

A COMPLETE COURSE IN CANNING

And Related Processes
THIRTEENTH EDITION

BOOK II MICROBIOLOGY, PACKAGING, HACCP & INGREDIENTS

TABLE OF CONTENTS

INTRODUCTION	1
CHAPTER 1. MICROBIOLOGY OF CANNED FOODS	11
Basic Considerations on pH Value	11
Influence Of pH On Food Microbiology and Spoilage	12
Effect of Temperature on Growth Of Microorgansims	14
pH And Growth of Closridium Botulinum	14
Acidity Classification of canned Foods	14
Botulism	15
Methods of Commercial Control of Botulism	16
Botulism Outbreaks	17
Spoilage of Canned Foods	20
Low-Acid Canned Foods	20
Acid Foods	20
Types of Spoilage of Canned Foods	23
Swells	23
Pinholing	24
Flat Sours	24
Stack Burning	25
Food Discoloration	25
Black Stains	26
Glass-Like Deposits in Canned Foods	26
Off Flavors.....	26
Spoilage By Recontamination	27
Precautions For Handling Filled and Sealed Containers	27
General Sources and Control Of Spoilage Due To Contamination	28
Specific Sources of Spoilage Due To Contamination	31
Corn.....	31
Peas, Beans, etc.	31
Pumpkin	32
Spinach	32
Sources of Contamination Of Vegetables In General	34
Microbiological Standards For Ingredients.....	35
Standards for Sugars and Syrups	36

CHAPTER 2. HEAT PENETRATION DETERMINATIONS

AND THERMAL PROCESS CALCULATIONS	40
pH Classification of Canned Foods	40
High-Temperature Short-Time Processing	42
Thermal Death Time	45
Heat Penetration Determinations	51
Equipment	51
Procedure for Making a Heat Penetration (HP) Test	56
Equipment Check	56
Making the Heat Penetration Test	57
Plotting Heat Penetration Curve	59
Process Calculations	62
Methods of Analyzing Data	62
Standards	62
The Graphical or General Method	63
The Formula Method	71
Simple Heating Curve	71
Broken Heating Curve	93
Summary	93
HTST Process Calculation	97
Symbols Used	98
Computerized Data Acquisition and Evaluation of Thermally Processed Foods	98

CHAPTER 3. METAL CONTAINERS FOR CANNED FOODS 105

Tin Plate Cans	105
Three-Piece Cans	105
Types of Steel Plate	106
Soldered side seam	106
Cemented side seam	108
Welded side seam	108
Two-Piece Cans	110
Draw and redraw	110
Drawn and ironed	111
Tin Free Steel (TFS)	112
Recommended Can Sizes	112
Truck Trailer Shipping of Empty Cans	114
Carload Shipping of Empty Cans	123
Can Corrosion	124
Fundamental Electrochemical Basis of Can Corrosion	125
Internal Corrosion	126

METAL CONTAINERS FOR CANNED FOODS – Continued

Factors Influencing Internal Corrosion	127
External Corrosion	127
Corrosion Attributable To Canning Practices	127
Fill and Vacuum	127
Thermal Exhausting	128
Code Marking	128
Faulty Closures	128
Washing the Sealed Can	129
Open Water Bath Operation	129
Steam Retort Operation	130
Contact with Rusty Iron	131
Contact with Alkaline Water	131
Improper Cooling	131
Corrosive Water Supplies	132
Scratches and Abrasions	132
Corrosion Attributable To Storage Conditions	133
High Storage Temperature	133
Sweating	133
Other Causes of Rusting	134
Can Enamels (Linings, Coatings)	134
Types of Enamels	135
Application of Enamels	136
Desired Qualities of Enamels	136
Trends	136
Evaluation of Enamels	137
Can Seam Inspection	138
Visual Examination of Double Seams	141
Tear-Down Examination of Can Seams	144
Essential and Optional Seam Measurements	144
Tearing Down The Double Seam For Inspection	145
Adequacy of Double Seams and Recognition of Defects	155
Miscellaneous Information On Cans	158
The Half-Size Steam Table Tray	161
Thermal Processing	162
Vacuum Determination	164
Double Seam Evaluation	164
Aluminum Cans	165
Plant Handling of Aluminum Cans	166
Corrosion Resistance	168
Liquid Nitrogen Injector System	169

