

Biomass to Renewable Energy Processes

Edited by Jay Cheng

CRC Press
Taylor & Francis Group

Contents

Preface.....	vii
Editor.....	ix
Contributors.....	xi
1. Introduction	1
<i>Jay J. Cheng</i>	
2. Biomass Chemistry	7
<i>Deepak R. Keshwani</i>	
3. Biomass Resources	41
<i>Ziyu Wang and Deepak R. Keshwani</i>	
4. Biomass Logistics	71
<i>Matthew W. Veal</i>	
5. Kinetics and Microbiology of Biological Processes	135
<i>Jay J. Cheng</i>	
6. Anaerobic Digestion for Biogas Production	151
<i>Jay J. Cheng</i>	
7. Biological Process for Ethanol Production	209
<i>Jay J. Cheng</i>	
8. Biological Process for Butanol Production	271
<i>Jian-Hang Zhu and Fangxiao Yang</i>	
9. Chemical Conversion Process for Biodiesel Production	337
<i>Dong-Zhi Wei, Fangxiao Yang, and Erzheng Su</i>	
10. Thermochemical Conversion of Biomass to Power and Fuels.....	437
<i>Hasan Jameel, Deepak R. Keshwani, Seth F. Carter, and Trevor H. Treasure</i>	
Index	491
