Journal of Light & Visual Environment

The Illuminating Engineering Institute of Japan

2009 Vol.33 No.2

Journal of Light & Visual Environment

Volume 33 Number 2, August 2009

CONTENTS

Lighting Photo Albums

- Illumination in Front of the Main Building of Miyazaki Prefectural Office**
S. Shibata 63

- The Illumination of the Mosaic Dori Street of Shinjuku MYLOAD**
Y. Sasaki 64

Foreword

- Toward the Creation of Innovative Lighting Science**
K. Tachibana 65

Papers

- The Periodic Table with Regard to Atomic Emissions**
S. Kitsinelis, G. Zisis and E. Fokitis 67

- Measurement of Spectral Emissivity near Room Temperature with a Vacuum Blackbody Using a Cryogenic Refrigerator**
H. Minato and Y. Ishido 70

- Improvement in Durability of Red Phosphor Encapsulated by Sol-Gel Glass for Use in White Light-Emitting Diodes**
E. Kin, T. Fukuda, N. Kamata, H. Ohara, T. Yokoo and N. Kijima 82

- Effects of Three Color Factors on Recognizable Threshold of Form Perception Taking into Account Individual Differences of Visual Abilities**
Y. Akizuki and Y. Inoue 88

Research Note

- Study of the Potential of Natural Light in Low and High Density Urban Environments in the Oasis City of Mendoza, in Summer**
L. Córca and A. Pattini 101

Letter

- Perceived Brightness and Saturation of Color LED Light in Dense Fog at Night Time**
M. F. bin Zaini, B. A. Kurniawan, Y. Nakashima and M. Takamatsu 107

Technical Trend

- A Long-Term Energy Saving Analysis on LEDs General Lighting in China**
L. Hong 110
