1	The Major Seed Storage Proteins of Spelt Wheat, Sorghum, Millets and Pseudocereals	
	<i>Peter R. Shewry</i>	1
1.1	Introduction	1
1.2	Storage Protein: Types and Properties	2
1.2.1	11S Globulins	2
1.2.2	7S Globulins	2
1.2.3	2S Albumins	3
1.2.4	Prolamins	3
1.3	Spelt Wheat	4
1.3.1	Wheat Gluten Proteins	5
1.4	Sorghum and Millets	6
1.4.1	Sorghum, Coix and Maize Prolamins	7
1.4.1.1	α -Prolamins	8
1.4.1.2	β -Prolamins	8
1.4.1.3	γ -Prolamins	9
1.4.1.4	δ -Prolamins	9
1.4.2	Millet Prolamins	9
1.4.2.1	Pearl Millet (<i>Pennisetum glaucum</i>)	10
1.4.2.2	Italian or Foxtail Millet (<i>Setaria italica</i>)	10
1.4.2.3	Other Millets	11
1.4.2.4	Fonio (<i>Digitaria exilis</i>)	11
1.4.2.5	Tef (<i>Eragrostis tef</i>) and Ragi (<i>Eleusine coracana</i>)	12
1.4.3	Conclusions: Sorghum and Millet Prolamins	12
1.5	Pseudocereals	12
1.5.1	Quinoa	13
1.5.2	Buckwheat	15
1.5.3	Amaranthus	16
1.5.4	Conclusions: Storage Proteins of Pseudocereals	20
1.6	References	20

2	Sorghum	
	<i>John R. N. Taylor, Peter S. Belton</i>	25
2.1	Introduction	25
2.2	Production and Importance	26
2.3	Sorghum Types	27
2.4	Grain Structure	28
2.5	Chemical Composition	30
2.5.1	Proteins	30
2.5.2	Starch	38
2.5.3	Lipids	40
2.5.4	Phenolic Compounds	42
2.5.5	Grain Nutritional Properties	43
2.6	Milling	45
2.7	Traditional Foods	48
2.7.1	Fermented Foods	49
2.7.2	Rice-Type Foods	49
2.7.3	Pancakes and Breads	49
2.7.4	Steamed and Boiled Dough Products	50
2.7.5	Porridges and Gruels	51
2.8	Traditional Alcoholic and Non-Alcoholic Fermented Beverages	52
2.8.1	Traditional Clear Beers	52
2.8.2	Opaque Beers	53
2.8.2.1	Traditional Sorghum Malting and Opaque Beer Brewing	54
2.8.2.2	Industrial Sorghum Malting	55
2.8.2.3	Industrial Opaque Beer Brewing	60
2.8.3	Chinese Distilled Beverage	65
2.9	Nutritional Value of Sorghum Foods	65
2.9.1	Malted Sorghum	65
2.9.2	Fermented Sorghum Porridge	67
2.9.3	Sorghum Beer	69
2.10	Non-Traditional Foods	70
2.10.1	Bread, Cakes and Cookies	70
2.10.1.1	Composite Flour Bread	71
2.10.1.2	Wheatless Bread	73
2.10.1.3	Cakes and Cookies	74
2.10.2	Noodles and Pasta	74
2.10.3	Tortillas	75
2.11	Non-Traditional Beverages	75
2.11.1	Lager Beers and Stouts	75
2.11.1.1	Sorghum Adjunct Brewing	76
2.11.1.2	Sorghum Malt Brewing	77
2.11.2	Non-Alcoholic Malt Beverages	79

