

Industrial Pollution Prevention Handbook

HARRY M. FREEMAN

Contents

Contributors xix

Preface xxiii

1. Pollution Prevention	1
1.1 Introduction	1
1.2 Benefits of Pollution Prevention	4
1.3 Pollution Prevention in Other Countries	5
1.4 Industrial Programs	6
1.5 Where Do We Go from Here?	7
References	7
2. Overview of Waste Reduction Techniques Leading to Pollution Prevention	9
2.1 Introduction	9
2.2 Managing Inventory	10
2.3 Modifying Production Processes	12
2.4 Reducing Waste Volume	16
2.5 Recovering Waste	17
2.6 Summary	19
References	25
Further Reading	26
3. Pollution Prevention Requirements in United States Environmental Laws	27
3.1 Introduction	27

3.2	Summary of Federal Pollution Prevention Statutory Provisions	28
3.3	Discussion	32
3.4	Executive Orders Promoting Federal Pollution Prevention	42
	References	49
4.	Expanding the Pollution Prevention Framework	51
4.1	Introduction	51
4.2	Local Government Perspective	52
4.3	State Government Perspective	55
4.4	Conclusions	60
	References	61
5.	Voluntary Pollution Prevention Programs	63
5.1	Genesis of Voluntary Programs	63
5.2	Voluntary Programs of the EPA	64
5.3	Conclusion	69
	Reference	69
6.	State Facility Planning Requirements	71
6.1	Planning Requirements	72
6.2	Compliance Issues and Penalties	78
6.3	Measurement and Normalization Issues	78
6.4	Protection of Confidential Business Information	78
6.5	Technical Assistance Activities and Funding Mechanisms	79
6.6	Grants	79
6.7	Pollution Prevention Barriers and Reasons for Success	79
6.8	State-Specific Components	80
6.9	Planning Follow-up	81
6.10	Summary	82
	Further Reading	82
7.	Pollution Prevention Incentives, Barriers, Regulations, and State Programs	85
7.1	Introduction	85
7.2	Pollution Prevention Incentives	86
7.3	Pollution Prevention Barriers	89
7.4	Regulatory Framework Encouraging Pollution Prevention	95
7.5	State Programs Promoting Pollution Prevention	96
	References	97
	Further Reading	97

8. Developing and Maintaining a Pollution Prevention Program 99

- 8.1 Benefits of and Obstacles to a Pollution Prevention Program 101
- 8.2 Definition of Pollution Prevention Program, Plan, and Project 102
- 8.3 Overview of Steps to Implementing a Pollution Prevention Program 102
- 8.4 Top-Management Support 103
- 8.5 Getting Started 107
- 8.6 Out in the Plant—A Learning Process 111
- 8.7 Sustain the Pollution Prevention Program 116
- 8.8 Summary 118
 - Bibliography 119
 - Further Reading 119

9. Pollution Prevention and Total Quality Management 121

- 9.1 The Paradigms: Their Basis and Substance 121
- 9.2 Convergence of the Paradigms 129
- 9.3 The Future Factory 133
 - References 134

10. Examples of Successful Pollution Prevention Programs 135

- 10.1 Introduction 135
- 10.2 Overview of Reduction Techniques 137
- 10.3 Grumman Corporation 138
- 10.4 Panel Processing, Incorporated 140
- 10.5 Avondale Industries, Incorporated 142
- 10.6 Other Pollution Prevention Achievements 144
- 10.7 Conclusions 145

11. Agile Manufacturing 147

- 11.1 Introduction 147
- 11.2 Manufacturing Background 147
- 11.3 Agile Manufacturing History 148
- 11.4 How Does an Agile Company Operate? 149
- 11.5 What Capabilities Exist in an Agile Manufacturing Company? 149
- 11.6 What Are the Characteristics of an Agile Company? 150
- 11.7 What's New in Agility? 152
- 11.8 Why Agility? 153
 - References 154

12. Facility Pollution Prevention Planning	155
12.1 Developing a Pollution Prevention Program	155
12.2 Developing and Implementing Pollution Prevention Projects	166
13. Descriptive Approach for Pollution Prevention Assessments	179
13.1 Introduction	179
13.2 Prescriptive Approach	180
13.3 Descriptive Approach	182
13.4 Conclusions	185
References	186
14. Application of Risk Analysis to Set Pollution Prevention Priorities	187
14.1 Overview	187
14.2 Types of Risk Analysis	189
14.3 Chemical Risk Analysis and Pollution Prevention	191
14.4 Examples of Chemical Risk Analysis	195
14.5 Application of Risk Analysis to Industrial Pollution Problems	197
14.6 Application of Risk Analysis to a Particular Pollution Source	201
14.7 Use of Chemical Informatics in Pollution Prevention	202
14.8 Conclusion	202
Bibliography	203
15. Profitability Analysis of Pollution Prevention Investments Using Total Cost Assessment	205
15.1 Introduction	205
15.2 Conventional versus Total Cost Assessment (TCA)	208
15.3 Three Examples	215
15.4 Conclusions	225
References	227
16. Accounting for the Environment	229
16.1 Introduction	229
16.2 Accounting Information Support for Managerial Decision Making	230
16.3 Environmental Cost Profiling	232
16.4 Developing Time Series for Environmental Costs	234
16.5 Summary	234

