## CONTENTS

|                                                                                                                                                                                                                                                  |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| INTERPRETIVE SUMMARIES .....                                                                                                                                                                                                                     | v    |
| NEWS AND ANNOUNCEMENTS .....                                                                                                                                                                                                                     | xii  |
| DAIRY FOODS:                                                                                                                                                                                                                                     |      |
| Some low homogenization pressures improve certain probiotic characteristics of yogurt culture bacteria and <i>Lactobacillus acidophilus</i> LA-K<br>T. Muramalla and K. J. Aryana .....                                                          | 3725 |
| Antioxidative effects of whey protein on peroxide-induced cytotoxicity<br>R. Xu, N. Liu, X. Xu, and B. Kong .....                                                                                                                                | 3739 |
| Effect of liquid retentate storage on flavor of spray-dried whey protein concentrate and isolate<br>M. Whitson, R. E. Miracle, E. Bastian, and M. A. Drake .....                                                                                 | 3747 |
| The effect of substitution of NaCl with KCl on chemical composition and functional properties of low-moisture Mozzarella cheese<br>M. M. Ayyash and N. P. Shah .....                                                                             | 3761 |
| Proteolysis of low-moisture Mozzarella cheese as affected by substitution of NaCl with KCl<br>M. M. Ayyash and N. P. Shah .....                                                                                                                  | 3769 |
| Anaerobic digestion of dairy manure influenced by the waste milk from milking operations<br>X. Wu, C. Dong, W. Yao, and J. Zhu .....                                                                                                             | 3778 |
| Simultaneous detection of cow and buffalo species in milk from China, India, and Pakistan using multiplex real-time PCR<br>G. Cottenet, C. Blancpain, and P.-A. Golay .....                                                                      | 3787 |
| Angiotensin-converting enzyme inhibitory activity in Mexican Fresco cheese<br>M. J. Torres-Llanez, A. F. González-Córdova, A. Hernandez-Mendoza, H. S. Garcia, and B. Vallejo-Cordoba .....                                                      | 3794 |
| Reservoir and routes of transmission of <i>Enterobacter sakazakii</i> ( <i>Cronobacter</i> spp.) in a milk powder-producing plant<br>C. Jacobs, P. Braun, and P. Hammer .....                                                                    | 3801 |
| PHYSIOLOGY AND MANAGEMENT:                                                                                                                                                                                                                       |      |
| Analysis of the economically optimal voluntary waiting period for first insemination<br>C. Inchaisri, R. Jorritsma, P. L. A. M. Vos, G. C. van der Weijden, and H. Hogeveen .....                                                                | 3811 |
| Strategies for time of culling in control of paratuberculosis in dairy herds<br>A. B. Kudahl, S. S. Nielsen, and S. Østergaard .....                                                                                                             | 3824 |
| The relationship between dairy cow hygiene and somatic cell count in milk<br>A. C. Sant'Anna and M. J. R. Paranhos da Costa .....                                                                                                                | 3835 |
| Association of standing and lying behavior patterns and incidence of intramammary infection in dairy cows milked with an automatic milking system<br>T. J. DeVries, J. A. Deming, J. Rodenburg, G. Seguin, K. E. Leslie, and H. W. Barkema ..... | 3845 |
| Effect of solar radiation and flaxseed supplementation on milk production and fatty acid profile of lactating ewes under high ambient temperature<br>M. Caroprese, M. Albenzio, A. Bruno, V. Fedele, A. Santillo, and A. Sevi .....              | 3856 |

|                                                                                                                                                                                                                                                                          |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Lactoperoxidase activity in milk is correlated with somatic cell count in dairy cows<br>N. Isobe, H. Kubota, A. Yamasaki, and Y. Yoshimura .....                                                                                                                         | 3868 |
| Effects of providing total mixed rations indoors and on pasture on the behavior of lactating dairy cattle and their preference to be indoors or on pasture<br>G. L. Charlton, S. M. Rutter, M. East, and L. A. Sinclair.....                                             | 3875 |
| Analysis of the influence of variation factors on electrical conductivity of milk in Murciano-Granadina goats<br>J. R. Diaz, G. Romero, R. Muelas, E. Sendra, J. C. F. Pantoja, and C. Paredes.....                                                                      | 3885 |
| <i>Short communication:</i> Reference values for blood parameters in Holstein dairy cows:<br>Effects of parity, stage of lactation, and season of production<br>G. Cozzi, L. Ravarotto, F. Gottardo, A. L. Stefani, B. Contiero, L. Moro, M. Brscic, and P. Dalvit ..... | 3895 |

