TABLE OF CONTENTS

CHAPTER		PAGE
	ACKNOWLEDGMENTS	ii
	ABSTRACT	iii
	TABLE OF CONTENTS	v
	LIST OF FIGURES	vii
	LIST OF TABLES	xiii
	FOREWARD	xv
1	INTRODUCTION	
	1.1 Purpose	1-1
	1.2 Wastewater Solids	1-1
	1.3 References	1-3
2	GENERAL DESIGN CONSIDERATIONS	
	2.1 Applications of Suspended Solids Separation Processes	2-1
	2.2 Process Selection	2-1
3	FLOW VARIATIONS AND EQUALIZATION	
	3.1 Flow Variation	3-1
	3.2 Performance vs. Flow Variation	3-1
	3.3 Flow Equalization	3-2
	3.4 References	3-2
4	PRINCIPLES OF CHEMICAL TREATMENT	
	4.1 Introduction	4-1
	4.2 Destabilization Mechanisms	4-1
	4.3 Selection of Chemical Coagulants	4-2
	4.4 Coagulation Control	4-6
	4.5 References	4-16
5	STORAGE AND FEEDING OF CHEMICALS	
	5.1 General	5-1
	5.2 Aluminum Compounds	5-1
	5.3 Iron Compounds	5-16
	5.4 Lime	5-24
	5.5 Other Inorganic Chemicals	5-34
	5.6 Polymers	5-50
	5.7 Chemical Feeders	5-59
	5.8 References	5-66
6	CHEMICAL MIXING, FLOCCULATION AND SOLIDS-CONTACT PROCESSES	
	6.1 Introduction	6-1
	6.2 Chemical Mixing	6-3
	6.3 Flocculation	6-5
	6.4 Solids-Contact Processes	6-8
	6.5 References	6-12

TABLE OF CONTENTS - Continued

CHAPTER		PAGE
7	GRAVITY SEPARATION	
	7.1 Introduction	7-1
	7.2 Configuration of Sedimentation units	7-1
	7.3 Basic Factors Affecting Settling Tank Design	7-2
	7.4 Clarifier Design Considerations	7-9
	7.5 Primary Sedimentation	7-14
	7.6 Secondary Sedimentation	7-15
	7.7 Chemical Sedimentation	7-22
	7.8 Flotation	7-23
	7.9 Shallow Settling Devices	7-27
	7.10 Wedge-Wire Settlers	7-32
	7.11 References	7-35
8	PHYSICAL STRAINING PROCESSES	
	8.1 General	8-1
	8.2 Wedge-Wire Screens	8-1
	8.3 Microscreening	8-9
	8.4 Other Screening Devices	8-31
	8.5 Diatomaceous Earth Filters	8-33
	8.6 Ultrafiltration	8-36
	8.7 References	8-43
9	GRANULAR MEDIA FILTRATION	
	9.1 Introduction	9-1
	9.2 Process Alternatives	9-3
	9.3 Process Variables	9-9
	9.4 Selection of Filtration Rate and Terminal Headloss	9-20
	9.5 Filtration Media	9-26
	9.6 Filter Control Systems	9-31
	9.7 Filter Cleaning Systems	9-35
	9.8 Filter Structures and General Arrangement	9-45
	9.9 Pilot Studies	9-46
	9.10 Special Designs	9-48
	9.11 Slow Sand Filters	9-52
	9.12 References	9-54
10	COST ESTIMATES	
	10.1 Introduction	10-1
	10.2 Curve Content	10-1
	10.3 Operation and Maintenance Costs	10-1
	10.4 Freight	10-2
	10.5 How to Use Cost Curves	10-2
	10.6 Curve Descriptions	10-2
	10.7 References	10-16

LIST OF FIGURES

Figure No.		Page
4-1	Jar Test Units With Mechanical (Top) and Magnetic (Bottom) Stirrers	4-8
4-2	Six-Position Sampler	4-9
4-3	Settling Curves Frequently Obtained	4-10
4-4	Jar Test Results	4-12
4-5	Zeta Potential Apparatus	4-13
4-6	Coagulation of Raw Sewage With Alum	4-15
5-1	Typical Dry Feed System	5-7
5-2	Crystallization of Alum Solutions	5-11
5-3	Viscosity of Alum Solutions	5-12
5-4	Alternative Liquid Feed Systems For Overhead Storage	5-14
5-5	Alternative Liquid Feed Systems For Ground Storage	5-14
5-6	Freezing Point Curves For Commercial Ferric Chloride Solutions	5-17
5-7	Viscosity vs. Composition of Ferric Chloride Solutions at Various Temperatures	5-18
5-8	Typical Lime Feed System	5-31
5-9	Lime Requirement For $\text{pH} \geq 11.0$ as a Function of the Wastewater Alkalinity	5-35
5-10	Viscosity of Soda Solutions	5-37
5-11	Viscosity of Caustic Soda Solutions	5-40
5-12	Typical Caustic Soda Feed System	5-45

LIST OF FIGURES (continued)

Figure No.		Page
5-13	Typical Schematic of a Dry Polymer Feed System	5-57
5-14	Typical Automatic Polymer Feed System for Large Plants	5-58
5-15	Positive Displacement Pumps	5-61
5-16	Screw Feeder	5-63
5-17	Positive Displacement Solid Feeder-Rotary	5-63
6-1	Impeller Mixer	6-4
6-2	Mechanical Flocculation Basin Horizontal Shaft-Reel Type	6-7
6-3	Mechanical Flocculator Vertical Shaft-Paddle Type	6-7
6-4	Solids Contact Clarifier Without Sludge Blanket Filtration	6-9
6-5	Solids Contact Clarifier With Sludge Blanket Filtration	6-10
7-1	Rectangular Settling Tanks	7-3
7-2	Typical Clarifier Configurations	7-4
7-3	Results of Salt-Injection Tests With Different Types of Sedimentation Tanks	7-6
7-4	Schematic Representation of Settling Zones	7-10
7-5	Sedimentation In a Secondary Settling Tank	7-10
7-6	Dependence of MLSS Concentration on Secondary Settling Tank Underflow Concentration	7-17
7-7	Typical Flotation Unit	7-25
7-8	Module of Steeply Inclined Tubes	7-28

