

Jordan Rotheiser

Joining of Plastics

Handbook for Designers and Engineers

3rd Edition

HANSER

Contents

1	Rapid Guidelines for Joining of Plastics and Efficient Use of This Handbook	1
1.1	Efficient Use of This Handbook	1
1.2	Rapid Guidelines for Assembly of Plastics	2
1.2.1	Adhesives (Chapter 7).....	2
1.2.1.1	Liquids: Solvent-Based, Water-Based, and Anaerobic Adhesives	2
1.2.1.2	Mastics.....	3
1.2.1.3	Hot Melts	3
1.2.1.4	Pressure-Sensitive Adhesives	3
1.2.2	Fasteners and Inserts (Chapter 8).....	3
1.2.3	Hinges (Chapter 9).....	4
1.2.4	Hot Plate/Hot Die/Fusion and Hot Wire/Resistance Welding (Chapter 10)	4
1.2.5	Hot Gas Welding (Chapter 11)	5
1.2.6	Induction Welding (Chapter 12)	5
1.2.7	Insert Molding (Chapter 13)	5
1.2.8	Multipart Molding (Chapter 13)	6
1.2.9	Press Fits/Force Fits/Interference Fits/Shrink Fits (Chapter 14)	6
1.2.10	Solvent Joining (Chapter 7)	6
1.2.11	Snap Fits (Chapter 15)	7
1.2.12	Spin Welding (Chapter 16).....	7
1.2.13	Staking/Swaging/Peening/Cold Heading/Cold Forming (Chapter 17).....	7
1.2.14	Threads – Molded in (Chapter 18).....	8
1.2.15	Threads – Tapped (Chapter 18)	8
1.2.16	Ultrasonic Welding (Chapter 19).....	8
1.2.17	Vibration Welding (Chapter 20)	9
1.2.18	Welding with Lasers (Chapter 21).....	9
1.3	Assembly Methods Selection by Size.....	9
1.4	Assembly Methods Selection by Joining Time	11
2	Designing for Efficient Assembly.....	12
2.1	Avoiding Part Distortion.....	12
2.2	Inside Corner Stress	13
2.3	Ribs and Bosses	14
2.4	Draft	15
2.5	Shrinkage	17
2.6	Fitments	19
2.6.1	Drawing Conventions for Plastic Assembly	19
2.6.2	Importance of Tolerancing for Assembly	21
2.6.3	Special Drafting Practices for Plastics	22
2.6.4	Procedure for Establishing Tolerances	26
2.7	Design Practices for Looser Tolerances in Plastics	27
2.7.1	Three-Point Location	28

2.7.2	Hollow Bosses	28
2.7.3	Crush Ribs	30
2.7.4	Flexible Ribs	31
2.7.5	Inside/Outside Fitments	32
2.7.6	Step Fitments	32
2.8	More Relaxed Tolerances for Large Parts	33
2.8.1	Drill in Place	33
2.8.2	Oversize Hole with Washer	33
2.8.3	Criss Cross Slots	33
2.8.4	Separation of Functions	34
2.8.5	Corner Clearance	34
2.9	Semidovetail Joint	35
2.10	Minimizing the Effect of Misalignment on Appearance	36
2.11	The Plastic Product Design for Assembly Checklist	36
2.12	Testing	36
3	Cost Reduction In Assembly	40
3.1	Introduction	40
3.2	The Micro Approach to Part Reduction	40
3.2.1	Combining Parts Through Materials	41
3.2.2	Combining Parts Through Processes	42
3.3	The Macro Approach to Part Reduction	43
3.3.1	Multiple Material Processing	47
3.3.2	Coextrusion	48
3.3.3	Coinjection Molding	49
3.3.4	Multipart or Two-Color Injection Molding	49
3.4	Elimination of Fasteners	49
3.4.1	Multiple Parts per Fastener	50
3.4.2	Press and Snap Fits	50
3.4.3	Integral Hinges	51
3.4.4	Combining Fastener Elimination Concepts	51
3.5	Holistic Design	53
3.5.1	The Overall Design Considerations	53
3.5.2	The Thread Design	54
3.5.3	The Processing Considerations	55
3.5.4	The Tooling Considerations	55
3.5.5	Execution	56
3.5.6	Toward Holistic Design	56
4	Design for Disassembly and Recycling	58
4.1	Introduction	58
4.2	Design for Disassembly	59
4.2.1	Reopenable Assemblies	59
4.2.2	Permanent Assemblies	63
4.3	Design for Recycling	64
4.3.1	Simplification	65
4.3.2	Assembly Method Selection	65

