

Sustainable Solutions

**DEVELOPING PRODUCTS
AND SERVICES FOR THE FUTURE**

CONTRIBUTING EDITORS
MARTIN CHARTER AND URSULA TISCHNER

CONTENTS

Preface	14
Acknowledgements	14
Foreword	15

*Jacqueline Aloisi de Larderel, Director, Division of Technology, Industry
and Economics, United Nations Environment Programme*

Introduction	17
--------------------	----

*Martin Charter, The Centre for Sustainable Design, UK,
and Ursula Tischner, econcept, Germany*

PART 1: Background to Sustainable Consumption and Production

1. Sustainable development: from catchwords to benchmarks and operational concepts	24
---	-----------

Joachim H. Spangenberg, Sustainable Europe Research Institute, Germany

1.1 The history of development of the sustainability concept	24
1.2 What is sustainable development?	26
1.2.1 Sustainable development: a definition	26
1.2.2 Macro measurements	27
1.2.3 The concept and its limits	30
1.3 What is sustainable production and consumption?	32
1.3.1 Measures of consumption	32
1.3.2 Business and state consumption	33
1.3.3 Household consumption	34
1.3.4 Sustainable growth: minimum benchmarking conditions	36
1.4 Applying the concept of sustainability	37
1.4.1 Sustainability metrics for the micro level	38
1.4.2 The corporate human development index (CHDI)	41
1.5 Supporters, opponents and the role of ecodesign	42
1.5.1 Supporters and opponents	42
1.5.2 Some key strategies and the role of ecodesign	44
1.6 Outlook	46

2. Rewiring global consumption: strategies for transformation	48
<i>Nick Robins, Henderson Global Investors, UK, and Bas de Leeuw, Ministry of Housing, Spatial Planning and the Environment, Netherlands; United Nations Environment Programme, France</i>	
2.1 The consumption explosion	48
2.2 Consuming the globe?	49
2.3 Re-linking consumption and quality of life	51
2.4 From niche to system	52
2.5 Achieving the global shift	53
2.6 Conclusions	55
3. Sustainable solutions in less industrialised countries: the conditions and actors at state and company level for sustainable product design	57
<i>Roland Lentz, Intercambio, Germany</i>	
3.1 Environmental management as a framework for sustainable product development and design in less industrialised countries	58
3.1.1 Basic ecological rules	58
3.1.2 The environmental impact equation	60
3.1.3 The management framework	61
3.1.4 Drivers and obstacles for sustainable product development and design in less industrialised countries	64
3.1.5 The role of legislation	67
3.2 Potential strategies for implementation	70
3.2.1 State level	70
3.2.2 Regional level	71
3.2.3 Company level	71
3.2.4 Consultancies	72
3.2.5 Industry associations	72
3.2.6 Establishing an environmental information system	73
3.2.7 Programmes for international technical aid	75
3.4 Conclusions	76
4. Towards sustainable business?	77
<i>Peter James, University of Bradford, UK</i>	
4.1 What is sustainable business?	77
4.2 A sustainable value chain	78
4.2.1 External relations	80
4.2.2 Firm infrastructure	82
4.2.3 Human resources	84
4.2.4 Science and technology	85
4.2.5 Procurement	85
4.2.6 Premises	86
4.2.7 Design	87
4.2.8 Inbound and outbound logistics	87
4.2.9 Operations	87
4.2.10 Marketing and sales	90
4.2.11 Service	91
4.2.12 Product disposal	91
4.2.13 Risk management	91
4.3 Winning hearts and minds for sustainable business	92
4.4 Evaluating sustainable business	94
4.5 The future of sustainable business	96

5. Integrated product policy and eco-product development 98

*Martin Charter, Alex Young, Aleksandra Kielkiewicz-Young and
Inga Belmane, The Centre for Sustainable Design, UK*