2.12	Sorghum as a Novel Nutrient in Foods	79
2.13	References	81
3	Quinoa	
	<i>John R.N. Taylor, Mary L. Parker</i>	93
3.1	Introduction	93
3.2	Production	93
3.3	Plant and Grain Structure	95
3.3.1	Plant Morphology	95
3.3.2	Grain Structure	96
3.4	Chemical Composition and Nutritional Value	99
3.4.1	General Chemical Composition	99
3.4.2	Proteins	100
3.4.3	Lipids	101
3.4.4	Carbohydrates	102
3.4.4.1	Sugars	102
3.4.4.2	Starch	103
3.4.5	Dietary Fibre	104
3.4.6	Minerals	105
3.4.7	Vitamins	106
3.4.8	Enzymes	106
3.4.9	Antinutrients	106
3.4.9.1	Saponins	106
3.4.9.2	Other Antinutrients	108
3.5	Processing	108
3.5.1	Removal of Saponins	109
3.5.2	Dry Milling	111
3.5.3	Wet Cooking	111
3.5.4	Dry and Semi-Dry Cooking	113
3.5.5	Bread, Cake, and Cookie Making	114
3.5.6	Malting and Fermentation	114
3.6	Novel Applications	115
3.6.1	Saponins	115
3.6.2	Starch	115
3.6.3	Gluten-Free Pasta	116
3.6.4	Tempeh	116
3.6.5	Instant Infant Porridge	116
3.7	Concluding Remarks	118
3.8	References	119

4	Buckwheat	
	<i>Péter Biacs, Erzsébet Aubrecht, Irén Léder, József Lajos</i>	123
4.1	Introduction	123
4.2	Taxonomy, Distribution, Morphology and Cultivation of Buckwheat	123
4.2.1	Taxonomical Name and Position	123
4.2.2	World Distribution	124
4.2.3	Morphology	126
4.2.4	Cultivation of Buckwheat	127
4.2.4.1	Climate and Soil Requirements	127
4.2.4.2	Preparation of Soil, Sowing	127
4.2.4.3	Diseases, Parasites and Weeds of Buckwheat	127
4.2.4.4	Harvesting Drying and Storage	128
4.3	Chemical Composition of Buckwheat	128
4.3.1	Buckwheat as a Dietary Source	128
4.3.2	Minerals	129
4.3.3	Proteins	130
4.3.3.1	Amino Acid Composition	130
4.3.3.2	Immunological Character and Cross Reactions of Buckwheat	132
4.3.4	Non-Starch Polysaccharides	134
4.3.5	Starch	134
4.3.6	Inhibitors	134
4.3.7	Flavonoid Contents	135
4.3.8	Therapeutic Uses of Buckwheat	135
4.3.9	Detoxifying Acid Soils Aluminium with Buckwheat	136
4.4	Buckwheat Utilization	137
4.4.1	Food	138
4.4.2	Feed	139
4.4.3	Buckwheat Honey	140
4.4.4	Buckwheat Hulls	140
4.4.5	Buckwheat Hulling and Milling	141
4.4.6	Buckwheat Milling	143
4.4.7	Buckwheat Products Processed Using Hydrothermal Technologies	144
4.4.8	Bakery, Pasta and Confectionery Products	145
4.5	References	147
5	Spelt Wheat	
	<i>Raimondo Cubadda, Emanuele Marconi</i>	153
5.1	Introduction	153
5.2	Spelt Today	154
5.3	Chemical Properties	155
5.3.1	Proximate Composition	155
5.3.2	Proteins	155

5.3.2.1	Protein Content	155
5.3.2.2	Protein Composition	158
5.3.3	Digestible Carbohydrates	160
5.3.4	Dietary Fibre	160
5.3.5	Lipids	161
5.3.6	Minerals, Vitamins, and Other Components	162
5.4	Technological Characteristics of Spelt	164
5.4.1	Milling Properties	164
5.4.2	Flour Quality	165
5.5	Spelt Products and their Characteristics	168
5.5.1	Bread	168
5.5.2	Pasta	169
5.5.3	Breakfast Cereals	172
5.6	Conclusions	173
5.7	References	173
6	Millet	
	<i>A. Babatunde Obilana, Eric Manyasa</i>	177
6.1	Introduction	177
6.1.1	Pearl Millet	179
6.1.2	Finger Millet	181
6.1.3	Fonio	184
6.1.4	Tef	185
6.2	Grain Structure	186
6.2.1	Pearl Millet	188
6.2.2	Finger Millet	189
6.2.3	Fonio	190
6.2.4	Tef	190
6.3	Nutritional and Chemical Properties	191
6.3.1	Pearl Millet	191
6.3.1.1	Nutritional Properties	191
6.3.1.2	Chemical and Biological Properties	192
6.3.2	Finger Millet	196
6.3.2.1	Nutritional Properties	196
6.3.2.2	Chemical and Biological Properties	197
6.3.3	Fonio	199
6.3.3.1	Nutritional Properties	199
6.3.3.2	Chemical and Biological Properties	199
6.3.4	Tef	200
6.3.4.1	Nutritional Properties	200
6.3.4.2	Chemical and Biological Properties	201
6.4	Technological Properties	203
6.4.1	Pearl Millet Processing	204