4.3.2.1 Reopenable Methods	65
4.3.2.2 Permanent Methods	66
4.3.3 Material Selection	66
4.3.4 Additives	67
4.3.5 Contaminants	68
4.3.6 Material Reduction	68
4.3.7 Identification and Disassembly Instructions	70
5 Assembly Method Selection by Material	71
5.1 Thermoplastics Versus Thermosets	71
5.2 Amorphous Versus Semicrystalline Thermoplastics	72
5.2.1 Postmolding Shrinkage	73
5.2.2 Coefficient of Linear Thermal Expansion	73
5.2.3 Weldability	74
5.2.4 Solvent Sealability	74
5.3 Thermosets	74
5.4 Assembly Method by Material	75
5.4.1 Properties and Assembly-Related Data for Selected Materials	81
5.4.2 Adhesives	114
5.4.3 Using the SPI Tables	114
5.5 Material Databases	156
5.6 Material Suppliers	156
6 Assembly Method Selection by Process	158
6.1 Introduction	158
6.2 Blow Molding	158
6.2.1 The Process	158
6.2.2 Assembly Considerations	159
6.3 Casting, Potting, Encapsulation, and Embedment	160
6.3.1 The Processes	160
6.3.2 Assembly Considerations	161
6.4 Coextrusion	161
6.5 Co-Injection Molding	161
6.6 Cold Press Molding	161
6.6.1 The Process	161
6.6.2 Assembly Considerations	162
6.7 Compression Molding	162
6.7.1 The Process	162
6.7.2 BMC: Bulk Molding Compound	163
6.7.3 SMC: Sheet Molding Compound	163
6.7.4 Assembly Considerations	163
6.8 Extrusion	164
6.8.1 The Process	164
6.8.2 Coextrusion	165
6.8.3 Assembly Considerations	166
6.9 Filament Winding	167
6.9.1 The Process	167
6.9.2 Assembly Considerations	168

6.10 Gas-Assisted Injection Molding	168
6.11 Gas Counter Pressure Structural Foam Molding	168
6.12 Injection Molding	168
6.12.1 The Process	168
6.12.2 Assembly Considerations	169
6.13 Lay-up and Spray-up	170
6.13.1 The Processes	170
6.13.2 Assembly Considerations	170
6.14 Machining	171
6.14.1 The Process	171
6.14.2 Thermoplastics	172
6.14.3 Thermosets	172
6.14.4 Assembly Considerations	173
6.15 Pultrusion	173
6.15.1 The Process	173
6.15.2 Assembly Considerations	174
6.16 Reaction Injection Molding (RIM)	174
6.16.1 The Process	174
6.16.2 Assembly Considerations	175
6.17 Resin Transfer Molding (RTM)	176
6.17.1 The Process	176
6.17.2 Assembly Considerations	177
6.18 Rotational Molding	177
6.18.1 The Process	177
6.18.2 Assembly Considerations	179
6.19 Structural Foam Molding, Gas Counterpressure Structural Foam Molding, and Coinjection Molding	180
6.19.1 The Processes	180
6.19.2 Assembly Considerations	181
6.20 Thermoforming	183
6.20.1 The Processes	183
6.20.2 Thin-Gauge Thermoforming	184
6.20.3 Heavy-Gauge Thermoforming	184
6.20.4 Pressure Thermoforming	185
6.20.5 Other Forming Processes	185
6.20.6 Assembly Considerations	185
6.21 Twin-Sheet Thermoforming	186
6.21.1 The Process	186
6.21.2 Assembly Considerations	187
6.22 Transfer Molding	187
6.22.1 The Process	187
6.22.2 Assembly Considerations	188
6.23 Process Selection	188
6.23.1 Thermoplastic Open Shapes	190
6.23.2 Thermoset Open Shapes	191
6.23.3 Hollow Parts	192
6.23.4 Profiles	192
6.23.5 Ultra High Strength	193