METAL CONTAINERS FOR CANNED FOODS – Continued

Fruit and Vegetable Canning	169
Meats and Seafoods	170
Carbonated Beverages and Beer	170
Non-Carbonated Beverages	170
Collapsible Tubes	170
Flexible Packages and Semi-Rigid Containers	172
Shipping Cases	172
Casing	172

CHAPTER 4. GLASS AND PLASTIC CONTAINERS 173

Glass Containers	173
Vacuum Closures—General Characteristics	174
Factors Affecting Vacuum Formation	174
Method of Cold Water Vacuum Check	175
Vacuum Closure Application for Glass Containers	175
Auxiliary Equipment	175
Headspace	175
Cocked-Cap Detector and Ejectors	175
Dud Detectors	176
Closures for Glass Containers—Applications	176
Vacuum Sealing	176
Shipping Containers and Casing	187
Commercial Packaging Of Food Products In Plastic Containers	187
Consumer Acceptance	188
Container Design/Structure	189
Shelf Life Requirements/Product Compatibility	190
Decorating Technique	192
Filling Line Requirements	193
Sealing Techniques/Tamper Indication	196
Warehousing and Transportation	198
Plastic Package Recycle Potential	199

CHAPTER 5. RETORTABLE FLEXIBLE CONTAINERS 201

Introduction	201
Products Packed in Retortable Flexible Containers	204
Structure Of Flexible Containers	204
Retort Pouch Forming, Filling and Sealing	208
Semi-Rigid Containers—Filling and Sealing	212
Formed Pouches - Forming, Filling and Sealing	212

