

ADHESIVE TECHNOLOGY

AND FORMULATIONS HAND BOOK
(HAND BOOK OF ADHESIVES)

Contents Cum-Subject Index

Chapter - 1		– Thermosetting Adhesives 16
INTRODUCTION 1-5		– Rubber Resin Blends 16
– Why adhesive Bonding 1		Chapter - 4
– Advantages and Disadvantages of Adhesive Bonding 2		EMULSION AND DISPERSION ADHESIVES 20-23
– Advantages 2		– Type of Emulsion Adhesives 20
– Disadvantages 3		– Setting Mechanism 21
– Ideal Adhesive 3		– Methods of Application 21
– Application area for Adhesive Bonding 4		– Advantages and Limitations 22
Chapter - 2		– Engineering Advantages 22
HISTORICAL DEVELOPMENT OF ADHESIVES AND ADHESIVE BONDING 6-13		– Engineering Design with Adhesive 23
– Introduction 6		Chapter - 5
– Early History of Adhesives and Sealants 6		TESTING OF ADHESIVES 24-58
– Modern Adhesives and Sealants 9		– Introduction 24
Chapter - 3		– Standard Tests 24
TYPES OF ADHESIVES 14-19		– Some Selected Standards 26
– Physical Classification 14		– A Test for Adhesive Joint Strength 27
– Chemical Classification 15		– Tensile Tests 27
– Thermoplastic Adhesives 15		

- Shear Tests	30
- Peel Tests	36
- Environmental and Related Considerations	38
- Fracture Mechanics Techniques	47

Chapter - 6

PROTEIN ADHESIVES FOR WOOD 59-87

- Introduction	59
- Soybean Adhesives	61
- Raw Material Source and Preparation	61
- Formulation	62
- Mixing, Application, and Pressing	65
- Blended Formulations	68
- Soybean-Blood Glues	68
- Soybean-Casein Glues	71
- Blood Glues	72
- Raw Material Source and Preparation	72
- Formulation	74
- Mixing, Application, and Pressing	78
- Casein Glues	79
- Raw Material Sources and Preparation	79
- Formulation	80
- Mixing, Application, and Pressing	84
- Other Proteins	86

Chapter - 7

HOT MELT ADHESIVES 88-89

- Introduction	88
- Composition	88
- Advantage of Melt Adhesives	88
- Limitations of Melt Adhesives	89
- Application Methods	89
- Use of Melt Adhesives	89

Chapter - 8

ANIMAL GLUES AND ADHESIVES 90-112

- Introduction	90
- Chemical Composition	91
- Types of Animal Glue	93
- Manufacture of Animal Glue	94
- Properties of Animal Glues	95
- Grades And Testing	97
- Preparation of Animal Glues	98
- Flexible and Nonwarp Glues	99
- Liquid Animal Glues	100
- Glue Application	100
- End Uses	102
- Bookbinding	102
- Paper	104
- Paper Converting	105
- Abrasives	106

-- Woodworking	107
-- Matches	108
-- Ore and Metal Refining	109
-- Gummed Tape	109
-- Miscellaneous Applications	110
-- Textiles	110
-- Rubber Compounding	110
-- Luggage and Case Covering	110
-- Gaskets	111
-- Glass Chipping	111
-- Other Applications	111

Chapter - 9

POLYVINYL ACETATE/ ALCOHOL BASED ADHESIVES113-119

-- Polyvinyl Acetate Adhesives	113
-- Properties	114
-- Applications	114
-- Formulations	115
-- Fevicol-Type Adhesive	115
-- Polyvinyl (Alcohol)	117
-- Properties	118
-- Applications	118
-- Formulations	119

Chapter - 10

ETHYLENE-VINYL ACETATE COPOLYMERS 120-121

-- Properties	121
---------------------	-----

Chapter - 11

POLYVINYL ACETAL ADHESIVES122-128

-- Properties	122
-- Uses	122
-- Plasticizers and Solvents	122
-- Polyvinyl Butyral Adhesives	123
-- Phenolic-Vinyl Butyral Adhesives	123
-- Formulations	124
-- Laminated Safety Glass	127
-- Polyvinyl Formal Adhesives	127
-- Polyvinyl Formal Phenolic Adhesives	127
-- Formulation	128