17. Measuring Pollution Prevention Progress 235

- 17.1 Introduction/Overview 235
- 17.2 What Is Pollution Prevention Progress? 236
- 17.3 Why Measure Progress? 236
- 17.4 What to Measure? 237
- 17.5 How to Measure 239
- 17.6 Measurement Issues 244
- 17.7 What Have We Learned from Assessing Pollution Prevention Progress under TRI? 247
- 17.8 Overview: Selecting a Method for Measuring Pollution Prevention Progress 249
- Bibliography 251

18. Pollution Prevention through Life-Cycle Design 253

- 18.1 Introduction 253
- 18.2 Definition of the Product System 254
- 18.3 Goals of Life-Cycle Design 257
- 18.4 Development Activities 258
- 18.5 Needs Analysis 281
- 18.6 Requirements 264
- 18.7 Design Strategies 275
- 18.8 Summary of Life-Cycle Design Principles 290
- References 291

19. Life-Cycle Assessment 293

- 19.1 Concepts and Methods 295
- 19.2 Applications of LCA for Pollution Prevention 307
- 19.3 Facilitating Applications 309
- 19.4 Summary 311
- References 311
- Further Reading 312

20. Product Labeling 313

- 20.1 Introduction to Environmental Labeling 313
- 20.2 Society of the Plastics Industry Resin Coding System 315
- 20.3 Green Seal 316
- 20.4 Scientific Certification Systems 321
- 20.5 Labeling Programs around the World 322
- 20.6 Conclusion 327
- Further Reading 327
- Organizations to Contact for Additional Information 328

21. Pollution Prevention in Process Development and Design	329
21.1 Introduction	329
21.2 The Process Development Cycle	331
21.3 Key Tools and Techniques for Incorporating Pollution Prevention	335
References	341
Further Reading	341
22. Pollution Prevention through Reactor Design	343
22.1 An Overview of Reaction Engineering and Pollution Prevention	343
22.2 Basic Terminology	344
22.3 Classification of Reactors	345
References	357
Further Reading	358
23. Separations Technologies	361
23.1 Role of Separations in Pollution Prevention	361
23.2 Separation Technologies for Liquid Waste	363
23.3 Separation Technologies for Gaseous Waste	383
References	392
24. Pollution Prevention through Process Control	395
24.1 The Effect of Measurement Accuracy on Pollution Control	395
24.2 Optimizing Control System Performance to Reduce Pollutants	397
24.3 Process Control Strategies to Prevent Pollutant Emissions	401
24.4 Conclusion	407
Further Reading	407
25. Pollution Prevention through Process Simulation	409
25.1 Introduction	409
25.2 Process Design	410
25.3 Computer-Aided Process Design for Pollution Prevention	412
25.4 Examples	420
25.5 Other Environmental Simulation Tools	429
25.6 Conclusion	430
References	431

26. Pollution Prevention through Chemistry 433

- 26.1 Alternative Synthetic Pathways for Pollution Prevention 434
- 26.2 Process Analytical Chemistry 436
- 26.3 Pollution Prevention in PMN Review 441
- 26.4 Chemicals and Safety 446
- References 450

27. Mixing as a Tool for Pollution Prevention in Reactive Systems 455

- 27.1 Introduction 455
- 27.2 Mixing Equipment 457
- 27.3 Industrial Examples 459
- 27.4 Reactive Mixing Models 463
- 27.5 Summary 464
- References 465

28. Process Equipment for Cleaning and Degreasing 467

- 28.1 Introduction 467
- 28.2 Traditional Processes and Add-On Improvements 467
- 28.3 Aqueous Processing 469
- 28.4 Ultrasonic Cleaning 472
- 28.5 Low-Emission Vapor Degreasing 474
- 28.6 Alternative Soldering Techniques 477
- 28.7 Emerging Technologies 478
- References 480

29. Pollution Prevention in Coating Application and Removal 483

- 29.1 Industry Overview 483
- 29.2 Description of Main Processes 483
- 29.3 Typical Wastestreams 484
- 29.4 Pollution Prevention Options 485
- 29.5 Pollution Prevention Successes 492
- References 493
- Further Reading 493