RETORTABLE FLEXIBLE CONTAINERS – Continued

Equipment for Thermal Sterilization of Retortable

Flexible Containers 213

Heating Mediums for Sterilization 215

Critical Factors In Thermal Processing Of Flexible Containers 216

Quality Control Tests For Pouch Laminate, Pouch

and Semi-Rigid Container 218

Advantages And Disadvantages Of Retortable Flexible Containers 221

CHAPTER 6. PACKAGES FOR ASEPTIC PACKAGING 225

Classification of Aseptic Packages 225

Basic Characteristics of Packaging Materials for Aseptic Packaging 226

Materials Used in the Manufacture of Packages for Aseptic Packaging 227

Sterilization Of Packaging Materials And packages 229

Aseptic Packaging Systems 230

The Tetra Pak System 231

The Combibloc System 234

The Combibloc Process 234

The International Paper System 235

The Gasti System – American Can Company 236

The Liqui-Pak System 236

The Metal Box “FreshFill” System 236

The Dole Corp. Hot Air Aseptic Packaging System for Fruit Juices 237

The Container Sterilizing Unit 237

The Filling Section 237

The Cover Sterilizing Unit 238

The Container Closing Section 238

Sterilization Of Equipment For Aseptic Packaging 238

Testing and Start-Up of an Aseptic Processing and Packaging Facility .. 238

Aseptic Packaging Low-Acid Foods With Particulates 239

Aseptic Canning Sustems 240

Sterilization of Containers 245

Sterilization of Covers 245

Aseptic Filling and Sealing Operations 245

Summary of Products Packed by the Dole Aseptic Canning System 246

Aseptic Packaging For Reprocessing 247

Aseptic Drum Fillers 248

“Tote” Type Containers 248

FranRica “Quadraseptic” Drum and Tank Aseptic Filling System 248

Automated Aseptic Filling of Drum Containers 251

Removal of Filled Drum Container 253

XII MICROBIOLOGY, PACKAGING, HACCP & INGREDIENTS

PACKAGES FOR ASEPTIC PACKAGING – Continued

Filling of Flexible Plastic Bags	254
Scholle Aseptic Filling System For Bag-In-Box/Drum Packaging	255
Aseptic Bulk Storage and Transportation	256
Bulk Storage Processing of Tomato Products	256
Bulk Tomato Paste Available in Rail Cars	258
Tanks For Aseptic Storage For REprocessing	259
Regulations That Apply To Aseptic Processing And Packaging Systems ..	260

CHAPTER 7. IN-PLANT QUALITY CONTROL

Organization Of Quality Control	261
Personnel Requirements	263
Laboratory Facilities	263
General Operations	264
Control Of Factory Operations	265
Daily Sanitation Survey	266
Daily Plant Inspection	267
Examination of Line Samples	269
Examination of Water	270
Testing Canned Foods	271
Vacuum	271
Headspace	272
Fill of Container – Cans	272
Fill of Container-Glass Jars	274
Fill of Container-Juice Products	274
Fill/Drained Weight	274
Cut-Out-Brix	276
Flavor	278
Net Weight	278
pH Measurement	278
Total Acidity	278
Purchasing Raw Products For Canning	278
The Past And Future Of Quality Control	279

CHAPTER 8. HAZARD ANALYSIS AND CRITICAL CONTROL

POINT INSPECTION (HACCP)	285
Hazard Analysis And Critical Control Point System	287
1.0 Executive Summary	288
2.0 Definations	290
3.0 Purpose and Principles	291
4.0. Explanation and Application Of Priniciples	291

HACCP – Continued

4.1. Assemble the HACCP team	293
4.2. Describe the food and the method of its distribution.	293
4.3. Identify the intended use and consumers of the food.	293
4.4. Develop a flow diagram which describes the process.	293
4.5. Verify flow diagram.	294
4.6. Principle No. 1. Conduct a hazard analysis.	294
4.7. Principle No. 2. Identify the CCPs in the process.	295
4.8. Principle No. 3. Establish critical limits for Preventive Measures Associated With Each Identified CCP.	296
4.9. Principle No. 4. Establish CCP monitoring requirements.	299
4.10. Principle No. 5. Establish corrective action to be taken when monitoring indicates that there is a deviation from an established critical limit.	301
4.11. Principle No. 6. Establish effective record keeping procedures that document the HACCP system.	302
4.12. Principle No. 7. Establish procedures for verification that the HACCP system is working correctly.	302
Appendix A. Examples of Questions to be Considered in a Hazard Analysis	303
Appendix B. Hazard analysis and assignment of risk categories	306
Appendix C. Examples of a Flow Diagram for the Production of Frozen Cooked Beef Patties	308
Appendix D. Examples of HACCP Records	308

CHAPTER 9. CONSUMER COMPLAINTS AND MARKET RECALL ... 309

Organization	309
Recording Complaints	310
Responding to Complaints	310
Product Tampering	312
Product Recalls	312
Introduction	312
Preparing For A Recall	316
Recall Team	316
Information Required	317
Blue Prints and Flow Diagrams	317
Ingredient Identification	318
Supplier, Vendor and Raw Material Records	318
Production and Distribution Records	318
Distribution List	318
Product Coding Program	318
Other Aspects	318

XIV MICROBIOLOGY, PACKAGING, HACCP & INGREDIENTS

CONSUMER COMPLAINTS AND MARKET RECALL – Continued

Description of Recall Strategy Elements	319
The Recall Procedure	320
Identification of a Potential Recall Situation	320
Assessment of a Potential Recall Situation	320
Steps to Conduct a Recall	321
Suggestions	323