Chapter - 12

SILICONE ADHESIVES129-132

-- Silicone Resins	129
-- Silicone Rubbers	130
-- Epoxy Silicones	131

Chapter - 13

EPOXIDE ADHESIVES133-136

-- A Mine Hardeners	134
---------------------------	-----

- Acid-Anhydride Hardeners 135
- Other Hardeners 135

Chapter - 14

POLYESTER ADHESIVES137-139

- Unsaturated Polyester Adhesives 137
- Properties 138
- Applications 138

Chapter - 15

FURANE ADHESIVES140-141

- Properties 140
- Applications 140

Chapter - 16

PHENOLIC RESIN ADHESIVES142-147

- Phenol-Formaldehyde Resin Adhesives 142
- Properties 142
- Applications 143
- Dry Glue Film 143
- Phenolic Baking Cement 144
- Phenolic Resin Putty 144
- Phenolic Resin Rubber Cement 144

- Resorcinol Formaldehyde Adhesives 145
- Properties 146
- Applications 147

Chapter - 17

CELLULOSE DERIVATIVE ADHESIVES148-153

- Cellulose Ester Adhesives 149
- Cellulose Nitrate Adhesives 149
- Applications 150
- Cellulose Caprate Adhesives 150
- Cellulose Acetate-Butyrate Adhesives 150
- Cellulose Ether Adhesives 151
- Methyl Cellulose Adhesives 151
- Ethyl Cellulose Adhesive 151
- Other Cellulose Ether Adhesives 152
- Fabric Lining Composition 153

Chapter - 18

EPOXY POLYURETHANE ADHESIVES154-155

- Epoxy-Phenolic Adhesives 154

- One Component Adhesives 154
- High Temperature Adhesives 155

Chapter - 19
**POLYISOCYANATE/
POLYURETHANE
ADHESIVE 156-159**

- Effectiveness of Polyisocyanate Adhesives 156
- Isocyanate Adhesives 157
- Isocyanate-modified Adhesives 157
- Polyurethane Adhesives 158

Chapter - 20
**AMINO (UREA &
MELAMINE)
FORMALDEHYDE
ADHESIVES 160-163**

- Urea-Formaldehyde Adhesives 160
- Properties 160
- Applications 161
- Melamine Formaldehyde Adhesives 161
- Properties 162
- Applications 162

Chapter - 21
**PAPER, BOARD &
PACKAGING
ADHESIVES 164-177**

- Selection of Adhesives 164
- Laminated Papers 166
- Corrugated Board 168
- Book Binding Adhesives 169
- Paper Impregnate 171
- Paper Bag and Cartons 172
- Multiwall Bag seam Past-Water Resistant 173
- Carton Sealing 173
- Envelopes 174
- Self-Sealing Envelopes-Adhesives 175
- Stamps 176
- Labels 176

Chapter - 22
**REMOISTENABLE
ADHESIVES 178-182**

- Formulation 178
- Stamps 179
- Labels 179
- Decalcomnials 180
- Tapes 181

Chapter - 23	Chapter - 26
GUM ARABIC ETC. ADHESIVES183-184	DISPENSING OF ADHESIVES 193-197
Chapter - 24	– Basic Dispensing Principles 193
FOOTWEAR APPLICATIONS OF ADHESIVES185-189	– Pressure Time Controlled System 194
– Adhesives for Sole Attaching 186	– Static Pinch Valve 194
– Process Requirements 186	– Pressure Time Using Advancing Valve 195
– Development of Adhesive and Primers 187	– Pressure Time Using a Rotospray Unit 195
– Solvent Hazards 187	– Cartridge/Syringe Dispensers 195
– Adhesive for Ancillary Operations 188	– Screen Printing of Adhesives 196
– Topline Folding 188	Chapter - 27
– Linings 188	NATURAL RUBBER- BASED ADHESIVES198-202
– Toe Puff and Heel Stiffener 189	– Introduction 198
– Lasting 189	– Latex Adhesives 198
– Shank 189	– Solution Adhesives 200
– Heel Covering 189	– Pressure-Sensitive Adhesive Tapes 201
Chapter - 25	Chapter - 28
HIGH-TEMPERATURE ADHESIVES 190-192	POLYSULFIED SEALANTS AND ADHESIVES 203-214
– Introduction 190	– Introduction 203
– Traditional Adhesives Systems 191	– Chemistry of Polysulfide Polymers 204
– Recent Development 192	

- Preparation of Conventional Polysulfide Polymers	204
- Modified Polysulfide	205
- Other Mercaptan-Terminated Polymers	206
- Polythioether Polymers	206
- Properties of Polysulfide Polymers	207
- Compounding, Processing, and Manufacture of Polysulfide Sealants	208
- Polysulfide Sealant Characterization and Testing	211
- Polysulfide/Epoxy Adhesives	212
- Adhesion Considerations	213