30. Pollution Prevention in Office Operations 495

- 30.1 Introduction 495
- 30.2 Benefits of Practicing Pollution Prevention in the Office 496
- 30.3 Pollution Prevention Options for Office Operations 497

- 30.4 How to Establish a Pollution Prevention Program
in the Office 502
- 30.5 Conclusions 504
 - Further Reading 505
 - Other Resources 505

31. Pollution Prevention in Laboratory Operations 507

- 31.1 Introduction 507
- 31.2 Nature of Waste Generated by Laboratories 508
- 31.3 Pollution Prevention Assessment 508
- 31.4 Purchasing and Inventory Management 509
- 31.5 Downsizing 510
- 31.6 Product Substitution 510
- 31.7 Computer Simulation 510
- 31.8 Regulatory Structure 512
- 31.9 Waste Minimization Requirements in the Laboratory 514
- 31.10 Designing a Laboratory Pollution Prevention Program 515
 - Reference 516
 - Further Reading 516

32. Solvent Substitutes 517

- 32.1 Introduction 517
- 32.2 Metal Fabrication and Finishing 522
- 32.3 Precision Instruments and Devices 526
- 32.4 Printed Circuit Board Manufacture and Assembly 533
- 32.5 Maintenance Activities 536
- 32.6 Nonmetallic Materials 537
- 32.7 Adhesives, Coatings, Inks, and Aerosols 537
- 32.8 Material and Process Change Considerations 538
 - References 539

33. Maintenance Operations and Pollution Prevention 541

- 33.1 Definition of Maintenance 541
- 33.2 Maintenance Tasks 544
- 33.3 The Bathtub Curve 546
- 33.4 Maintenance Wastes 550
- 33.5 Environmental Impact 555
- 33.6 Selecting Priorities 555
- 33.7 Maintenance Trends 556
- 33.8 Addressing Pollution Prevention in Plant
Maintenance 558
- 33.9 Future Activities 560
 - References 560

34. Measuring the Performance of Environmentally Friendly Cleaning Solvents	563
34.1 Analytical Tools	564
34.2 Materials Compatibility and Environmental Testing	571
Bibliography	572
35. Materials Management	573
35.1 Business Benefits and Environmental Potentials	573
35.2 Information Sources for Facility Materials Management	574
35.3 Inventories Do Count in Pollution Prevention	575
35.4 Managing Purchasing, Distribution, and Demand	577
35.5 Managing Materials Handling to Minimize Waste	580
35.6 Benefits and Effects of Materials Substitution	581
35.7 Material and Waste Exchanges	582
35.8 Checklist for Materials Management Success	582
References	583
Further Reading	583
36. Generic Pollution Prevention	585
36.1 Introduction	585
36.2 General Approach to Initiating a P2 Water Management Program	587
36.3 In-Plant Wastewater Reduction Techniques	589
36.4 Techniques for Recycling Untreated Wastewater	597
36.5 By-Product Recovery	600
36.6 Techniques for Reusing Treated Wastewater	604
References	614
Further Reading	614
37. An Overview of Potential Environmental Impact from Industrial Activity	615
37.1 Generalized Environmental Impact	616
37.2 Generalized Case Study	617
37.3 Natural Resource Collection	617
37.4 Materials Processing	619
37.5 Manufacturing	620
37.6 Packaging	624
37.7 Use and Maintenance	625
37.8 Disposal	626
37.9 Conclusions	626
References	627

38. Biotechnology for Pollution Prevention **629**

- 38.1 Introduction 629
- 38.2 Potential and Advantages of Biotechnology 630
- 38.3 Pollution Prevention Techniques 631
- 38.4 Product Substitution 631
- 38.5 Product Recycling 636
- 38.6 Materials Changes 636
- 38.7 Process Changes 638
- 38.8 Environmental Control 638
- Further Reading 639

39. Pollution Prevention in the Electronics Industry **641**

- 39.1 Industry Overview 641
- 39.2 Description of Major Processes 642
- 39.3 Typical Wastestreams 645
- 39.4 Pollution Prevention Options 645
- 39.5 Pollution Prevention Successes 650
- Bibliography 650
- Further Reading 651

40. Industrial Waste Recycling at an Automotive Component Manufacturing Facility **653**

- 40.1 Introduction 653
- 40.2 Waste Minimization Philosophy 654
- 40.3 Brief Description of Flint East's Operations 655
- 40.4 Recycling Program Functions 655
- 40.5 Implementation of the Waste Minimization Philosophy 659
- 40.6 Management of the By-Products Group 662
- 40.7 Recognition of the By-Products Group 665

