingly likely to be written by teams of authors from more than one of a small number of elite universities.

DEVELOPMENTAL BIOLOGY

Reconstruction of Zebrafish Early Embryonic Development by Scanned Light Sheet Microscopy

P. J. Keller, A. D. Schmidt, J. Wittbrodt, E. H. K. Stelzer

Digitized tracking of each cell during the first 24 hours of zebrafish development reveals how the body axis and germ layer are formed and provides a community resource.

DEVELOPMENTAL BIOLOGY

Generation of Mouse Induced Pluripotent Stem Cells Without Viral Vectors
K. Okita, M. Nakagawa, H. Hyenjong, T. Ichisaka, S. Yamanaka

Pluripotent cells can be created by introducing transcription factor genes into mouse embryonic fibroblasts on a plasmid that does not integrate into the genome.

10.1126/science.1164270

BREVIA

PALEONTOLOGY

Collective Behavior in an Early Cambrian Arthropod 224

X.-G. Hou, D. J. Siveter, R. J. Aldridge, D. J. Siveter

Fossil arthropods in 525-million-year-old rocks in China are preserved in a long chain, implying that some Cambrian animals exhibited social behavior, unlike later arthropods.

RESEARCH ARTICLES

ECOLOGY

The Status of the World's Land and Marine Mammals: 225

Diversity, Threat, and Knowledge

J. Schipper et al.

A comprehensive assessment of all of Earth's mammals shows that primary productivity drives species richness on land and sea and that 20 to 25 percent of species are under threat. >> News story p. 178

PHYSICS

A High Phase-Space-Density Gas of Polar Molecules 231

K.-K. Ni et al.

Raman laser irradiation can cool a cloud of KRb molecules to ultralow translational, vibrational, and rotational temperatures, a step toward forming molecular condensates. >> Perspective p. 203

REPORTS

APPLIED PHYSICS

Cavity Optomechanics with a Bose-Einstein Condensate 235

F. Brennecke, S. Ritter, T. Donner, T. Esslinger

Coupling a Bose-Einstein condensate to an optical cavity holding a few trapped photons provides a sensitive probe of mechanical oscillations in the quantum regime.

REPORTS CONTINUED...

MATERIALS SCIENCE

- Carbon Nanotube Arrays with Strong Shear Binding-On and Easy Normal Lifting-Off** 238

L. Qu, L. Dai, M. Stone, Z. Xia, Z. L. Wang

Like gecko feet, a disordered array of carbon nanotubes with curly entangled tops can grip vertical surfaces without slipping but can also release and reattach easily.

CHEMISTRY

- Base Sequence and Higher-Order Structure Induce the Complex Excited-State Dynamics in DNA** 243

N. K. Schwab and F. Temps

DNA dissipates ultraviolet light more effectively when it consists of a mixed sequence than when it is an extended run of the same nucleotide.

GEOPHYSICS

- Implications of Magma Transfer Between Multiple Reservoirs on Eruption Cycling** 246

D. Elsworth, G. Mattioli, J. Taron, B. Voight, R. Herd

Data from the Soufrière Hills volcano reveal how connected shallow and deep magma chambers led to three eruption cycles over 12 years and imply that activity may end soon.

GEOPHYSICS

- Laboratory Simulation of Volcano Seismicity** 249

P. M. Benson et al.

Microquakes in a fractured rock sample in which pore water is experimentally decompressed replicate earthquakes seen in active volcanoes, explaining their origins. >> *Perspective p. 207*

CLIMATE CHANGE

- Northern Hemisphere Controls on Tropical Southeast African Climate During the Past 60,000 Years** 252

J. E. Tierney et al.

Abrupt changes in precipitation and temperature resolved in a record spanning the past 60,000 years from Lake Tanganyika, East Africa, are coeval with Northern Hemisphere climate events.

EVOLUTION

- Natural Selection on a Major Armor Gene in Threespine Stickleback** 255

R. D. H. Barrett, S. M. Rogers, D. Schluter

In stickleback fish transferred to fresh water, selection against the allele for the costly armor plating only partly explains the changes in allele frequencies over generations. >> *Perspective p. 204*

ECOLOGY

- Global Warming, Elevational Range Shifts, and Lowland Biotic Attrition in the Wet Tropics** 258

R. K. Colwell et al.

Global warming threatens to cause species loss in the lowland tropics, as species that move upward from low elevations are not replaced and those on mountain tops die out. >> *Perspective p. 206*

ECOLOGY

- Impact of a Century of Climate Change on Small-Mammal Communities in Yosemite National Park, USA** 261

C. Moritz et al.

Over the past 100 years, small mammals in Yosemite, California, show range contraction at high elevations and range expansion lower down, as well as rearranged communities.

>> *Perspective p. 206*

BIOCHEMISTRY

- Small Molecule-Induced Allosteric Activation of the *Vibrio cholerae* RTX Cysteine Protease Domain** 265

P. J. Lupardus, A. Shen, M. Bogoy, K. C. Garcia

Cholera toxin becomes active inside an infected cell when a host lipid binds to it, allosterically exposing its active site, which allows autolysis and thus infection.

IMMUNOLOGY

- Noncytotoxic Lytic Granule-Mediated CD8⁺ T Cell Inhibition of HSV-1 Reactivation from Neuronal Latency** 268

J. E. Knickelbein et al.

Herpes virus in neurons can be kept in a latent state by T cells, which release granzyme B, an inhibitor of a protein necessary for viral gene expression.

IMMUNOLOGY

- CTLA-4 Control over Foxp3⁺ Regulatory T Cell Function** 271

K. Wing et al.

A protein in T regulatory cells controls their ability to dampen activation of the immune system by antigen-presenting cells, preventing autoimmune disease. >> *Perspective p. 202*

MICROBIOLOGY

- Environmental Genomics Reveals a Single-Species Ecosystem Deep Within Earth** 275

D. Chivian et al.

DNA sequences in water samples from a depth of 2.8 kilometers in a South African gold mine reveal the presence of a thermophilic microbe that can fix its own nitrogen and carbon. >> *Science Podcast*

ADVANCING SCIENCE. SERVING SOCIETY

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2008 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$144 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$770; Foreign postage extra: Mexico, Caribbean (surface mail) \$55; other countries (air assist delivery) \$85. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request. GST #1254 88122. Publications Mail Agreement Number 1069624. SCIENCE is printed on 30 percent post-consumer recycled paper. Printed in the U.S.A.

Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$10.00 current issue, \$15.00 back issue prepaid includes surface postage; bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that \$20.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