Chapter - 29

PHENOLIC RESIN ADHESIVES 215-239

- Introduction	215
- Chemistry	216
- Acid Catalysis	219
- Alkaline Catalysis	220
- Metallic Ion Catalysis and Reaction Orientation	221

- Chemistry and Technology of Application of Phenolic Resin Adhesives for Wood	223
- General Principles of Manufacture	223
- Curing Acceleration Under Alkaline Conditions	225
- Physical Properties of Phenol-Formaldehyde Resins	226
- Applications	228
- PF Wood Binders	228
- Properties of Phenolic Adhesives for Plywood	229
- Additives	231
- Formulation of Plywood Glue Mixes	233
- General Observations on Particleboard Manufacture	234
- Dry-Out Resistance	236
- Foundry Sand Binders and Mineral Fiber Binders	237
- Binders from PF Copolymers with Other Resins	237

Chapter - 30

UREA-FORMALDEHYDE ADHESIVES 240-256

- Introduction	240
----------------------	-----

- Chemistry of UF Resins:
Urea-Formaldehyde
Condensation 241
- General Principles of
Manufacture and
Application 244
- Plywood Adhesives 248
- Particleboard
Adhesives 250
- UF Adhesives for Low-
Formaldehyde-Emission
Particleboard 251
- Other UF Adhesives
Applications 254
- Analysis 255
- Formulation 255

Chapter - 31

MELAMINE- FORMALDEHYDE ADHESIVES 257-270

- Introduction 257
- Uses for MF Resins 257
- Chemistry 258
- Condensation
Reactions 258
- Mechanisms and
Kinetics 261
- Mixed Melamine
Resins 263
- Resin Preparation
Glue Mixing And
Hardening 264
- Chemical and Physical
Analysis 268
- Formulations 270

Chapter - 32

POLYURETHANE ADHESIVES 271-301

- Introduction 271
- Applications Overview 274
- Basic Urethane
Chemistry 275
- Branching Reactions 277
- Catalysts 279
- Urethane Polymer
Morphology 281
- Prepolymer
Formation 283
- Adhesive Raw
Materials 284
- Isocyanates for
Adhesive
Applications 288
- Toxicology 293
- Fillers and Additives 294
- Surface Preparation
and Primers 294
- Common Adhesive
Types 295
- One-Component
Adhesives 295
- Two-Component
Adhesives 297
- Recent
Developments 299
- Hybrid Adhesives 299
- Reactive Hot Melts 300
- Pressure-Sensitive
Adhesives 301

Chapter - 33**UNSATURATED
POLYESTER
ADHESIVES****302-310**

- Introduction 302
- Synthesis 302
- Reaction Between
Dicarboxylic Acids or
Anhydrides and Diols 302
- Kinetics and
Mechanisms 303
- Side Reactions 305
- Catalysts 306
- Resin Reactivity 306
- Cross-Linking
Mechanism 307
- Structure-Properties
Relationships 308
- Glass-Fiber
Lamination 309

Chapter - 34**REACTIVE ACRYLIC
ADHESIVES****311-318**

- Introduction 311
- Chemical Reactions
in Acrylic Adhesives 311
- Handling of Acrylic
Adhesives: Do's and
Don'ts With Acrylics 314
- Bond Strengths
Available With Acrylic
Adhesives 315
- Typical Formulations 317
- HP Acrylic Adhesive 317

- Typical Formulation 317
- Heat-Resistant Epoxy
Acrylic Hybrid 317
- U.S Patents 318
- Substrates 318

Chapter - 35**TECHNOLOGY OF
CYANOACRYLATE
ADHESIVES FOR
INDUSTRIAL
ASSEMBLY****319-332**

- Introduction 319
- Chemistry of
The System 319
- Hot Strength 325
- Speed of Cure 327
- Activators 329
- Improved Commercial
Cyanoacrylate
Compounds 327
- New Flexible
Cyanoacrylates 327
- New Cure-Through-
Gap Cyanoacrylates 328
- New Ultrafast-Cure
Surface-Insensitive
Cyanoacrylates 328
- New Low-Odor
Cyanoacrylates 329
- Significant Cyanoacrylate
Characteristics 329
- Polypropylene and Poly-
ethylene Bonding 329
- Medical-Grade
Materials 329
- Thermal Conductivity 329

- Durability 329
- Chlorosis 330

Chapter - 36

SILICONE ADHESIVES AND SEALANTS 333-344

- Introduction 333
- Cure Chemistry 336
- Processing
 Consideration 339
- Property
 Determinations 339
- Basic Formulations 342
- High-Modulus
 Oxime Sealant 342
- Medium Modulus
 Oxime Sealant 343
- Substrate Bonding 343