5.1	Background	99
5.2	Integrated product policy	101
5.2.1	Definitions	101
5.2.2	Objectives and conceptual approach	102
5.2.3	Principles and strategies	103
5.2.4	Building blocks	103
5.2.5	Integrated product policy toolbox	104
5.2.6	Uncertainty surrounding integrated product policy	105
5.3	Environmental product policy: Denmark's approach	106
5.3.1	Accumulation of know-how, methodology and competence	106
5.3.2	Information tools	106
5.3.3	Green taxes	108
5.3.4	Subsidies	108
5.3.5	Green public procurement	108
5.3.6	Establishment of product area panels	108
5.4	Integrated product policy: a different perspective	109
5.5	Integrated product policy and eco-product development	111
5.5.1	Focus on the electronics sector	111
5.6	Concluding remarks	115

PART 2: Sustainable, Eco-product and Eco-service Development**6. Sustainable product design 118**

*Ursula Tischner, econcept, Germany, and
Martin Charter, The Centre for Sustainable Design, UK*

6.1	What is sustainable product design?	120
6.1.1	Product design	120
6.1.2	Ecodesign and design for environment	121
6.1.3	Sustainable product design is more than ecodesign	121
6.2	Drivers and obstacles for sustainable product design	122
6.2.1	Changing patterns of consumption and production	123
6.2.2	Changing technologies	124
6.2.3	Changing economic and social patterns	124
6.3	Sustainable product design strategies	127
6.3.1	From repair to rethink: the four Rs	127
6.3.2	Eco-innovation	127
6.4	Sustainable solutions	130
6.4.1	Sustainable product design models	130
6.4.2	Examples of sustainable product design	133
6.5	Conclusions	137

7. The Next Industrial Revolution 139

*William McDonough and Michael Braungart,
McDonough Braungart Design Chemistry, USA*

7.1	Why eco-efficiency won't work	139
7.1.1	A retroactive design assignment	142
7.2	Eco-effectiveness	143
7.2.1	Principle 1: waste equals food	144
7.2.2	Principle 2: respect diversity	147
7.2.3	Principle 3: use current solar income	148
7.3	Equity, economy, ecology	148
7.3.1	A new design assignment	150
7.5	Conclusions	150

8. Sustainability and services 151

Walter R. Stahel, The Product-Life Institute, Switzerland

8.1	Sustainability as a vision	151
8.1.1	Crossing the first borderline to a sustainable economy	151
8.1.2	Crossing the second borderline to a sustainable society	153
8.2	The service economy: selling performance instead of goods	155
8.3	Policies for more sustainable solutions	158
8.4	Strategies for more sustainable solutions	158
8.4.1	Sufficiency solutions	159
8.4.2	Efficiency solutions	160
8.5	The shift from manufacturing to a service economy	162
8.6	The way to sustainable solutions: benchmarking	162

9. Measuring sustainability in ecodesign 165

Joseph Fiksel, Battelle Memorial Institute, USA

9.1	State of the art	166
9.1.1	Economic performance evaluation	167
9.1.2	Environmental performance evaluation	167
9.1.3	Societal performance evaluation	168
9.1.4	Sustainability reporting	168
9.2	Sustainability measurement principles	169
9.2.1	Resource and value	169
9.2.2	The 'triple bottom line'	169
9.2.3	Life-cycle consideration	170
9.2.4	Leading and lagging indicators	171
9.3	Sustainability indicator selection process	171
9.3.1	Step 1: consider stakeholder needs	172
9.3.2	Step 2: identify major product aspects	172
9.3.3	Step 3: establish objectives	174
9.3.4	Step 4: select indicators and metrics	174
9.3.5	Step 5: determine targets	176
9.4	Best-practice companies	177
9.4.1	Company profiles	177
9.4.2	Applying the principles	178
9.4.3	Applying the indicator selection process	180
9.5	Integrated product development	184
9.6	The strategic importance of sustainability measurement	186
	Case-study company websites and source material	187