## NUTRITION, FEEDING, AND CALVES:

|                                                                                                                                                                                                                                                                                |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Effect of lactic acid bacteria inoculant and beet pulp addition on fermentation characteristics and in vitro ruminal digestion of vegetable residue silage<br>Y. Cao, Y. Cai, T. Takahashi, N. Yoshida, M. Tohno, R. Uegaki, K. Nonaka, and F. Terada .....                    | 3902 |
| Effects of supplementation with 2-hydroxy-4-(methylthio)-butanoic acid isopropyl ester on splanchnic amino acid metabolism and essential amino acid mobilization in postpartum transition Holstein cows<br>K. F. Dalbach, M. Larsen, B. M. L. Raun, and N. B. Kristensen ..... | 3913 |
| Contribution of exopeptidases to formation of nonprotein nitrogen during ensiling of alfalfa<br>L. Tao, H. Zhou, X. S. Guo, R. J. Long, Y. Zhu, and W. Cheng .....                                                                                                             | 3928 |
| Fatty acid intake alters growth and immunity in milk-fed calves<br>T. M. Hill, M. J. VandeHaar, L. M. Sordillo, D. R. Catherman, H. G. Bateman II, and R. L. Schlotterbeck.....                                                                                                | 3936 |
| Grazing management and supplementation effects on forage and dairy cow performance on cool-season pastures in the southeastern United States<br>B. Macoon, L. E. Sollenberger, C. R. Staples, K. M. Portier, J. H. Fike, and J. E. Moore .....                                 | 3949 |
| Effects of the percentage of concentrate on rumen fermentation, nutrient digestibility, plasma metabolites, and milk composition in mid-lactation goats<br>A. Serment, P. Schmidely, S. Giger-Reverdin, P. Chapoutot, and D. Sauvant.....                                      | 3960 |
| Effect of applying bacterial inoculants containing different types of bacteria to corn silage on the performance of dairy cattle<br>K. G. Arriola, S. C. Kim, C. R. Staples, and A. T. Adesogan .....                                                                          | 3973 |
| Effects of ruminal ammonia and butyrate concentrations on reticuloruminal epithelial blood flow and volatile fatty acid absorption kinetics under washed reticulorumen conditions in lactating dairy cows<br>A. C. Storm, M. D. Hanigan, and N. B. Kristensen.....             | 3980 |
| Dietary molasses increases ruminal pH and enhances ruminal biohydrogenation during milk fat depression<br>C. A. Martel, E. C. Titgemeyer, L. K. Mamedova, and B. J. Bradford .....                                                                                             | 3995 |
| Effectiveness of extruded rapeseed associated with an alfalfa protein concentrate in enhancing the bovine milk fatty acid composition<br>Q. C. Dang Van, L. Bejarano, E. Mignolet, D. Coulmier, E. Froidmont, Y. Larondelle, and M. Focant .....                               | 4005 |
| Effect of rumen-protected choline on performance, blood metabolites, and hepatic triacylglycerols of periparturient dairy cattle<br>R. L. G. Zom, J. van Baal, R. M. A. Goselink, J. A. Bakker, M. J. de Veth, and A. M. van Vuuren .....                                      | 4016 |

|                                                                                                                                                                                                                                                                                                                                                                                                       |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Persistency of methane mitigation by dietary nitrate supplementation in dairy cows<br>S. M. van Zijderveld, W. J. J. Gerrits, J. Dijkstra, J. R. Newbold,<br>R. B. A. Hulshof, and H. B. Perdok .....                                                                                                                                                                                                 | 4028 |
| Effect of parity and stage of lactation on feed sorting behavior of lactating dairy cows<br>T. J. DeVries, L. Holtshausen, M. Oba, and K. A. Beauchemin .....                                                                                                                                                                                                                                         | 4039 |
| Effects of supplementation with yeast culture and enzymatically hydrolyzed yeast on performance<br>of early lactation dairy cattle<br>J. E. Nocek, M. G. Holt, and J. Oppy .....                                                                                                                                                                                                                      | 4046 |
| Effect of replacing solvent-extracted canola meal with high-oil traditional canola, high-oleic acid<br>canola, or high-erucic acid rapeseed meals on rumen fermentation, digestibility,<br>milk production, and milk fatty acid composition in lactating dairy cows<br>A. N. Hristov, C. Domitrovich, A. Wachter, T. Cassidy, C. Lee, K. J. Shingfield,<br>P. Kairenius, J. Davis, and J. Brown ..... | 4057 |
| <i>Short communication:</i> Effects of supplementation with pomegranate seed pulp on concentrations<br>of conjugated linoleic acid and punicic acid in goat milk<br>J. Modaresi, M. H. Fathi Nasri, L. Rashidi, O. Dayani, and E. Kebreab .....                                                                                                                                                       | 4075 |

