**Why the
Revolution
Is Late**

Human Evolution Is Not Over

How our species is still
changing over time

\$5.99 U.S.

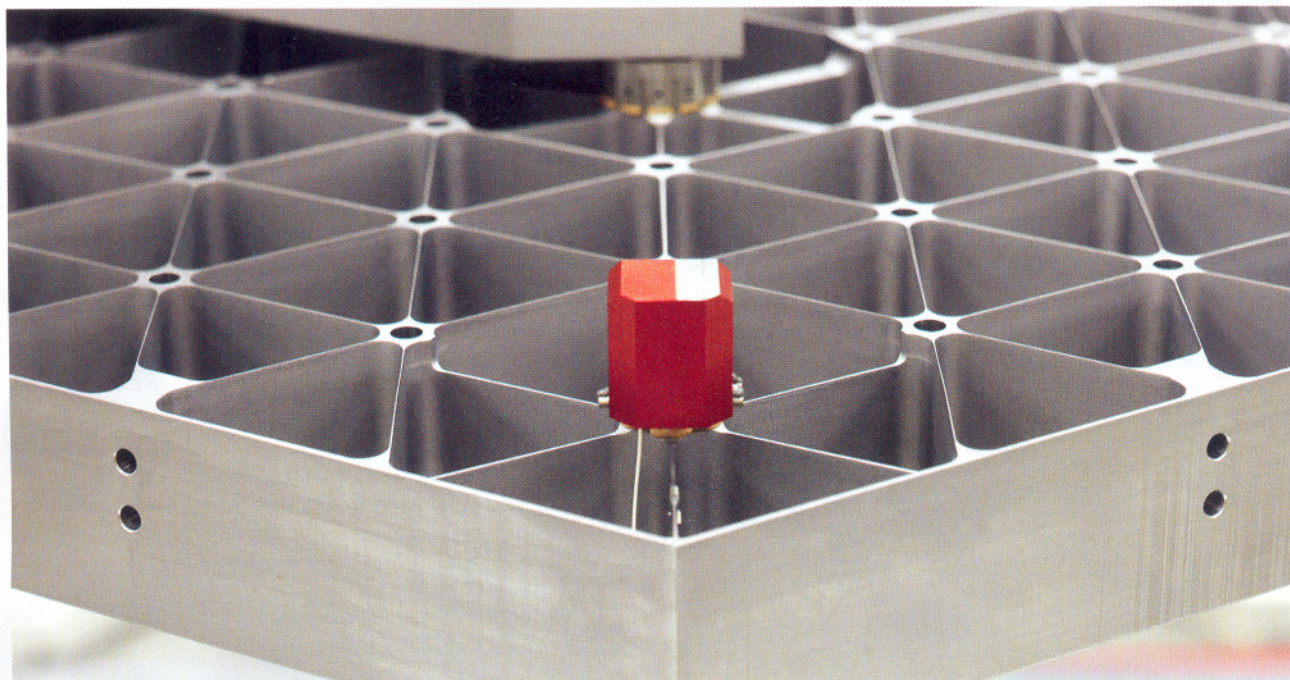

U.K. £4.20

Humans are still evolving, but apparently not always in the classic way nor as quickly as some recent findings have suggested. Scientists say that we are thus more likely to combat the problems of the coming millennium with culture and technology than to evolve biological defenses against them. Photograph by Craig Cutler.

FEATURES

Evolution

22 **How We Are Evolving**

Human evolution may be taking a different course than biologists expected.

By Jonathan K. Pritchard

Astronomy

30 **Origami Observatory**

NASA's replacement for the Hubble Space Telescope will need to unfold perfectly in deep space. *By Robert Irion*

Exclusive Poll

38 **In Science We Trust**

In our Web survey, readers show strong support for science—with some notable exceptions.

Medicine

42 **Revolution Postponed**

The medical miracles of the Human Genome Project have yet to appear. Biologists are divided. *By Stephen S. Hall*

Physics

50 **The (Elusive) Theory of Everything**

Physicists searched for a single theory. Instead they found several. *By Stephen Hawking and Leonard Mlodinow*

Robotics

54 **Robot Be Good**

Independent-minded machines will soon live and work among us. It's time they learned how to behave.