CHAPTER 10. COMPUTER-INTEGRATED MANUFACTURING 329

Computer Technology	329
Hardware	329
Software	329
Networks	329
Vision systems	330
Intelligent systems	330
Use In The Food Industry	331
Information Systems	331
Purchasing, Sales and Distribution	331
Production Control	332
Quality Assurance	334
Product Development	334
Nutritional labeling	334
Application Considerations	334
Review current process	334
Assignment	335
Implementation and Evaluation	335

CHAPTER 11. INGREDIENTS 337

Food Additives	337
Functions of Additives	338
Safety of Additives	340
When Additives Should Not Be Used	340
Salt, Salt Tablets, And Combinations Tablets In Canning	341
Brine	342
Brine Dispensing	342
Potassium Chloride	344
Measuring Salt Content	344
Tablets and Tablet Depositors	344
Dry Bulk Dispensing	345

INGREDIENTS – Continued

Carbohydrates In Canning And Preserving	346
Sweeteners	347
Introduction	347
Dextrose (d-Glucose)	348
Levulose (d-Fructose)	350
Sucrose	350
Invert Sugar	351
Corn Syrup (Glucose Syrup)	351
High Fructose Corn Syrup	354
Maltodextrins	356
Starch	356
Starch Modifications	360
Bleaching	360
Viscosity Reduction	360
Crossbonding	361
Stabilization	362
Summary	363
Use of Modified Starches	363
Sorbital And Mannitol	364
Spices, Essential Oils And Oleoresins, Soluble and Drug Extractives	365
Spices	365
Quality Evaluation of Spices	366
Microbiology of Spices	366
Essential Oils and Oleoresins	367
Soluble Extractives	368
Spray-dried Extractives	368
Buying	368
Storage	368
Textured Vegetable Proteins	369
Monosodium Glutamate	372
Water Soluable Gums (Hydrocolloids)	375
Agar	379
Gum Arabic	379
Gum Ghatti	381
Gum Karaya	381
Furcellaran	382
Guar Gum	383
Locust Bean Gum	384
Gum Tragacanth	385
Xantham Gum	386

INGREDIENTS – Continued

Alginate.....	387
Carrageenan.....	388
Uses in Canned Foods	388
Gelatin	389
Gel Strength	392
Gelatin Desserts	393
Jellied Meats	394
Gelatin for Fruit Juice, Wine and Beer Clarification	395
Emulsifiers (Surfactants)	395
Color Additives	397
Certified Color Additives	399
Classification of Certified Food Color Additives	400
Problems with Food Color Additives	401
Use of Certified Color Additives in Processed Foods	402
Preservatives	403
Antimicrobial Agents	404
Antibiotics	406
Antioxidants	406
Sequestering Agents	407
Chelating (Sequestering) Agents	408
Basic Concepts	408
Regulatory Status	410
Applications	410
Acidulants	412
Flavor Modifications	412
Aiding Preservation	413
Other Functions	413
Malic Acid	414
Fumaric Acid	414
Adipic Acid	414
Succinic Acid	415
Citric Acid	415
Phosphoric Acid	416
Firming Agents	416
Alternative Sweeteners And Fat Replacers	417
Alternative Sweeteners and Bulking Agents	417
Fat Replacers	419

APPENDIX.....	421
Temperature Conversion Table	421
Table of Conversion Factors—English to Metric.....	425
Metric Conversion Table	429
Decimal Equivalents (Millimeters to Inches).....	430
Decimal Equivalents (Inches to Millimeters).....	431
Table of Metric Weights and Measures	432
Tin Plate Basis Weights	433
Case Equivalents	434
Can Dimensions and Conversions—English to Metric	435
Container Dimension Conversion Chart	436
Sodium Chloride Brine Tables	438
Normal pH Ranges of Commercially Canned Foods	440
Sterilizing Values (F_0) For Some Commercial Processes	442
GLOSSARY OF TERMS	443
SUBJECT INDEX	475
FIGURES/TABLES/CHARTS INDEX	483