## GENETICS AND BREEDING:

|                                                                                                                                                                                                                               |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Bimodality and the genetics of milk flow traits in the Italian Holstein-Friesian breed<br>A. B. Samoré, S. I. Román-Ponce, F. Vacirca, E. Frigo, F. Canavesi, A. Bagnato,<br>and C. Maltecca .....                            | 4081 |
| Effect of type traits on functional longevity of Czech Holstein cows estimated from a<br>Cox proportional hazards model<br>L. Zavadilová, E. Němcová, and M. Štípková .....                                                   | 4090 |
| Ex situ conservation of Holstein-Friesian cattle: Comparing the Dutch, French,<br>and US germplasm collections<br>C. Danchin-Burge, S. J. Hiemstra, and H. Blackburn .....                                                    | 4100 |
| Use of female information in dairy cattle genomic breeding programs<br>N. Mc Hugh, T. H. E. Meuwissen, A. R. Cromie, and A. K. Sonesson .....                                                                                 | 4109 |
| A genome scan for quantitative trait loci affecting body conformation traits in Spanish<br>Churra dairy sheep<br>B. Gutiérrez-Gil, L. Alvarez, L. F. de la Fuente, J. P. Sanchez, F. San Primitivo,<br>and J. J. Arranz ..... | 4119 |
| Genetic analyses of protein yield in dairy cows applying random regression models<br>with time-dependent and temperature x humidity-dependent covariates<br>K. Brügemann, E. Gernand, U. U. von Borstel, and S. König .....   | 4129 |
| Optimal strategies for the use of genomic selection in dairy cattle breeding programs<br>M. Wensch-Dorendorf, T. Yin, H. H. Swalve, and S. König .....                                                                        | 4140 |
| Phenotypic and genetic variability of production traits and milk fatty acid contents across days<br>in milk for Walloon Holstein first-parity cows<br>C. Bastin, N. Gengler, and H. Soyeurt .....                             | 4152 |
| Marker-assisted breeding value estimation for mastitis resistance in Finnish Ayrshire cattle<br>H. A. Mulder, M. H. Lidauer, J. H. Vilkki, I. Strandén, and R. F. Veerkamp .....                                              | 4164 |
| Differential expression of heat shock protein genes and their splice variants<br>in bovine preimplantation embryos<br>B. Zhang, F. Peñagaricano, A. Driver, H. Chen, and H. Khatib .....                                      | 4174 |
| Prediction of $\beta$ -lactoglobulin genotypes based on milk Fourier transform infrared spectra<br>M. J. M. Rutten, H. Bovenhuis, J. M. L. Heck, and J. A. M. van Arendonk .....                                              | 4183 |
| Genomic and pedigree-based genetic parameters for scarcely recorded traits when some<br>animals are genotyped<br>R. F. Veerkamp, H. A. Mulder, R. Thompson, and M. P. L. Calus .....                                          | 4189 |

|                                                                                                                                                                                          |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Multiple-trait genomic evaluation of linear type traits using genomic and phenotypic data in US Holsteins                                                                                |      |
| S. Tsuruta, I. Misztal, I. Aguilar, and T. J. Lawlor.....                                                                                                                                | 4198 |
| Genetic parameters of coagulation properties, milk yield, quality, and acidity estimated using coagulating and noncoagulating milk information in Brown Swiss and Holstein-Friesian cows |      |
| A. Cecchinato, M. Penasa, M. De Marchi, L. Gallo, G. Bittante, and P. Carnier .....                                                                                                      | 4205 |
| <i>Short communication: Statistical models for the analysis of coagulation traits using coagulating and noncoagulating milk information</i>                                              |      |
| A. Cecchinato and P. Carnier .....                                                                                                                                                       | 4214 |
| <i>Short communication: Expression and alternative splicing of POU1F1 pathway genes in preimplantation bovine embryos</i>                                                                |      |
| J. Laporta, A. Driver, and H. Khatib.....                                                                                                                                                | 4220 |
| <i>Short communication: Effect of mutation age on genomic predictions</i>                                                                                                                |      |
| J. Casellas and L. Varona.....                                                                                                                                                           | 4224 |
| <i>Short communication: Refinement of genetic regions associated with Mycobacterium avium subspecies paratuberculosis tissue infection and tolerance to Johne's disease</i>              |      |
| R. Zanella, R. H. Whitlock, and H. L. Neibergs.....                                                                                                                                      | 4230 |

## OUR INDUSTRY TODAY:

|                                                                                                                        |      |
|------------------------------------------------------------------------------------------------------------------------|------|
| Comparison of bulk-tank standard plate count and somatic cell count for Wisconsin dairy farms in three size categories |      |
| S. C. Ingham, Y. Hu, and C. Ané.....                                                                                   | 4237 |
| Errata.....                                                                                                            | 4242 |

### NOTICE: Page Charges for Publication

The page charge per printed page is \$85 for professional members and \$140 for nonmembers for papers published in *Journal of Dairy Science*. Open access (OA) publication is available upon payment of a \$1750 (ADSA member) or \$3500 (nonmember) OA fee in lieu of standard page charges.

### Future Annual Meetings

2012–July 15–20, Phoenix, AZ

2013–July 8–12, Indianapolis, IN