7 Adhesive and Solvent Joining	194
7.1 Advantages and Disadvantages	194
7.1.1 Advantages.....	194
7.1.2 Disadvantages	196
7.2 Basic Theory and Terminology	197
7.3 Methods for Measuring the Wettability of a Plastic Surface	199
7.3.1 Contact Angle Test	199
7.3.2 Wetting Tension Test (ASTM D-2578-73, Wetting Tension of Polyethylene and Polypropylene Films).....	199
7.3.3 Adhesion Ratio Test (Tentative ASTM D-2141-63R).....	200
7.3.4 Water Spreading Test.....	200
7.3.5 Dye Stain Test.....	200
7.3.6 Ink Retention Test.....	200
7.4 Surface Treatments	201
7.4.1 Solvent Cleaning.....	202
7.4.1.1 Solvent Immersion.....	203
7.4.1.2 Solvent Wiping.....	203
7.4.1.3 Solvent Spray.....	203
7.4.1.4 Vapor Degreasing	203
7.4.1.5 Ultrasonic Vapor Degreasing	203
7.4.1.6 Ultrasonic Cleaning with Liquid Rinse	203
7.4.2 Abrasive Methods.....	203
7.4.2.1 Dry Abrasion	204
7.4.2.2 Dry Abrasive Blast	204
7.4.2.3 Wet Abrasive Blast.....	204
7.4.2.4 Wet Abrasive Scour.....	205
7.4.2.5 Detergent Scrub	205
7.4.3 Surface Energy Treatments and Process Selection Factors.....	205
7.4.3.1 Chemical Treatment	205
7.4.3.2 Corona Treatment	205
7.4.3.3 Plasma Treatment	207
7.4.3.4 Flame Treatment.....	207
7.4.3.5 Process Selection Factors	208
7.4.4 Shelf Life of Surface Treatments	208
7.5 Design for Adhesion	208
7.5.1 Shear Stress.....	209
7.5.2 Tensile Stress	209
7.5.3 Cleavage.....	209
7.5.4 Peel.....	210
7.5.5 Adhesive Joint Designs.....	210
7.5.5.1 Load-Bearing or Non-Load-Bearing Joints	210
7.5.5.2 Lap Joints.....	211
7.5.5.3 Butt Joints.....	216
7.5.5.4 Screw and Glue.....	219
7.6 Adhesives.....	219
7.6.1 Acrylics	226
7.6.2 Anaerobics	226
7.6.3 Cyanoacrylates.....	227

7.6.4	Epoxies	227
7.6.5	Hot Melts	228
7.6.6	Phenolics.....	228
7.6.7	Polyurethanes.....	229
7.6.8	Polysulfides.....	229
7.6.9	Pressure-Sensitive Adhesives	229
7.6.10	Silicones.....	230
7.6.11	Solvent-Based Adhesives	230
7.6.12	Water-Based Adhesives.....	230
7.7	Solvents	231
7.8	Adhesive and Solvent Assembly Techniques.....	233
7.8.1	Fixturing	233
7.8.2	Clamping.....	234
7.8.3	Application Methods.....	235
7.8.3.1	Capillary Method.....	235
7.8.3.2	Dip or Soak Method	236
7.9	Adhesive and Solvent System Selection.....	237
7.10	Glossary	239
7.11	Sources.....	241
8	Fasteners and Inserts	244
8.1	Advantages and Disadvantages	244
8.1.1	Advantages of Using Fasteners.....	244
8.1.2	Disadvantages of Using Fasteners	244
8.2	Basic Design Considerations for Fasteners	246
8.2.1	Creep Effects	246
8.2.2	Stress Relaxation Effects	247
8.2.3	Notch Sensitivity	247
8.2.4	Craze Resistance	248
8.2.5	Stiffness Considerations	249
8.2.6	Differentials in the Coefficients of Linear Thermal Expansion.....	249
8.2.7	Loss of Properties Due to Moisture	250
8.2.8	Clamp Load	250
8.2.8.1	Strain Method	250
8.2.8.2	Torque Method	251
8.2.9	Vibration Resistance	252
8.3	Methods of Using Fasteners with Plastics	252
8.3.1	Press-in Fasteners	253
8.3.2	Self-Tapping Screws.....	254
8.3.2.1	Strength of Plastic Threads.....	254
8.3.2.2	Thread-Forming and Thread-Cutting Screws.....	256
8.3.3	Special Screws for Plastics	259
8.3.3.1	Narrow Thread Forms	259
8.3.3.2	Alternating Thread Heights	259
8.3.3.3	Asymmetrical Thread Forms	259
8.4	Selection of Self-Tapping Screws	259
8.4.1	Cost Criteria.....	260
8.4.2	Fail/Drive Ratio and Differential	260

