Foreword ix
Preface xi

Chapter 1—Identification of Different Types of Wear 1
Introduction 1
Terminology/Key Words 1
Terms from ASTM G 40: Terminology Relating to Wear and Erosion 1
Terms from ASTM D 4175: Standard Terminology Relating to Petroleum, Petroleum Products, and Lubricants 2
Terms from Other Sources 3
Why Identify Wear Mode 3
Categories of Wear 4
Abrasive Wear 4
Nonabrasive Wear 5
Galling 6
Oxidative Wear 6
Fretting Wear 6
Rolling Wear 7
Impact Wear 7
Other Forms of Wear 8
Machining Wear 8
Human Joint Deterioration 8
Erosion 9
Slurry 9
Solid Particle 9
Cavitation 10
Droplet 10
Impingement 10
Gas 10
Atomic/Molecular 11
Spark 11
Laser Ablation 11
Types of Friction 12
Sliding 12
Rolling 12
Solids Contacted by a Fluid 12
Static Friction/Blocking 12
Types of Lubrication 13
Solid Film 13
Thin Film 13
Liquid 13
Gas 14
Grease 14
Chapter Summary 14
Important Concepts 15
Resources for More Information 15

Chapter 2—Alternatives to Testing: Modeling and Simulation 16
Introduction 16
Expert Systems 16
Computer Simulations 17
Finite Element Modeling 17
Friction Models 18
Wear Models 19
Adhesive Wear 19
Erosion Models 19
Solid Particle Erosion 19
Slurry Erosion 20
Liquid Erosion 20

Cavitation 21
Fretting Models 21
Surface Fatigue Models 22
What to Do About Modeling: Summary 22
Important Concepts 22
Resources for More Information 22

Chapter 3—Methodology/Test Selection 24

General Methodology 24
Establish the Purpose 24
Establish the Objective 24
Define the Wear System 24
Reporting the Data 25
Elements of a Valid Wear Test 26
Material Documentation 26
Statistical Significance 26
Surface Condition 27
Role of Time and Distance 28
Test Environment 28
Wear and Friction Measurements 28
Reporting Wear Losses 29
Test Selection 30
Procedure 30
Simulation 30
Test Protocol 30
Chapter Summary 30
Important Concepts 31
Resources for More Information 32

Chapter 4—Abrasive Wear Testing 33

Introduction 33
Gouging Abrasion 33
Low-Stress Abrasion 33
ASTM G 65 33
ASTM G 174 35
ASTM G 132 36
ASTM G 171 36
ASTM D 1242 37
ASTM D 4060 (Taber) 37
Nonstandard Tests 38
Summary 39
High-Stress Abrasion 39
Polishing 40
Product Abrasivity 41
Standard Tests 41
Magnetic Media 41
Photographic Paper/Film, Plastics, Paints 42
Ball Cratering Test 42
Chapter Summary 43
Important Concepts 43
Resources for More Information 43

Chapter 5—Adhesive Wear Testing 45

Introduction 45
Galling: ASTM G 98 45
Pin-on-Disk: ASTM G 99 45
Reciprocating Ball-on-Plane: ASTM G 133 46
Block-on-Ring: ASTM G 77 47
Scuffing/Scoring 48
Oxidative Wear 49

Chapter Summary 50
Important Concepts 50
Resources for More Information 50

Chapter 6—Plastic/Elastomer Wear 51

Introduction 51
Abrasion Tests 53
Taber Abraser 53
Falling Sand 53
Dry-Sand Rubber Wheel: ASTM G 65 53
Loop Abrasion Test: ASTM G 174 54
Scratch Test: ASTM G 171 55
Rubber Abrasion 55
Sliding Wear of Plastics/Elastomers 56
Plastic-to-Metal 56
Pin-on-Rotating Disk 57
Plastic-to-Plastic 57
Plastic-to-Ceramic/Cermet 58
Break-In 58
Specific Wear Rate 58
PV Limit 58
Erosion of Plastics 59
ASTM Tests 59
Nonstandard Tests 60
Chapter Summary 60
Important Concepts 60
Resources for More Information 60

Chapter 7—Lubricated Wear Tests 62

Introduction 62
Types of Lubricants That Can Be Encountered 62
Lubricating Oils 62
Lubricating Greases 63
Solid Film Lubricants 63
ASTM Lubricated Wear Tests 66
Block-on-Ring: ASTM G 77 66
Reciprocating Test: ASTM G 133 66
Pin-on-Disk: ASTM G 99 67
Four-Ball Test: ASTM D 4172 67
Friction and Wear of Greases with the SRV Tester: ASTM D 5707 67
BOCLE: Ball-on-Cylinder: ASTM D 5001 67
Load-Carrying Capability Tests 68
Pin and Vee Block: ASTM D 2670 68
ASTM D 5183 Four-Ball Friction Test 68
ASTM D 2981 Block-on-Ring Test for Solid Lubricants 68
A Lubricated Fretting Test 68
Testing Gears with the FZG Rig 69
Rolling Element Tests 69
Chapter Summary 70
Important Concepts 70
Resources for More Information 70