10. What sustainable solutions do small and medium-sized enterprises prefer? 188

Carolien G. van Hemel, Delft University of Technology, Netherlands

10.1	Why do small and medium-sized enterprises need specific support?	189
10.2	Studying design for environment preferences in the innovation centre ecodesign project	189
10.2.1	The innovation centre ecodesign project	189
10.2.2	Participating companies and products involved	190
10.2.3	Classifying the design for environment improvement options	190
10.2.4	Success rate of the design for environment improvement options	191
10.2.5	The newness of the design for environment improvement options	191
10.3	Results: types, success rates and newness of the studied design for environment options	193
10.3.1	The most frequently suggested design for environment principles	193
10.3.2	The most successful design for environment principles	195
10.3.3	Comparison with other studies	195

10.3.4	<i>Successful but less frequently suggested design for environment principles</i>	198
10.3.5	<i>Newness or additional value of the design for environment options</i>	199
10.4	<i>Conclusions and recommendations</i>	200
11.	Sustainable product development: a strategy for developing countries	203
	<i>Diego Masera, EU Micro-Enterprises Support Programme and Ecodesign Consultant</i>	
11.1	A sustainable product development strategy	204
11.1.1	<i>Assessment phase</i>	204
11.1.2	<i>Implementation phase</i>	205
11.2	<i>Case study: furniture production in the Purépecha region of Mexico</i>	214
11.3	<i>Conclusions</i>	217
12.	Managing ecodesign	220
	<i>Martin Charter, The Centre for Sustainable Design, UK</i>	
12.1	<i>Where are we now?</i>	221
12.2	<i>The organisational context of ecodesign</i>	222
12.3	<i>Organisational integration of ecodesign</i>	224
12.3.1	<i>Ecodesign: seven-stage model</i>	224
12.3.2	<i>Ecodesign managers and ecodesigners</i>	227
12.4	<i>Eco-product development</i>	229
12.4.1	<i>Conceptualisation</i>	229
12.4.2	<i>Evaluation</i>	230
12.4.3	<i>Refining concepts</i>	231
12.4.4	<i>Prototype, test marketing and manufacturing</i>	231
12.4.5	<i>Market launch</i>	231
12.5	<i>Implementation of ecodesign</i>	232
12.5.1	<i>Hewlett-Packard</i>	233
12.5.2	<i>IBM</i>	235
12.5.3	<i>Kodak</i>	237
12.5.4	<i>Electrolux</i>	238
12.5.5	<i>Body Shop International</i>	240
12.6	<i>Conclusions</i>	242
13.	Towards a model for product-oriented environmental management systems	243
	<i>Han Brezet, Delft University of Technology, Netherlands, and Cristina Rocha, National Institute of Engineering and Industrial Technology, Portugal</i>	
13.1	<i>Introduction</i>	243
13.1.1	<i>From cure to prevention</i>	244
13.1.2	<i>From processes to products</i>	244
13.1.3	<i>From reactive to proactive and from command and control to self-regulation</i>	245
13.1.4	<i>From technological to managerial</i>	245
13.2	<i>Environment-oriented innovation and ecodesign</i>	246
13.3	<i>Why use product-oriented environmental management systems?</i>	248
13.4	<i>Case study of a truck manufacturer</i>	251
13.4.1	<i>Introduction</i>	251
13.4.2	<i>The product development process and ecodesign</i>	252
13.4.3	<i>Towards a model of product-oriented environmental management systems</i>	254
13.4.4	<i>Consequences of the product-oriented environmental management system at company T</i>	258