8.4.3	Strength Criteria.....	261
8.4.4	Thread Cutting or Thread Forming.....	262
8.4.5	Tapped or Molded-in Threads	262
8.5	Threaded Inserts: Advantages.....	263
8.6	Boss Cap	264
8.7	Helical Coil Inserts	264
8.8	Self-Tapping Inserts.....	265
8.9	Press-in Inserts	265
8.10	Glue-in Inserts	266
8.11	Expansion Inserts.....	266
8.12	Molded-in Inserts.....	267
8.13	Ultrasonic Inserts	267
8.14	Heat-Installed Inserts	270
8.15	Induction Inserts	271
8.16	Hermetic Seals	272
8.17	Studs	272
8.18	Insert Design Considerations.....	273
8.19	U- or J-Clips.....	273
8.20	Tee Nuts.....	274
8.21	Machine Screws.....	274
8.22	Tapping and Stud Plates	276
8.23	Plastic Screws	276
8.24	Screw Heads and Washers	277
8.25	Boss Designs.....	277
8.25.1	Design Criteria.....	277
8.25.2	Boss Sinks.....	278
8.25.2.1	Coring.....	278
8.25.2.2	Location.....	280
8.25.2.3	Support.....	280
8.25.2.4	Material.....	281
8.25.2.5	Surface Treatment.....	281
8.25.3	Weld Lines.....	281
8.26	Self-Threading Nuts.....	283
8.27	Twist Nuts.....	283
8.28	Press-on Nuts	283
8.29	Spring Clips	284
8.30	Push-in Fasteners	284
8.31	Rivets	284
8.32	Sources.....	286
8.32.1	Fasteners and Inserts	286
8.32.2	Threaded-Insert.....	287
8.32.3	Thermal Insertion Equipment	288
8.32.4	Induction Insertion Equipment	288
8.33.5	Ultrasonic Insertion Equipment.....	288
9	Hinges.....	289
9.1	Advantages and Disadvantages	289
9.1.1	Advantages.....	289