Chapter 8—Fretting Tests 71

Introduction 71
Mechanisms of Fretting Corrosion and Wear 71
Fretting Tests 72
Ball-on-Plane 73
Standard Tests: Fretting Fatigue 74
Electrical Contact Tests 74
Hip Implant Couples 75
Grease 76

Chapter Summary ... 76
Important Concepts ... 76
Resources for More Information ... 76

Chapter 9—Rolling Wear, Impact Wear, and Surface Fatigue Testing ... 78

Introduction ... 78
Surface Fatigue of Coatings and Surface Treatments ... 78
Surface Fatigue in Rolling Element Bearings ... 79
Surface Fatigue of Rails, Tracks, and Wheels ... 81
Surface Fatigue of Gears ... 81
Impact Wear and Surface Fatigue ... 82
Rolling Element Wear Tests ... 83
Gear Fatigue Tests ... 84
Rolling Surface Fatigue Tests ... 84
Impact Wear Tests ... 85
Chapter Summary ... 85
Important Concepts ... 85
Resources for More Information ... 85

Chapter 10—Erosion Testing ... 86

Introduction ... 86
Solid Particle Erosion Tests ... 86
Falling Sand Test ... 86
Gas Jet Erosion Test ... 86
Slurry Erosion Tests ... 87
Wet-Sand/Rubber Wheel and the Carbide Abrasion Test ... 88
Propeller Tests ... 89
Ball Cratering Test ... 89
Slurry Pot ... 89
Orifice Enlargement ... 90
Erosion/Corrosion ... 90
Droplet/Impingement Erosion ... 90
Cavitation ... 91
Cavitation Testing with an Ultrasonic Horn ... 91
Submerged Water Jet Cavitation Test ... 92
Chapter Summary ... 93
Important Concepts ... 93
Resources for More Information ... 93

Chapter 11—Types of Friction and Friction Testing ... 95

Origin of Friction ... 95
Importance of Friction ... 96
Types of Friction and Important Facts ... 96
Friction Databases ... 98
Factors That Affect Friction ... 98
Sliding Friction Tests ... 100
Friction Measurement and Recording Protocol ... 102
Reporting Friction Data ... 103
Solid-on-Solid Friction Tests ... 104
Footwear Tests ... 104
Frictionometer ... 104
Pavement/Tire Tests ... 104
ASTM G 143: Capstan Friction ... 104
Solid-on-Solid Plus Third Body Tests ... 105
Thrust Washer Test ... 105
Block-on-Ring Test ... 106
Pin-on-Disk ... 106
Reciprocating Block-on-Plane ... 107
Rolling Friction ... 107
Bearing Friction Tester ... 107
Spin-Down Friction Testing ... 108

Friction of Ball Bearings at Low Temperature 108
Ball Bearing Friction at Room Temperature 108
Solid-on-Solid Plus a Fluid/Lube Friction 109
ASTM D 5183: Four-Ball Friction Test 109
ASTM D 3233: Falex Pin-and-Vee Block Test 109
ASTM D 6425: Reciprocating Lubricated Friction and Wear (SRV Machine) 109
ASTM G 133: Procedure B Reciprocating Ball-on-Plane and Lube Test 110
Chapter Summary 110
Important Concepts 110
Resources for More Information 110

Chapter 12—Micro-, Nano-, and Biotribotests 112

Introduction 112
Surface Analysis Tools 112
Optical Microscopy 113
Profilometry 113
Indentation Testing 115
Scanning Electron Microscopy 115
Scanning Probe Microscopy 116
Scratch Testing 117
Biotribology Tests 118
Chapter Summary 118
Important Concepts 118
Resources for More Information 119

Chapter 13—Test Confidence and Correlation with Service 120

Introduction 120
Test Confidence 120
Test Selection 120
Correlation Case Histories 122
Friction 123
Abrasion 123
Nonabrasive Wear 124
Wear of Plastics 124
Slurry Abrasivity 124
Fretting Corrosion 125
Polishing Wear 126
Solid Particle Erosion 126
Lubricated Wear Testing 127
Erosion/Corrosion 128
Chapter Summary 128
Important Concepts 128
Resources for More Information 129

Subject Index 130
