|----------------------------------------------------------------------------------------------------------|----|
| <b>INTRODUCTION</b> .....                                                                                | 1  |
| References .....                                                                                         | 3  |
| <hr/>                                                                                                    |    |
| <b>Part I Techniques of Electron Microscopy</b>                                                          |    |
| <hr/>                                                                                                    |    |
| <b>1 OVERVIEW OF TECHNIQUES</b> .....                                                                    | 7  |
| References .....                                                                                         | 14 |
| <b>2 TRANSMISSION ELECTRON MICROSCOPY:</b>                                                               |    |
| <b>FUNDAMENTALS OF METHODS AND INSTRUMENTATION</b> .....                                                 | 15 |
| 2.1 A Brief History .....                                                                                | 15 |
| 2.2 Fundamentals of Electron Optics and Instrumentation .....                                            | 17 |
| 2.2.1 Some Fundamental Properties of Electrons .....                                                     | 17 |
| 2.2.2 Electron Lenses .....                                                                              | 19 |
| 2.2.3 Electron-Optical Aberrations and Resolution .....                                                  | 22 |
| 2.2.4 Vacuum System .....                                                                                | 26 |
| 2.3 The Instrument .....                                                                                 | 27 |
| 2.3.1 Electron Gun .....                                                                                 | 30 |
| 2.3.2 Illumination System .....                                                                          | 33 |
| 2.3.3 Objective Lens and Specimen Stage .....                                                            | 35 |
| 2.3.4 Image-Forming System .....                                                                         | 36 |
| 2.3.5 Viewing Chamber and Image Acquisition .....                                                        | 37 |
| 2.3.6 Alignment and Operation of Transmission Electron<br>Microscopes .....                              | 39 |
| 2.4 Fundamentals of Image Formation .....                                                                | 40 |
| 2.4.1 Scattering Mechanism and Contrast Formation .....                                                  | 41 |
| 2.4.2 Electron Diffraction and Diffraction Contrast .....                                                | 44 |
| 2.4.3 Fundamentals of the Imaging Process .....                                                          | 46 |
| References .....                                                                                         | 50 |
| <b>3 TRANSMISSION ELECTRON MICROSCOPY: CONVENTIONAL<br/>AND SPECIAL INVESTIGATIONS OF POLYMERS</b> ..... | 53 |
| 3.1 Conventional Investigations Utilising Mass-Thickness Contrast .....                                  | 53 |
| 3.2 Electron Diffraction .....                                                                           | 55 |

|          |                                                             |           |
|----------|-------------------------------------------------------------|-----------|
| 3.2.1    | Selected Area Diffraction .....                             | 55        |
| 3.2.2    | Structure Analysis .....                                    | 55        |
| 3.3      | High-Resolution Transmission Electron Microscopy .....      | 57        |
| 3.3.1    | Introduction .....                                          | 57        |
| 3.3.2    | Evaluation and Reduction of Radiation Damage .....          | 57        |
| 3.3.3    | Application of HRTEM .....                                  | 58        |
| 3.4      | Phase Contrast Transmission Electron Microscopy .....       | 60        |
| 3.4.1    | Phase Contrast at Large Defocus Values .....                | 60        |
| 3.4.2    | Phase Contrast by Means of Phase Plates .....               | 60        |
| 3.5      | Electron Holography .....                                   | 62        |
| 3.5.1    | Introduction .....                                          | 62        |
| 3.5.2    | Image Plane Off-Axis Holography .....                       | 62        |
| 3.5.3    | Examples .....                                              | 64        |
| 3.6      | Low-Voltage Transmission Electron Microscopy .....          | 64        |
| 3.6.1    | Introduction .....                                          | 64        |
| 3.6.2    | A Dedicated Low-Voltage TEM and its Application .....       | 64        |
| 3.7      | High-Voltage Transmission Electron Microscopy .....         | 65        |
| 3.7.1    | Introduction .....                                          | 65        |
| 3.7.2    | Advantages and Applications of HVTEM .....                  | 65        |
| 3.8      | Scanning Transmission Electron Microscopy .....             | 66        |
| 3.8.1    | Introduction .....                                          | 66        |
| 3.8.2    | Similarities and Differences between STEM and TEM .....     | 67        |
| 3.8.3    | Application of Bright-Field and Dark-Field Modes .....      | 68        |
| 3.9      | Analytical Transmission Electron Microscopy .....           | 70        |
| 3.9.1    | Introduction .....                                          | 70        |
| 3.9.2    | EELS Investigations .....                                   | 72        |
| 3.9.3    | Electron Spectroscopic Imaging .....                        | 75        |
| 3.10     | Electron Tomography .....                                   | 78        |
| 3.10.1   | Introduction .....                                          | 78        |
| 3.10.2   | Data Acquisition, Image Alignment and Reconstruction .....  | 79        |
| 3.10.3   | Resolution of Reconstructed Data .....                      | 80        |
| 3.10.4   | Application of Electron Tomography .....                    | 81        |
|          | References .....                                            | 81        |
| <b>4</b> | <b>SCANNING ELECTRON MICROSCOPY (SEM) .....</b>             | <b>87</b> |
| 4.1      | A Brief History of SEM .....                                | 87        |
| 4.2      | Fundamentals of Electron Optics and Signal Generation ..... | 88        |
| 4.2.1    | Principle of SEM .....                                      | 88        |
| 4.2.2    | The Lateral Resolution Power of SEM .....                   | 89        |
| 4.2.3    | Comparison of Various Cathode Types .....                   | 92        |
| 4.2.4    | Depth of Focus .....                                        | 92        |
| 4.2.5    | Interaction of Primary Electrons with Sample .....          | 92        |
| 4.3      | The Instrumentation of SEM .....                            | 95        |
| 4.3.1    | The Column .....                                            | 95        |
| 4.3.2    | Specimen Chamber and Goniometer .....                       | 97        |