9.1.2	Disadvantages	289
9.2	One-Piece Integral Hinges	289
9.2.1	The Living Hinge	290
9.2.1.1	Living Hinge Design	291
9.2.1.2	Living Hinge Molding Considerations	294
9.2.1.3	Living Hinges by Other Processes	298
9.2.2	The Mira Spring Hinge	300
9.2.3	Standard Hinges	302
9.2.4	Tab Hinges	303
9.3	Two-Piece Plastic Hinges	303
9.3.1	Ball-and-Socket Hinges	304
9.3.2	Two-Piece Lug-and-Pin Hinges	304
9.3.3	Hook-and-Eye Hinges	305
9.4	Three-Piece Hinges	305
9.4.1	Three-Piece Lug and Pin	306
9.4.2	Piano Hinge	306
9.5	Latches	307
9.5.1	Snaps	307
9.5.2	Rathbun Spring	307
9.6	Number of Hinges and Location	307
10	Hot Plate/Hot Die/Fusion and Hot Wire/Resistance Welding	308
10.1	Advantages and Disadvantages	308
10.1.1	Description	308
10.1.2	Advantages	308
10.1.3	Disadvantages	309
10.2	Materials	310
10.3	The Process	311
10.4	Types of Hot Plate Welding	315
10.4.1	Low Temperature Hot Plate Welding	315
10.4.2	High Temperature Hot Plate Welding	315
10.4.3	Noncontact Hot Plate Welding	316
10.5	Hot Plate Welding Joint Designs	316
10.6	Equipment	318
10.7	Hot Wire/Resistance Welding	319
10.8	Sources	320
11	Hot Gas Welding	321
11.1	Advantages and Disadvantages	321
11.1.1	Advantages	321
11.1.2	Disadvantages	321
11.2	The Process	322
11.2.1	Tack Welding	322
11.2.2	Permanent Hot Gas Welding	323
11.2.3	High Speed Welding	324
11.2.4	Extrusion Welding	326
11.3	Joint Designs	326
11.4	Welding Practice	328

11.4.1 Appearance Problems	329
11.4.2 Cracking Problems	330
11.4.3 Distortion	330
11.4.4 Fusion Problems	330
11.4.5 Penetration	330
11.4.6 Porosity	331
11.4.7 Scorching	331
11.5 Testing the Weld	331
11.5.1 Nondestructive Testing	331
11.5.1.1 Visual Examination	331
11.5.1.2 Leak Tests	332
11.5.2 Destructive Tests	332
11.5.2.1 Tensile Test	332
11.5.2.2 Bending Test	332
11.5.2.3 Rod Removal Test	332
11.5.3 Chemical Test	332
11.5.4 Spark Test	333
11.6 Applications	333
11.7 Sources	333
11.7.1 Welding Rods	333
11.7.2 Welding Equipment	333
11.7.3 Welding Rod And Equipment	334
12 Induction/Electromagnetic Welding	335
12.1 Description	335
12.2 Advantages and Disadvantages	335
12.2.1 Advantages	335
12.2.2 Disadvantages	336
12.3 The Equipment	337
12.4 The Process	339
12.5 The Coil	340
12.5.1 Single-Turn Coils	340
12.5.2 Hairpin Coils	340
12.5.3 Multi-Turn Coils	341
12.5.4 Split Coils	341
12.5.5 Other Types of Coils	342
12.5.6 Coil Positioning	342
12.5.7 Flux Concentrators	343
12.6 Materials	343
12.6.1 Polymers	343
12.6.2 The Electromagnetic Material	343
12.6.2.1 Molded-in Pre-Forms	343
12.6.2.2 Hot Melt Electromagnetic Materials	344
12.6.2.3 Liquid Electromagnetic Materials	345
12.7 Joint Designs	345
12.8 Encapsulation	348
12.9 Film and Sheeting	348
12.9.1 Intermittent Sealing	348

12.9.2 Continuous Sealing	349
12.10 Inserting Metal into Plastic	349
12.11 Sources	350
13 Insert and Multipart Molding	351
13.1 Description	351
13.2 Insert Molding	351
13.2.1 Advantages of Insert Molding	351
13.2.2 Disadvantages of Insert Molding	352
13.2.3 Design with Threaded Inserts	353
13.2.4 Mold Considerations for Threaded Inserts	356
13.2.5 Custom-Designed Inserts	358
13.2.6 Outserts: Inserts Larger than the Moldment	362
13.2.7 Hermetic Seals	363
13.2.8 Preparation of Inserts	363
13.2.9 Decorative Inserts	364
13.3 Multi-Part Molding	366
13.3.1 Description	366
13.3.2 Advantages Particular to Multi-part Molding	366
13.3.3 Disadvantages Particular to Multi-part Molding	367
13.3.4 The Process	367
13.3.5 Materials	368
13.4 Sources	370
14 Press Fits/Force Fits/ Interference Fits/Shrink Fits	372
14.1 Advantages and Disadvantages	372
14.1.1 Advantages	372
14.1.2 Disadvantages	372
14.2 Press Fit Engineering	373
14.2.1 Engineering Notation	373
14.2.2 Geometric Factor	375
14.2.3 Changes Due to Temperature Variations	375
14.2.4 Hoop Stress	376
14.2.4.1 Metal Shaft in Plastic Boss	376
14.2.4.2 Shaft and Boss of Same Material	376
14.2.4.3 Shaft and Boss of Different Plastics	376
14.2.4.4 Quick Methods	377
14.2.5 Assembly and Disassembly Forces	377
14.2.6 Dimensional Changes Due to Assembly	378
14.2.7 Relationships	378
14.2.8 Equation Limitations	379
14.3 Safety Factor	384
14.4 Processing	384
14.5 Material Selection	385
14.6 Part Design	385
14.6.1 Heavy-Duty Press Fits	385
14.6.2 Light-Duty or Reopenable Press Fits	386
14.6.3 Other than Round	387

