FEATURES

Cosmology

20 Dark Worlds

A shadow cosmos in our midst may be as dynamic as the visible one. *By Jonathan Feng and Mark Trodden*

Neuroscience

28 Controlling the Brain with Light

Researchers now use light to probe in detail how the nervous system works. Their work could lead to better treatments for psychiatric problems. *By Karl Deisseroth*

Engineering

36 How to Build the Supergrid

The U.S. needs a new electric transmission system to deliver cleaner, more reliable power nationwide. Here's how to get it done. *By Matthew L. Wald*

Ecology

42 Phosphorus Lake

To supply the nation with fertilizer, Florida gets strip-mined. *By Mark Fischetti*

Physics

44 Dr. Unification

If anybody can make the field of physics whole, it's Steven Weinberg. *Interview by Amir D. Aczel*

Medicine

48 Halting the World's Most Lethal Parasite

Prospects for protecting children against malaria have brightened because of a new vaccine in late-stage clinical trials. *By Mary Carmichael*

Technology

56 From Silk Cocoon to Medical Miracle

Scientists are crafting arteries, ligaments, circuitry and holograms from worm yarn. *By Fiorenzo Omenetto and David Kaplan*

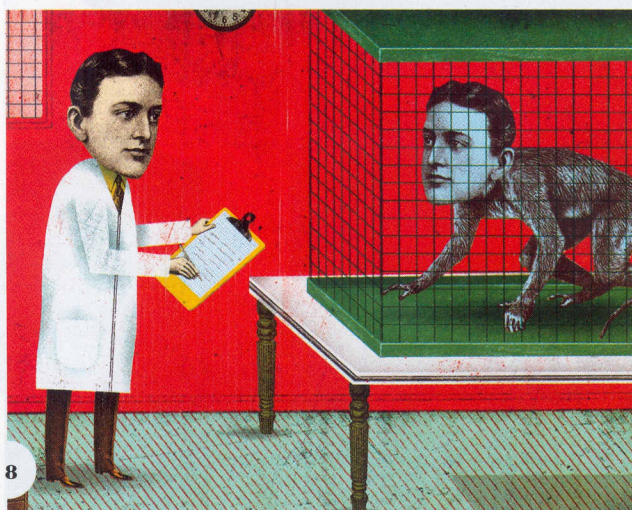

Environment

58 Climate Heretic

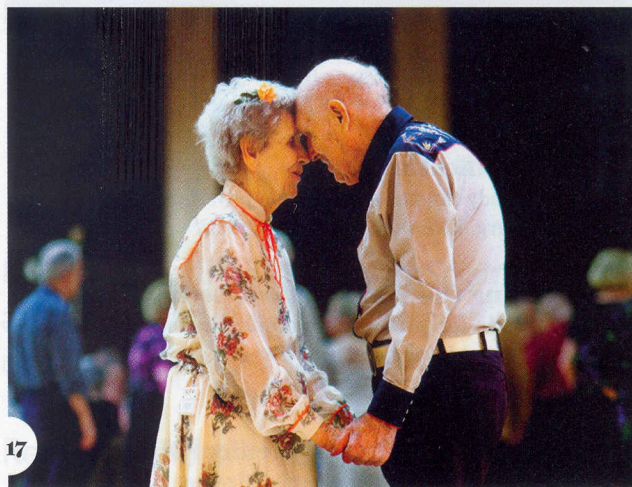

Can we have a civil conversation about global warming? *By Michael D. Lemonick*

DEPARTMENTS

4 From the Editor

5 Letters

7 Science Agenda

Revitalize music education in the schools.
By the Editors

8 Forum

Confirmation bias and Marc Hauser.
By Scott O. Lilienfeld

9 Advances

The EPA's new car labels. Hawking hubbub.
A flu breakthrough. Disney physics. Turkey genomics.
Microbial miners. Inside a mosquito heart.

17 The Science of Health

Stress alone does not explain why women live longer.
By Thomas Kirkwood

19 TechnoFiles

Reading devices are still too crude to replace ink
and paper. *By David Pogue*

64 Recommended

Dinosaur field guide. Massive missing particle.
By Kate Wong

65 Skeptic

What science can learn from master logician
Christopher Hitchens. *By Michael Shermer*

66 Anti Gravity

The smelly reality of space travel. *By Steve Mirsky*

67 50, 100 & 150 Years Ago

68 Graphic Science

Untested chemicals surround us. *By Mark Fischetti*