|       |                                                              |     |
|-------|--------------------------------------------------------------|-----|
| 4.3.3 | Detectors.....                                               | 98  |
| 4.3.4 | Signal Display and Magnification.....                        | 99  |
| 4.4   | Contrast Formation and Charging Effects.....                 | 100 |
| 4.4.1 | Secondary Electron Contrast.....                             | 100 |
| 4.4.2 | Contrast of Backscattered Electrons (Solid State Detector) . | 103 |
| 4.4.3 | Charging Effect.....                                         | 103 |
| 4.5   | X-Ray Microanalysis.....                                     | 105 |
| 4.5.1 | Physical Fundamentals of the Generation of X-Rays.....       | 105 |
| 4.5.2 | X-Ray Microanalysis Techniques.....                          | 107 |
| 4.5.3 | Detector for EDX Analysis.....                               | 108 |
| 4.5.4 | Quantitative EDX Analysis.....                               | 111 |
| 4.5.5 | X-Ray Mapping.....                                           | 112 |
| 4.5.6 | Wavelength Dispersive X-Ray Microanalysis (WDX).....         | 112 |
| 4.6   | Environmental Scanning Electron Microscope (ESEM™).....      | 116 |
| 4.6.1 | Low-Vacuum SEM and ESEM™.....                                | 116 |
| 4.6.2 | Avoiding Charging.....                                       | 116 |
| 4.6.3 | The Wet Mode.....                                            | 117 |
| 4.6.4 | The Gaseous Secondary Electron Detector (GSED).....          | 119 |
|       | References.....                                              | 120 |
| 5     | <b>ATOMIC FORCE MICROSCOPY (AFM)</b> .....                   | 121 |
| 5.1   | Introduction.....                                            | 121 |
| 5.2   | Methodical and Instrumental Fundamentals.....                | 124 |
| 5.3   | Modes of Operation.....                                      | 127 |
| 5.3.1 | Contact Mode.....                                            | 127 |
| 5.3.2 | Force Modulation Mode.....                                   | 130 |
| 5.3.3 | Dynamic Operational Modes.....                               | 131 |
| 5.3.4 | Tapping Mode.....                                            | 132 |
| 5.4   | Typical and Special AFM Applications.....                    | 137 |
|       | References.....                                              | 142 |
| 6     | <b>IN SITU MICROSCOPY</b> .....                              | 145 |
| 6.1   | Overview.....                                                | 145 |
| 6.2   | Micromechanical In Situ Tests.....                           | 147 |
| 6.2.1 | Technical Equipment.....                                     | 147 |
| 6.2.2 | In Situ Microscopy in (E)SEM.....                            | 148 |
| 6.2.3 | In Situ Microscopy in (HV)TEM.....                           | 150 |
| 6.3   | In Situ Microscopy in AFM.....                               | 154 |
|       | References.....                                              | 158 |
| 7     | <b>IMAGE PROCESSING AND IMAGE ANALYSIS</b> .....             | 161 |
| 7.1   | Overview.....                                                | 161 |
| 7.2   | Image Processing.....                                        | 162 |
| 7.3   | Image Analysis.....                                          | 163 |
| 7.4   | Fourier Transformation.....                                  | 165 |

|                                |     |
|--------------------------------|-----|
| 7.5 Stereoscopic Imaging ..... | 167 |