14.7 Case Studies.....	388
14.7.1 Determination of Changes in Diameter Due to Temperature Variations.....	388
14.7.2 The Geometric Factor for Use In Press Fit Equations	389
14.7.3 Determination of Design Stress and for a Metal Shaft in a Plastic Boss Maximum Allowable Interference for a Metal Shaft in a Plastic Boss.....	389
14.7.4 Dimensional Changes Due to Assembly.....	391
14.7.4.1 Metal Shaft in Plastic Boss	391
14.7.4.2 Plastic Shaft and Metal Boss	391
14.7.5 Determination of Design Stress and Maximum Allowable Interference for a Shaft and Boss of the Same Material.....	392
14.7.6 Determination of Design Stress and Maximum Allowable Interference for a Shaft and Boss of Different Plastics	393
14.7.7 Determination of Assembly and Disassembly Forces	395
14.7.8 Determination of Torsional Holding Capacity.....	395
15 Snap Fits.....	396
15.1 Advantages and Disadvantages	396
15.1.1 Advantages.....	396
15.1.2 Disadvantages	397
15.2 General Applications	398
15.3 General Engineering Principles	398
15.3.1 Allowable Dynamic Strain.....	398
15.3.2 Corner Stress Concentrations.....	399
15.3.3 Engineering Adjustments When Both Parts Are Elastic.....	400
15.3.4 Finite Element Analysis.....	401
15.4 Cantilever Snap Fits.....	401
15.4.1 Cantilever Snap Fit Designs.....	401
15.4.2 Cantilever Snap Fit Engineering.....	404
15.5 Cylindrical, Ring, Perimeter, or Annular Snap Fits.....	410
15.5.1 Cylindrical Snap Fit Designs	410
15.5.2 Engineering of Cylindrical, Ring, Perimeter, or Annular Snap Fits	412
15.5.2.1 Maximum Permissible Interference.....	412
15.5.2.2 Transverse and Axial Forces	412
15.6 Torsion Snap Fits	415
15.6.1 Torsion Snap Fit Designs.....	415
15.6.2 Engineering of Torsion Snap Fits	415
15.7 Strippable Snap Fits.....	417
15.8 The Injection Molding Process	418
15.9 Molds for Snap Fits.....	419
15.9.1 The Basics of Injection Mold Construction.....	419
15.9.2 Ejection and Cooling Systems for Stripping Molds.....	421
15.9.3 Cores for Nonstripping Molds	423
15.9.4 Snap Fit Details in the Mold Cavity	425
15.10 Conclusions	427
15.11 Case Studies	428
15.11.1 Cantilever Snap Fit Determination of Permissible Deflection.....	428
15.11.2 Cantilever Snap Fit Determination of Radial and Mating Forces.....	431