By Michael Anderson and Susan Leigh Anderson

Biology

60 **Sensational Sucker**

No mere suction cup, the octopus sucker can feel, taste, grip—and act of its own accord. *By Frank W. Grasso*

Mind

62 **Desperate for an Autism Cure**

Diagnoses have skyrocketed, but valid treatments are virtually nonexistent. *By Nancy Shute*

Energy

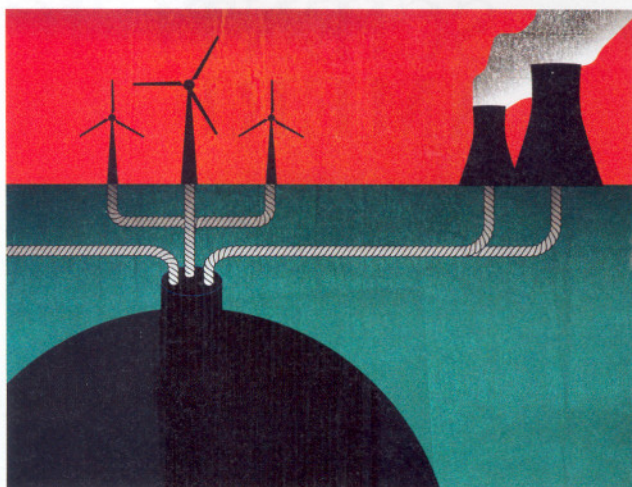

68 **Reinventing the Leaf**

The ultimate liquid fuel may come not from corn or algae but directly from the sun itself. *By Antonio Regalado*

Information Science

72 **Digitizer in Chief**

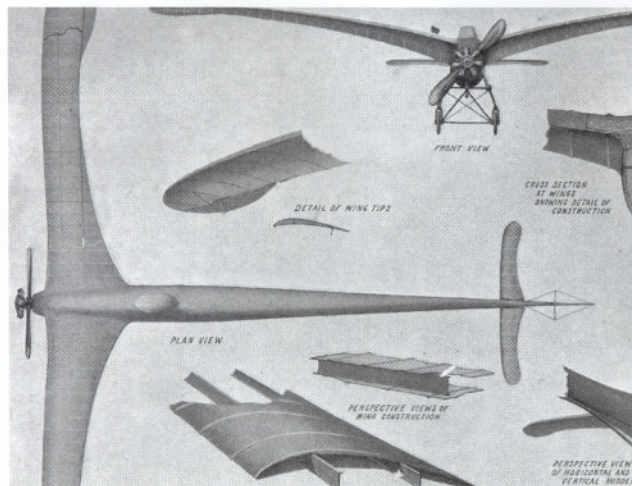

U.S. information czar Vivek Kundra wants to put all the government's data on the Web. *By Michael Moyer*

DEPARTMENTS

4 From the Editor

5 Letters

8 Science Agenda

A simple way to improve Internet service. *By the Editors*

9 Forum

The national smart grid is shaping up to be dangerously insecure. *By Melissa Hathaway*

10 Advances

Giant supernovas. Shrunkon protons. Why squid fly. Saving the cocoa crop. Eluding blocked GPS signals. A sniff controller for the disabled. Rice paddy art.

18 The Science of Health

Expanding primary care may be the best way to resolve chronic disparities in health care. *By Christine Gorman*

20 TechnoFiles

To find the best answers, digital services are turning to actual humans. *By David Pogue*

76 Recommended

Mummies of the world. What technology wants. *By Kate Wong*

77 Skeptic

Physics shows that cell phones cannot cause cancer. *By Michael Shermer*

78 Anti Gravity

Why hurricanes like cities. *By Steve Mirsky*

79 50, 100 & 150 Years Ago

80 Graphic Science

The skinny on obesity's consequences. *By Mark Fischetti*

ON THE WEB

Improving Maternal Health across the Globe

Technological, medical and epidemiological advances are allowing more women and children around the world to survive the risks of pregnancy and childbirth.