6.4.1.1	Milling	204
6.4.1.2	Porridge and Bread Making	204
6.4.1.3	Compositing (Blending)	206
6.4.1.4	Malting and Fermentation	206
6.4.2	Finger Millet Processing	207
6.4.2.1	Milling	207
6.4.2.2	Malting and Fermentation	208
6.4.2.3	Popping	209
6.4.3	Fonio Processing	210
6.4.4	Tef Processing	210
6.5	Conclusion	211
6.6	References	214
7	Grain Amaranth	
	<i>Emerich Berghofer, Regine Schoenlechner</i>	219
7.1	Introduction	219
7.1.1	Historical Facts	219
7.1.2	Present Situation	220
7.2	The Amaranth Plant	221
7.2.1	Botanical and Agricultural Aspects	221
7.2.2	Taxonomy	223
7.2.3	Morphology of the Seeds	224
7.3	Composition, Nutritional, and Functional Properties of Grain Amaranth	226
7.3.1	Proteins	226
7.3.1.1	Protein Quality	226
7.3.2	Fats	227
7.3.2.1	Fatty Acid Pattern	228
7.3.2.2	Phospholipids	228
7.3.2.3	Tocols	228
7.3.2.4	Squalene	228
7.3.2.5	Influence of Amaranth on Lipid Metabolism in Humans	228
7.3.3	Carbohydrates	229
7.3.3.1	Low Molecular Weight Carbohydrates	229
7.3.3.2	Starch	229
7.3.4	Minerals	231
7.3.5	Vitamins	231
7.3.6	Dietary Fibre	231
7.3.7	Plant Secondary Metabolites	231
7.3.7.1	Phytic Acid	232
7.3.7.2	Tannins	232
7.3.7.3	Protease Inhibitors	233
7.3.7.4	Saponins	233
7.3.7.5	Pigments	234

7.4	Amaranth Processing	234
7.4.1	Cooking	234
7.4.1.1	Boiling	234
7.4.1.2	Lime Cooking	236
7.4.2	Popping	236
7.4.2.1	Technological Realization of Popping	236
7.4.2.2	Physico-Chemical Changes During Popping	237
7.4.2.3	Nutritional Changes During Popping	238
7.4.3	Production of Wholemeal Flour and Flour Fractions	238
7.4.3.1	Milling	238
7.4.3.2	Storability of Amaranth Flour Fractions	240
7.4.4	Production of Bread and Pasta Products	242
7.4.4.1	Bread and Baked Goods	242
7.4.4.2	Pasta and Noodle Products	243
7.4.5	Production of Convenience Products	244
7.4.5.1	Drum Drying	244
7.4.5.2	Extrusion Cooking	245
7.4.5.3	Breakfast Cereals	246
7.4.5.4	Muesli and Granola Bars	247
7.4.6	Germination (Malting)	247
7.4.7	Fermented Foods	248
7.4.8	Production of Protein Concentrates and Protein Flours	249
7.4.9	Amaranth Starch	249
7.4.9.1	Amaranth Starch Production	249
7.4.9.2	Possible Fields of Application of Isolated Amaranth Starch	250
7.4.9.3	Starch Hydrolysis Products	251
7.4.10	Amaranth Oil Production	251
7.4.10.1	Isolation of Squalene	252
7.5	Conclusions – Future Outlook	252
7.6	References	253
