Journal of Light & Visual Environment

The Illuminating Engineering Institute of Japan

2008 Vol.32 No.1

Journal of Light & Visual Environment

Volume 32 Number 1, April 2008

CONTENTS

Lighting Photo Albums

Lighting of Boat Pier Narashino

K. Kumagae

3

Papers

Heat-Transfer in Reflector-type Self-Ballasted Compact Fluorescent Lamps

T. Yasuda, M. Toda, S. Matsumoto and Y. Takahara

5

Classification of Sky Conditions by the Ranges of Insolation Indices Considering CIE Standard for General Sky

N. Umemiya and T. Kanou

14

Research Notes

Evaluation of Indoor Illuminance from Light Guides

J. Mohelnikova

20

Alternative Scenario to Prove the Initial Value Problem of Effective Emissivity of Semi-infinite Cylindrical Blackbody Cavity by Wiener-Hopf Method

Y. Ishido

27

Letters

Experimental Study on the Mercury Vapor Pressures in Amalgam-Dosed Discharge Tubes for Compact Fluorescent Lamps during Switch-off Period

T. Yasuda and M. Kando

33

Near-ultraviolet LED of the External Quantum Efficiency Over 45% and its Application to High-color Rendering Phosphor Conversion White LEDs

H. Sakuta, T. Fukui, T. Miyachi, K. Kamon, H. Hayashi, N. Nakamura, Y. Uchida, S. Kurai and T. Taguchi

39

Development of White Light Emitting Diodes by Multi-layered Red, Green, and Blue Phosphors Excited by Near-ultraviolet Light Emitting Diodes

T. Fukui, H. Sakuta, K. Mishiro, T. Miyachi, K. Kamon, H. Hayashi, N. Nakamura, Y. Uchida, S. Kurai and T. Taguchi

43

Committee Report

Applying the Geodesic Dome to Daylight Simulation

– the Activities on the Daylight Simulation Working Group in Japan –

N. Yoshizawa, H. Suzuki and N. Hara

46

Notes for Contributors