13.5 The future of product-oriented environmental management systems	259
13.5.1 <i>Conclusions from the experience at company T</i>	259
13.5.2 <i>Other case studies</i>	260
13.6 Conclusions	261
14. Tools for ecodesign and sustainable product design	263
<i>Ursula Tischner, econcept, Germany</i>	
14.1 Key aspects of sustainable design	265
14.2 The product development and design process	266
14.3 Tools for sustainable design and ecodesign	269
14.3.1 <i>Analysis of environmental strengths and weaknesses</i>	270
14.3.2 <i>Priority setting and selection of the most important potential improvements</i>	271
14.3.3 <i>Implementation: provision of assistance for idea generation, design and draft specification</i>	272
14.3.4 <i>Co-ordination with other important criteria: cost-benefit analysis and economic feasibility studies</i>	273
14.4 Example of a development process using ecodesign tools	275
14.4.1 <i>Definition of goal and scope</i>	275
14.4.2 <i>Developing first ideas</i>	275
14.4.3 <i>Research and compilation of environmental data sheets</i>	276
14.4.4 <i>Developing a detailed design</i>	277
14.4.5 <i>Final evaluation</i>	277
14.4.6 <i>Realisation and market launch</i>	277
14.5 Conclusions	280
15. Green marketing	282
<i>Michael Jay Polonsky, University of Newcastle, Australia</i>	
15.1 Why green marketing?	283
15.2 Levels of green marketing	286
15.3 Green marketing strategies and tactics	287
15.3.1 <i>Targeting</i>	287
15.3.2 <i>Green pricing</i>	289
15.3.3 <i>Green design and product development</i>	290
15.3.4 <i>Green positioning</i>	291
15.3.5 <i>The greening of logistics</i>	292
15.3.6 <i>The marketing of waste</i>	294
15.3.7 <i>The greening of promotion</i>	295
15.3.8 <i>Green alliances</i>	297
15.4 Implications for green marketing	298
15.5 Conclusions	300

PART 3: Case studies

16. Maximising environmental quality through EcoReDesign™	304
<i>John Gertsakis, RMIT University, Australia</i>	
16.1 EcoReDesign™ case study: an ecologically advanced dishwasher	310
16.1.1 <i>Background, drivers and key players</i>	310
16.1.2 <i>The partnership and the EcoReDesign™ process</i>	310
16.1.3 <i>Difficulties in hindsight</i>	314
16.1.4 <i>Beyond the EcoReDesign™ Dishlex demonstration project</i>	315
16.2 Conclusions	315

17. Telework and the triple bottom line	317
<i>Braden R. Allenby, AT&T and Columbia University, USA, and Deanna Richards, private consultant, USA</i>	
17.1 Telework: an overview	319
17.2 Telework and the 'triple bottom line'	321
17.2.1 <i>Economic factors</i>	321
17.2.2 <i>Environmental factors</i>	322
17.2.3 <i>Social factors</i>	323
17.3 Impediments to telework	324
17.4 Conclusions	325
18. The unpredictable process of implementing eco-efficiency strategies	326
<i>Jacqueline Cramer, Cramer Environmental Consultancy and Erasmus University, Netherlands, and Ab Stevels, Technical University of Delft and Philips Consumer Electronics, Netherlands</i>	
18.1 The promise and potential of eco-efficiency	326
18.2 Strategic environmental product planning within Philips Consumer Electronics	328
18.3 Catalysts for eco-efficiency improvements at the start of the brainstorming sessions	330
18.4 Eco-efficiency brainstorming sessions and their impact on product development	333
18.4.1 <i>The monitors business group</i>	333
18.4.2 <i>The audio business group</i>	335
18.4.3 <i>The television business group</i>	337
18.5 Conclusions	338
19. Environmental technologies and their business drivers	340
<i>Andrew Baynes, Christian Ridder and Lutz-Günther Scheidt, Sony International (Europe) GmbH</i>	
19.1 Implementing environmental technologies at Sony	340
19.1.1 <i>Technologies to reduce the consumption of material and energy resources during the production process</i>	341
19.1.2 <i>Technologies to reduce hazardous emissions from production or products</i>	342
19.1.3 <i>Technologies that reduce energy and material use during the use phase of the product</i>	343
19.1.4 <i>Technologies and services that contribute to product lifetime extension</i>	345
19.1.5 <i>Technologies and services that contribute to the re-use of components and the recycling of components and materials</i>	346
19.1.6 <i>Technologies that fulfil the same needs with radically new, less harmful solutions</i>	346
19.2 Conclusions and comments	347
20. 'Awareness': sustainability by industrial design	349
<i>Philip Thompson, Electrolux Industrial Design Centre, UK, and Chris Sherwin, Cranfield University, UK</i>	
20.1 Background	349
20.1.1 <i>Ecodesign at Electrolux</i>	349
20.1.2 <i>Sustainability by industrial design</i>	350
20.1.3 <i>Ecodesign and industrial design</i>	350