15.11.3 Annular Snap Fit Determination of Maximum Permissible Interference ...	432
15.11.4 Annular Snap Fit Determination of Maximum Design Strain	432
15.11.5 Annular Snap Fit Determination of Transverse and Axial Forces for a Snap Fitment Located Near the End of the Tube	433
15.11.6 Annular Snap Fit Determination of Transverse and Axial Forces for a Snap Fitment Located Remote From the End of the Tube	434
15.11.7 Self-locking Angle	435
16 Spin Welding	436
16.1 Description of Spin Welding	436
16.2 Advantages and Disadvantages of Spin Welding	436
16.2.1 Advantages	436
16.2.2 Disadvantages	437
16.3 Spin Welding Process	438
16.4 Materials	440
16.5 Design for Spin Welding	442
16.5.1 Overall Design Considerations	442
16.5.2 Joint Designs	442
16.6 The Equipment for Spin Welding	444
16.6.1 Drill-Press-Based Spin Welders	444
16.6.1.1 Tooling for Drill-Press-Based Inertial Welding	444
16.6.1.2 Tooling for Drill-Press-Based Pivot Tool Welding	445
16.6.2 Commercial Inertia Spin Welders	445
16.6.3 Commercial Direct-Drive Spin Welders	447
16.7 Sources	449
17 Staking/Swaging/Peening/ Cold Heading/Cold Forming	450
17.1 Advantages and Disadvantages of Staking/ Cold Forming	450
17.1.1 Advantages	450
17.1.2 Disadvantages	451
17.2 Staking	451
17.2.1 Cold Forming of Stakes	452
17.2.2 Hot Air/Cold Staking	454
17.2.3 Ultrasonic Cold Forming	455
17.2.4 Hot Die Forming of Stakes (Thermal Staking)	457
17.2.5 Ultrasonic Hot Forming of Stakes	457
17.2.6 Laser Staking	458
17.3 Stake Design	458
17.3.1 The Stud	458
17.3.2 Stake Heads	459
17.4 Swaging	462
17.5 Sources	463
17.5.1 Thermal Staking	463
17.5.2 Hot Air/Cold Staking	464
17.5.3 Laser Staking	464
17.5.4 Ultrasonic	464

18 Threads: Tapped and Molded-in	465
18.1 Advantages and Disadvantages of Integral Threads.....	465
18.1.1 Advantages Common to Threads of Both Types.....	465
18.1.2 Disadvantages Common to Threads of Both Types.....	465
18.2 Drilled and Tapped Holes in Plastics.....	466
18.2.1 Advantages Unique to Tapped Threads.....	466
18.2.2 Disadvantages Unique to Tapped Threads.....	466
18.2.3 Drilling Holes in Plastics.....	467
18.2.4 Reaming Holes in Plastics.....	468
18.2.5 Tapping Holes in Plastics.....	468
18.3 Molded Threads in Plastics.....	471
18.3.1 Advantages Unique to Molded-in Threads.....	471
18.3.2 Disadvantages Unique to Molded-in Threads.....	471
18.3.3 Thread Design.....	471
18.3.4 Molds for Threads.....	473
18.3.4.1 Stripping Molds for Internal Threads.....	474
18.3.4.2 Collapsing Core Molds for Internal Threads.....	475
18.3.4.3 Expandable Cavity Molds for External Threads.....	477
18.3.4.4 Split-Cavity Molds for External Threads.....	477
18.3.4.5 Unscrewing Molds for Internal Threads.....	479
18.3.4.6 Unscrewing Chuck Plate Mold.....	479
18.3.4.7 Molds for Parts with Less than One Turn of Thread.....	479
18.4 Sources.....	480
18.4.1 Collapsing Cores and Cavities.....	480
18.4.2 Unscrewing Chuck.....	480
19 Ultrasonic Welding	481
19.1 Advantages and Disadvantages of Ultrasonic Welding.....	481
19.1.1 Advantages.....	481
19.1.2 Disadvantages.....	482
19.2 General Applications.....	483
19.3 The Principle of Ultrasonic Welding.....	483
19.4 Materials for Ultrasonic Welding.....	484
19.4.1 Additives and Contaminants.....	487
19.4.1.1 Colorants.....	487
19.4.1.2 Fillers, Extenders, and Fibrous Reinforcements.....	487
19.4.1.3 Flame Retardants.....	489
19.4.1.4 Foaming Agents.....	489
19.4.1.5 Impact Modifiers.....	489
19.4.1.6 Lubricants.....	489
19.4.1.7 Mold Releases.....	489
19.4.1.8 Painted Parts.....	490
19.4.1.9 Plasticizers.....	490
19.4.1.10 Regrind.....	490
19.5 Part Design for Ultrasonic Welding.....	490
19.5.1 Overall Ultrasonic Welding Considerations.....	490
19.5.1.1 Strength Requirements.....	491
19.5.1.2 Appearance Requirements.....	491