Chapter - 37

EPOXY RESIN ADHESIVES 345-365

- Introduction 345
- Chemistry of
 Epoxy Resins 346
- Properties of
 Epoxyes 349
- Resins 349
- Hardeners 349
- Mixed Product 350
- Formulating Epoxy
 Adhesives 351
- Resins 351
- Curing Agents 352
- Reactive Diluents 355

- Plasticizers 355
- Fillers 356
- Solvents 357
- Additives 358
- Elastomers 358
- Applications 359
- Building and
 Construction 359
- Metal Bonding 360
- Road Making 361
- Wood Bonding 361
- Engineering
 Applications 361
- Electrical
 Applications 362
- Film Adhesives 362
- Miscellaneous
 Applications 362
- Guide Formulations 363
- Water-Based
 Epoxy Primer 364
- Epoxy Adhesive for
 Bonding New Concrete
 to Old 364
- Metal-to-Metal
 Adhesives 364
- Grouting Adhesive 365
- Cable Jointing
 Epoxy 365
- Film Adhesives for
 Preimpregnation 365
- Fast-Setting Retail
 Epoxy Liquid 365

Chapter - 38**PRESSURE-SENSITIVE
ADHESIVES366-387**

- Introduction 366
- Product Types 367
- Solvent-Based Adhesives 368
- Hot-Melt Adhesives 368
- Water-Based Adhesives 370
- Formulating 371
- Applications 376
- Tapes 376
- Labels 379
- Other Applications 380
- Coating Methods 381
- Testing 382
- Tack 382
- Peel 383
- Shear Strength 383
- Guide Formulations 384
- Solvent-Based Adhesives 385
- Hot-Melt Adhesives 386
- Water-Based Adhesives 386

Chapter - 39**ADHESIVES IN THE
AUTOMOTIVE
INDUSTRY 388-408**

- Introduction 388

- Adhesive Applications in The Automotive Industry 388
- Adhesives for Mechanical Applications 390
- Adhesive Applications in the Body Shop 393
- Adhesives and Sealants in the Paint Shop 399
- Adhesive and Sealant Applications in the Assembly Shop 399
- Adhesive Applications in Component Manufacturing 401
- Some Considerations Regarding Trends in Automotive Adhesive Bonding 406

Chapter - 40**ADHESIVE BASED ON
VINYL ACETATE 409-410**

- Plant & Machinery 409
- Fixed Capital 409
- Raw Materials 410
- Total Working Capital/Month 410
- Total Capital Investment 410
- Turn Over/Annum 410

Chapter - 41**PRINTING GUMS
(GUAR GUM
BASED) 411-412**

- Plant & Machinery 411

- Fixed Capital	411
- Raw Materials	412
- Total Working Capital/Annum	412
- Total Capital Investment	412
- Turn Over/Annum	412

Chapter - 42
**LEATHER BASED
ADHESIVE 413-414**

- Plant & Machinery	413
- Fixed Capital	413
- Raw Materials	413
- Total Working Capital/Annum	414
- Total Capital Investment	414
- Turn Over/Annum	414

Chapter - 43
**LATEX RUBBER
BASED ADHESIVE 415-417**

- Plant & Machinery	415
- Fixed Capital	416
- Raw Materials	416
- Total Working Capital/Annum	416
- Total Capital Investment	416
- Turn Over/Annum	417

Chapter - 44
OFFICE PASTE 418-419

- Plant & Machinery	418
- Fixed Capital	418
- Raw Materials	419
- Total Working Capital/Month	419
- Total Capital Investment	419
- Turn Over/Annum	419

Chapter - 45
**STARCH AND
DEXTRIN BASED
ADHESIVE 420-421**

- Plant & Machinery	420
- Fixed Capital	420
- Raw Materials	421
- Total Working Capital/Month	421
- Total Capital Investment	421
- Turn Over/Annum	421

Chapter - 46
**ADHESIVE FOR
CORRUGATION DRY
POWDER AND
PASTE 422-423**

- Plant & Machinery	422
- Fixed Capital	422
- Raw Materials	423

- Total Working Capital/Month 423
- Total Capital Investment 423
- Turn Over/Annum 423

Chapter - 47**ADHESIVE (DIFFERENT TYPE) 424-425**

- Plant & Machinery 424
- Fixed Capital 424
- Raw Materials 425
- Total Working Capital/Month 425
- Total Capital Investment 425
- Turn Over/Annum 425