20.2	The collaborative process	350
20.2.1	<i>The design project</i>	351
20.2.2	<i>Aims and responsibilities</i>	351
20.3	Workshop process	352
20.3.1	<i>Workshop tools and methods</i>	352
20.3.2	<i>The design brief: a partnership of awareness</i>	353
20.4	The design process	353
20.4.1	<i>Approach</i>	354
20.5	The product concepts	357
20.5.1	<i>The smart sink</i>	357
20.5.2	<i>The datawall</i>	358
20.5.3	<i>The cooker</i>	358
20.5.4	<i>The chest freezer</i>	359
20.5.5	<i>Light plants</i>	359
20.5.6	<i>Passive coolers</i>	360
20.5.7	<i>The portion projector</i>	360
20.5.8	<i>The kitchen ecosystem</i>	361
20.6	Conclusions	361
20.7	Discussion and implications	363
21.	Sustainable product design and resource management at the Kambium Furniture Workshop	364
	<i>Holger Rohn, Trifolium—Sustainable Management Consulting, Germany, and Angelika von Proff-Kessler, Kambium Furniture Workshop Inc., Germany</i>	
21.1	Ecodesign and resource management	367
21.2	Ecodesign at the Kambium Furniture Workshop	368
21.3	Results and conclusions	369
22.	Manufactum: sustainability as an elementary part of the marketing concept	372
	<i>Uli Burchardt, Manufactum Hoof & Partner KG, Germany</i>	
22.1	Can an economic enterprise be sustainable?	373
22.2	Examples of sustainability aspects within the Manufactum concept	374
22.3	Benefits for manufacturers	375
22.4	Alternative avenues: developing Manufactum's own products	375
22.5	Limits to growth	376
22.6	Manufactum: the beginning of the wind of change?	379
22.7	Conclusions	379
23.	Hess Natur: acting for the world of tomorrow. Resource management in the textile chain	381
	<i>Katharina Paulitsch, Hess-Natur-Textilien GmbH, Germany</i>	
23.1	Successful in the eco-niche	381
23.2	Milestones on the way to sustainable solutions in textiles	383
23.2.1	<i>Certified organic cotton for a cleaner environment</i>	383
23.2.2	<i>Declaration for transparency</i>	384
23.2.3	<i>Long-life products as a sustainability strategy</i>	384
23.2.4	<i>Factor 4 Plus: resource management in the textile chain</i>	386
23.2.5	<i>Offering a service instead of mass-producing goods</i>	389
23.3	Conclusions	392

24. The development of Climatex® Lifecycle™: a compostable, environmentally sound upholstery fabric	393
<i>Albin Kälin, Rohner Textil AG, Switzerland</i>	
24.1 Design vision	395
24.1.1 Product redesign for nature	395
24.2 The marketing and communication system	398
24.2.1 The US market concept	398
24.2.2 European market concept	398
24.3 The path towards a sustainable company	400
24.4 Conclusions	401
25. Slow consumption for sustainable jobs: the example of hand-crafted shoes	402
<i>Christine Ax, Institut für Produktdauerforschung, Germany</i>	
25.1 Custom-made shoes: a product-oriented ecological evaluation	404
25.2 Custom-made shoes: preserving resources in the workplace	406
25.3 The shoemakers' trade: future challenges	406
25.4 Shoemakers using new technologies go on market	407
25.5 Slow consumption for growthless jobs	408
25.6 Summary and conclusions	408
26. Micro enterprises, lay design and sustainable innovation	410
<i>Luiz E.C. Guimarães, Universidade Federal da Paraíba, Brazil, and Fred Steward, Aston Business School, UK</i>	
26.1 The role of sustainable product development in micro and small firms in less industrialised countries	411
26.2 The 'ecobroom'	412
26.3 Implications	415
26.4 Conclusions and recommendations	416
27. Carving in Kenya	418
<i>Diego Masera, EU Micro-Enterprises Support Programme and Ecodesign Consultant</i>	
27.1 Carving out a future	421
27.2 Sustainable product development implementation	423
27.3 Some initial results	423
27.4 Conclusions	425
Useful websites	426