LIST OF FIGURES (continued)

Figure No.		Page
7-9	Tube Settlers in Existing Clarifier	7-29
7-10	Plan View of Modified Clarifier	7-29
7-11	Tube Settler-Flow Pattern	7-30
7-12	Simple Wedge Wire Clarifier	7-33
7-13	Installation of Wedge Wire Panels in a Clarifier	7-33
8-1	Hydrasieve Unit	8-3
8-2	Schematic	8-3
8-3	Screen Detail	8-4
8-4	Curved Screen Bars	8-4
8-5	Rotating Wedge Wire Screen at North Chicago S.T.P.	8-8
8-6	Typical Microscreen Unit	8-10
8-7	Micro-Matic [®] Strainer	8-11
8-8	Microscreen Capacity Chart	8-16
8-9	Microscreen Removal at Various Flow Rates	8-23
8-10	Microscreening of Trickling Filter Plant Effluent	8-24
8-11	Microscreen Unit With Pleated Outer Surface	8-27
8-12	The Sweco Concentrator	8-32
8-13	Vertical Leaf Vacuum Filter	8-34
8-14	Vertical Leaf Pressure Filter	8-35
8-15	Schematic Flow Diagram of the Pikes Peak Treatment & Reuse System	8-37

LIST OF FIGURES (continued)

Figure No.		Page
8-16	“Storage Battery” Membrane Modules	8-41
9-1	Typical Rapid Sand Filter	9-4
9-2	Filter Configurations	9-5
9-3	Cross Section of Upflow Filter	9-6
9-4	Typical Pressure Filter	9-8
9-5	Run Length vs. Filter Rate for Various Terminal Headlosses	9-21
9-6	Net Production Rate vs. Filter Rate for Various Run Lengths	9-24
9-7	Grain Size Curve	9-27
9-8	Flow Control Systems	9-33
9-9	Automatic Gravity Filter, Single Compartment	9-36
9-10	Minimum Fluidization Velocity, V_{mf} , to Achieve 10 Percent Bed Expansion at 25 °C	9-37
9-11	Effect of Temperature on V_{mf} for Sand and Coal and on Absolute Viscosity of Water	9-38
9-12	Underdrains	9-40
9-13	Simater Filter	9-49
9-14	Hydromation In-Depth Filter	9-50
9-15	Hardinge Travelling Backwash Filter	9-51
10-1	Flocculators-Flash Mixers	10-3
10-2	Chemical Feed Systems	10-5
10-3	Sedimentation	10-7

LIST OF FIGURES (continued)

Figure No.		Page
10-4	Solids Contact	10-8
10-5	Flotation	10-10
10-6	Wire Septums and Settling Tubes	10-11
10-7	Wedge Wire Screens: Rotating and Stationary	10-13
10-8	Microscreens	10-14
10-9	Media Filters	10-15

LIST OF TABLES

Table No.		Page
2-1	Selected SS Separation Process Applications	2-2
4-1	SS Removal Performance For Chemical Coagulation Applications To Phosphate Removal	4-4
5-1	Partial List of Alum Manufacturing Plants	5-2
5-2	Reactions of Aluminum Sulfate	5-15
5-3	Reactions of Ferric Sulfate	5-23
5-4	Reactions of Ferrous Sulfate	5-24
5-5	Partial List of Lime Manufacturing Plants	5-25
5-6	Reactions of Lime	5-34
5-7	Partial List of Caustic Soda Manufacturing Plants	5-39
5-8	CO ₂ Yields of Common Fuels	5-46
5-9	Partial List of Carbon Dioxide Manufacturing Plants	5-47
5-12	Partial List of Polymer Sources and Trade Names	5-51
5-11	Types of Chemical Feeders	5-65
7-1	Performance of Special Settling Tank Inlets	7-13
7-2	Typical Design Parameters For Primary Clarifiers	7-14
7-3	Typical Design Parameters For Secondary Clarifiers	7-16
7-4	Dissolved-Air Flotation Applications	7-26
7-5	Tube Settler Installations	7-31

LIST OF TABLES (continued)

Table No.		Page
8-1	Physical Straining Processes	8-2
8-2	Specifications of Hydrasieves	8-5
8-3	Wedge-Wire Screens: Municipal Treatment Installations	8-7
8-4	Data Sheet-Wedge Wire Screens	8-9
8-5	Microscreen Design Parameters	8-13
8-6	Microscreen Installations	8-17
8-7	Municipal Microscreen Installations	8-18
8-8	Typical Microscreen Power and Space Requirements	8-28
8-9	Diatomaceous Earth Filtration of Secondary Effluent	8-36
8-10	Results of Ultrafiltration Installations	8-38
8-11	Summary of Pikes Peak Data	8-39
8-12	Typical Membrane Specifications	8-42
9-1	Results of Studies of Filtration of Effluents From Secondary Biological Treatment	9-12
9-2	Results of Studies of Filtration of Chemically Treated Secondary Effluent	9-15
9-3	Results of Studies of Filtration Following Chemical Treatment of Primary or Raw Wastewater	9-16
9-4	Expected Effluent Suspended Solids From Multimedia Filtration of Secondary Effluent	9-17
9-5	Typical Media Designs For Filters	9-30
9-6	Filter Gravel Design	9-43