19.5.1.3 Rigidity Considerations	491
19.5.2 Joint Fundamentals	494
19.5.2.1 Part Alignment.....	494
19.5.2.2 Uniform Vibration Travel Distance.....	494
19.5.2.3 Minimal Initial Contact Area.....	495
19.5.3 Energy Director Joints	496
19.5.3.1 Butt Joint	496
19.5.3.2 Joint Layout.....	498
19.5.3.3 Textured Surface	500
19.5.3.4 Step Joint	500
19.5.3.5 Tongue-and-Groove Joint.....	501
19.5.3.6 Thin-Walled Joint.....	502
19.5.4 Shear Joints.....	502
19.5.5 Hermetic Seals.....	506
19.5.6 Scan Welding.....	506
19.5.7 Stud Welding, Staking, Swaging, and Spot Welding	508
19.5.7.1 Staking and Swaging	508
19.5.7.2 Stud Welding.....	508
19.5.7.3 Spot Welding.....	512
19.6 Fabric and Film Sealing.....	513
19.7 The Ultrasonic Equipment.....	515
19.7.1 The Basic Principles	515
19.7.2 The Power Supply or Generator	516
19.7.3 The Converter or Transducer.....	517
19.7.4 The Booster.....	517
19.7.5 The Horn.....	517
19.7.6 The Fixture.....	519
19.7.7 The Controls	520
19.7.8 Equipment Frequency	521
19.7.9 Automation of Ultrasonic Welding.....	523
19.8 Sources.....	523
20 Vibration Welding	524
20.1 Advantages and Disadvantages	524
20.1.1 Comparison with Ultrasonic Welding	524
20.1.2 Advantages of Vibration Welding	524
20.1.3 Disadvantages of Vibration Welding.....	525
20.2 The Process of Vibration Welding	526
20.2.1 Linear Vibration Welding.....	528
20.2.2 Orbital Vibration Welding.....	528
20.2.3 Angular Vibration Welding	529
20.3 Materials	529
20.4 Vibration Welding Part Design	532
20.4.1 Basic Considerations.....	532
20.4.2 Joint Designs for Linear Vibration Welding.....	533
20.5 The Equipment.....	536
20.6 Sources.....	537

21 Welding with Lasers	538
21.1 Advantages and Disadvantages	538
21.1.1 Non-Contact, Surface, Direct, or Butt Laser Welding	538
21.1.2 Laser Staking	539
21.1.3 Through Transmission Infra-Red Laser Welding	539
21.1.4 Advantages of Through Transmission Laser Welding	540
21.1.5 Disadvantages of Through Transmission Laser Welding	542
21.2 The Process of Laser Welding	542
21.2.1 The Laser	542
21.2.2 Basic Through Transmission Laser Welding Methods	544
21.2.3 Spot or Contour Welding	545
21.2.4 Simultaneous Through Transmission Infra-Red (STTIR) Laser Welding (Also Known as Simultaneous Line or Flash Welding)	547
21.2.5 Quasi-Simultaneous Laser Welding	548
21.2.6 Mask Welding (Leister Patented Process)	549
21.3 Materials for Laser Welding	550
21.3.1 Material Properties Affecting Laser Weldability	550
21.3.2 Effects of Refraction Properties on Material Selection	552
21.3.3 Effects of Pigments, Fillers, and Additives on Light Transmission	553
21.3.4 Laser Welding Transmitting Materials	554
21.3.5 Compatibility of Plastics for Laser Welding	556
21.4 Joint Designs	556
21.5 Equipment	558
21.6 Applications	559
21.7 Sources	560
