SPECIAL ISSUE

21 INTRODUCTION

In the Beginning

By the Editors

A powerful urge to understand the beginnings of the cosmos or even life itself fuels the scientific enterprise.

22 COSMOLOGY

Origin of the Universe

By Michael S. Turner

Cosmologists are closing in on the ultimate processes that created and shaped the universe.

30 NEUROSCIENCE

Origin of the Mind

By Marc Hauser

The first step in figuring out how the human mind arose is determining what distinguishes our mental processes from those of other creatures.

38 BIOLOGY

Origin of Life on Earth

By Alonso Ricardo and Jack W. Szostak

Fresh clues hint at how the first living organisms arose from inanimate matter.

46 INFORMATION TECHNOLOGY

Origin of Computing

By Martin Campbell-Kelly

The information age began with the realization that machines could emulate the work of minds.

54 ORIGINS ROUNDUP

The Start of Everything

In the beginning ... what happened? More than 50 brief articles capture the dazzling moment of insight or key advance at the outset of a variety of things—from flying cars to paper clips to love.

ON THE COVER

Life, the universe and ... well ... everything are the subjects of this special single-topic issue on origins. We trace their beginnings and key insights into the physical and life sciences and technology.

FROM TOP ON COVER: JEN CHRISTIANSEN; ROBERT GENDLER Photo Researchers, Inc.; CHRIS COLLINS Corbis; GETTY IMAGES

3 From the Editor

4 Letters

6 50, 100 & 150 Years Ago

7 News Scan

MEDICINE & HEALTH

- Gene therapy: an interview with an unfortunate pioneer.
- Swine flu? How about swine Ebola?

TECHNOLOGY

- Public safety bandwidth goes unused.
- Quantum entanglement and photosynthesis.

ENERGY & ENVIRONMENT

- Conservation efforts pitted against human rights.
- The airlines are having trouble recycling.

RESEARCH & DISCOVERY

- Animals have the ability to count.
- Digging up valuable fossils in suburban New Jersey.

15 Scientific American Perspectives

Scientists studying fossils should learn to share.

16 Sustainable Developments

By Jeffrey D. Sachs

Prioritize the carbon strategy: ambitious climate and energy legislation risks failure without better focus.

18 Skeptic

By Michael Shermer

Paranoia strikes deep: why people believe in conspiracies.

20 Critical Mass

By Lawrence M. Krauss

An update on C. P. Snow's "two cultures."

82 Recommendations

Babies' brains. Naming life. Fictional reads.

84 Anti Gravity

By Steve Mirsky

The Kindle and all of its contents.