41. Pollution Prevention and Foundries **667**

- 41.1 Definition of Sand Reclamation 668
- 41.2 General Technical Considerations 668
- 41.3 Different Reclamation Requirements 673
- References 683
- Further Reading 684

42. Pollution Prevention in the Power Generation Industry **685**

- 42.1 Industry Overview 685
- 42.2 Description of Major Processes 686
- 42.3 Typical Wastestreams 688

- 42.4 Pollution Prevention Options 688
- 42.5 Pollution Prevention Successes 697
 - Bibliography 699
 - Further Reading 699

43. Pollution Prevention in the Fabricated Metal Products Industry 701

- 43.1 Industry Overview 701
- 43.2 Stripping 704
- 43.3 Cleaning 706
- 43.4 Painting 709
- 43.5 Inorganic Surface Treatment 713
- 43.6 Inorganic Surface Finishing 715
 - Bibliography 718

44. Pollution Prevention in the Chemical Industry 721

- 44.1 Introduction 721
- 44.2 Pollution Prevention—a Review of Chemical Industry Performance 723
- 44.3 Implementing Pollution Prevention 725
- 44.4 Looking for Pollution Prevention Opportunities 730
- 44.5 Voluntary Pollution Prevention and Regulatory Flexibility 733
 - References 736

45. Pollution Prevention in the Petroleum Refining Industry 739

- 45.1 Background 739
- 45.2 Oily Sludges 741
- 45.3 Spent Caustics 742
- 45.4 Spent Catalysts 742
- 45.5 Miscellaneous Process Wastes 747
- 45.6 Wastewater 747
- 45.7 Maintenance and Material Handling Wastes 747
 - References 749

46. Pollution Prevention in Electroplating Industries 753

- 46.1 Process Description 753
- 46.2 Pollution Prevention Options 758
- 46.3 Recovery and Recycling 765
- 46.4 Pollution Prevention Successes 773
 - References 774
 - Further Reading 774

47. Pollution Prevention at General Motors **777**

- 47.1 Industry Overview 777
- 47.2 GM's Pollution Prevention Program 779
- 47.3 Chemicals Management 780
- 47.4 Packaging Reduction and Recycling 784

48. Wood Furniture Finishing **791**

- 48.1 Industry Overview 791
- 48.2 Description of Main Processes 793
- 48.3 Typical Wastestreams 795
- 48.4 Pollution Prevention Options 799
- 48.5 Pollution Prevention Successes 804
 - References 805
 - Further Reading 806

49. Encouraging Pollution Prevention through Publicly Owned Treatment Works Activities **809**

- 49.1 Background 809
- 49.2 Why Should POTWs Encourage Pollution Prevention? 809
- 49.3 How Does a POTW Promote the Benefits of Pollution Prevention among Businesses? 810
- 49.4 Setting Priorities to Focus Pollution Prevention Efforts 810
- 49.5 Encouraging Pollution Prevention through On-Site Inspections 813
- 49.6 Encouraging Pollution Prevention through Permitting Activities 821
- 49.7 Examples of POTW Pollution Prevention Initiatives 823
 - Bibliography 826
 - Further Reading 826
 - Other Resources 827

50. Pollution Prevention in the Textile Industries **829**

- 50.1 Industry Overview 829
- 50.2 Process Description 831
- 50.3 Primary Wastestreams 835
- 50.4 Pollution Prevention Opportunities 838
 - References 843
 - Further Reading 845

51. Pollution Prevention in the Pulp and Paper Industry **847**

- 51.1 History and Process Description 847
- 51.2 Major Steps in the Kraft Process 849

- 51.3 Major Wastestreams 853
- 51.4 Pollution Prevention Options 854
- 51.5 Pollution Prevention Successes 862
 - References 863
 - Further Reading 863

52. Pollution Prevention in the Pharmaceutical Industry 865

- 52.1 Introduction 865
- 52.2 Overview of Pharmaceutical Industry and Waste Generation 866
- 52.3 Waste Disposal Practices in the Pharmaceutical Industry 869
- 52.4 Solvent Usage in the Pharmaceutical Industry 871
- 52.5 Pollution Prevention in the Pharmaceutical Industry 873
- 52.6 Conclusion 879
 - References 881

53. Sources of Pollution Prevention Information 885

- 53.1 Introduction 885
- 53.2 Forms of Information 887
- 53.3 Federal Programs 890
- 53.4 State Programs 894
- 53.5 University Programs and Research Institutions 894
- 53.6 Corporate Programs and Trade/Manufacturing Associations 902
- 53.7 Consulting Companies 907
- 53.8 Nonprofit Research Organizations 908
 - Further Reading 910