Chapter - 48**ADHESIVE INDUSTRIES (LAMINATED, FEVICOL, STICKER DDL AND OTHER TYPES OF ADHESIVE) 426-428**

- Plant & Machinery 426
- Fixed Capital 427
- Raw Materials 427
- Total Working Capital/Month 427
- Total Capital Investment 428
- Turn Over/Annum 428

Chapter - 49**RUBBER ADHESIVE 429-430**

- Plant & Machinery 429
- Fixed Capital 429
- Raw Materials 430
- Total Working Capital/Month 430
- Total Capital Investment 430
- Turn Over/Annum 430

Chapter - 50**ADHESIVE (POLYVINYL BUTYRAL BASED) 431-432**

- Plant & Machinery 431
- Fixed Capital 431
- Raw Materials 432
- Total Working Capital/Month 432
- Total Capital Investment 432
- Turn Over/Annum 432

Chapter - 51**SELF ADHESIVE LABELS 433-434**

- Plant & Machinery 433
- Fixed Capital 433
- Raw Materials 434
- Total Working Capital/Month 434
- Total Capital Investment 434
- Turn Over/Annum 434

Chapter - 52		– Raw Materials 440
ESTER GUMS (FOOD GRADE) 435-436		– Total Working Capital/Month 441
– Plant & Machinery 435		– Total Capital Investment 441
– Fixed Capital 435		– Turn Over/Annum 441
– Raw Materials 436		Chapter - 55
– Total Working Capital/Month 436		SUPPLIERS OF PLANT AND MACHINERIES 442-452
– Total Capital Investment 436		– Adhesive Tape Machinery 442
– Turn Over/Annum 436		– Chemical Plant Machinery 443
Chapter - 53		– Storage Tanks 444
VULCANIZING RUBBER SOLUTION/CEMENT FOR AUTOMOBILE TYRES 437-439		– Boilers : Industrial 446
– Plant & Machinery 437		– Evaporators 447
– Fixed Capital 437		– Stirrers : Chemical 448
– Raw Materials 438		– Adhesive Applying Machinery 448
– Total Working Capital/Month 438		– Adhesion Tester 449
– Total Capital Investment 438		– Adhesive Mixer 449
– Turn Over/Annum 439		– Adhesives Dispensers 450
Chapter - 54		– Adhesive Pumps 450
INDUSTRIAL ADHESIVE BASED ON STARCH GUM, DEXTRINE SILICATE 440-441		– Gumming Machinery 451
– Plant & Machinery 440		– Coating Machinery 451
– Fixed Capital 440		– Label Printing Applying Machinery 452
		Chapter - 56
		SUPPLIERS OF RAW MATERIALS 453-472
		– Sodium Hydroxide 453

- Borax	453	- Butyl Acetate	465
- Urea-Formaldehyde Resins	454	- Nitrile Rubber	465
- Dextrin	454	- Epoxy Resins	466
- Glycerin	455	- Sulphur Dioxide	466
- Neoprene Rubber	455	- Fumed silica	466
- Toluene	456	- Carbon Black	466
- Methylmethacrylate	456	- Shellac	466
- Zinc Oxide	456	- Titanium Dioxide	466
- Calcium Carbonate	457	- Alumina	466
- Antioxidants	457	- Iron Oxide	466
- Phenolic Resins	458	- Calcium Oxide	467
- Magnesium Oxide	458	- Wax	468
- Hexane	458	- Silica	468
- Fillers Chemical	459	- Stearic Acid	468
- Rosin	459	- Maleic Anhydride	468
- Thickeners	459	- Polybutene Resins	469
- Gelatine	459	- White Oil	469
- Starches	460	- Talc	469
- Casein	460	- Clay	469
- Acrylic Acid	461	- Surfactants	469
- Ethylene Oxide	461	- Bentonite	470
- Plasticisers	462	- Gypsum	470
- Defoaming Agents	462	- Cyclohexanol	470
- Caustic Soda	462	- Aromatic Oil	470
- Pigment Dispersions	463	- Isoprene	471
- Boric Acid	463	- Resorcinol	471
- Formaldehyde	463	- Zinc Dust	471
- Hardeners : Epoxy Resin	464	- Xylenes	471
- Phosphoric Acid	464	- Wood Rosin	471
- Ethyl Acetate	464	- Copper Sulphate	471
- Ammonium Chloride	465	- Hydrated Lime	472
- Sulphur	465	- Zinc Chloride	472
		- Hydrochloric Acid	472
		- Sodium Bicarbonate	472
