

HANDBOOK OF CANE SUGAR ENGINEERING

by

E. HUGOT

*Ingénieur des Arts et Manufactures
Administrateur Général des Sucreries de Bourbon
Saint-Denis (Réunion)*

*Translated and revised,
with the collaboration of the author, by*

G. H. JENKINS, M.Sc.App.

*Senior Lecturer in Sugar Technology
University of Queensland
St. Lucia, Brisbane (Australia)*

ELSEVIER PUBLISHING COMPANY
AMSTERDAM/LONDON/NEW YORK/PRINCETON

1960

This book is a completely revised translation of
LA SUCRERIE DE CANNES
published by Maison Dunod, Paris

Library of Congress Catalog Card Number: 59-8940
With 458 illustrations and 222 tables

ALL RIGHTS RESERVED

THIS BOOK OR ANY PART THEREOF MAY NOT BE REPRODUCED
IN ANY FORM (INCLUDING PHOTOSTATIC AND MICROFILM FORM)
WITHOUT WRITTEN PERMISSION FROM THE PUBLISHERS

NEDERLANDSE BOEKDRUK INRICHTING N.V., 'S-HERTOGENBOSCH

Contents

Preface to the first French edition	VII
Preface to the English edition	X
Translator's foreword	XII
List of books and journals cited in references	XVIII
Abbreviations used	XIX
Units of measurement	XX
 1. <i>Delivery, unloading and handling of cane</i>	 1
Organisation of cane supply throughout the day	1
Unloading of cane	2
Cane handling equipment	4
Lateral feeding tables and carriers	12
2. <i>The cane carrier</i>	15
3. <i>Cane knives</i>	23
4. <i>Tramp iron separators</i>	35
5. <i>Crushers</i>	38
Object	38
Types of crusher	38
Inclination of the housing	46
Diameter	48
Speed	48
Pressure	49
Mean power absorbed and power to be installed	49
Double crusher	49
Three roller crusher	53
6. <i>Shredders</i>	57
Object	57
Types	57
7. <i>The combinations of cane preparators</i>	68
8. <i>Feeding of mills and conveying of bagasse</i>	69
9. <i>Roller grooving</i>	82
Object	82
Types of roller grooving	82
Wear of rollers	95
10. <i>Pressures in milling</i>	97
I. Hydraulic pressure	98
Accumulator	98
Piping for hydraulic pressure	108
Hydraulic pump	108

Caps and hydraulic pistons	109
Maximum values of the hydraulic pressure	110
Maximum values of total pressure	111
II. Pressure considered from the operating viewpoint	111
Measure of the pressure on the bagasse	111
Specific pressure	112
Resolution of the pressures in the mill while operating	113
Definitions	115
Relation between the compression of the bagasse and the pressure necessary to effect it	116
Graph of pressure in the mill	120
Calculation of the resultant reaction	123
Calculation of the maximum compression C	126
Calculation of settings	130
Hydraulic pressure and maximum pressure	130
Ratio between feed and delivery pressures	131
Friction of brasses in housings	133
Pinion reaction	134
Mean values of the t.h.p.	138
Variation of extraction as a function of the pressure	138
Sequence of pressures in the train	140
Variation of hydraulic pressure as function of the length of the tandem	141
Recent researches and discoveries	141
11. <i>Mill speeds</i>	143
Linear speed and speed of rotation	143
Maximum speeds	147
Sequence of speeds	148
12. <i>Mill capacity</i>	150
Definition	150
Factors influencing capacity	150
Capacity formulae proposed	151
Formula for capacity	152
Fibre loading	156
Tonnage records	158
13. <i>Mill settings</i>	159
Object	159
I. Setting of feed and delivery openings	160
Java method	161
Method of calculating operating openings	164
II. Setting of the trash plate	174
14. <i>Power requirements of mills</i>	183
15. <i>Steam engines for mill drives</i>	196
16. <i>Electric and turbine mill drives</i>	199
Electric drive	199
Direct drive by steam turbine	205
17. <i>Mill gearing</i>	207

18. Construction of mills	213
19. Imbibition	223
20. Extraction	246
21. Milling control.	251
22. Fine bagasse separators	261
23. Purification of juice	265
Clarification of juices	266
24. Defecation	267
25. Sulphitation.	274
26. Clarification with phosphoric acid	282
27. Carbonatation	284
28. Subsidation	293
A. Defecators	293
B. Decanters	294
C. Clarifiers or subsidors	298
29. Juice heating	312
30. Filtration	325
Filter presses	325
Mechanical or leaf filters	333
Continuous rotary vacuum filters	338
31. Evaporation.	348
General	348
Multiple effect evaporation	356
Temperature	357
Construction of multiple effects	358
Circulation of vapour	366
Condensates	367
Incondensable gases	379
Juice circulation	382
Entrainment	387
Inversion losses	391
Heat losses	392
Incrustations	393
Prevention of scaling	399
Operation in parallel	400
Vapour bleeding	401
Circulators	402
Turbo-compressor	403
Thermo-compressor	404
Operation of multiple effects	408
Heating surface	416
Calculations and design of a multiple effect	423
Multiple effect calculations	431
Evaporator operation	451

Special multiple effects	454
Evaporation under pressure	457
32. <i>Sugar boiling</i>	459
Vacuum pans	465
Effects of hydrostatic pressure	474
Circulation of the massecuite	476
Evaporation coefficient	496
Steam for heating	497
Steam consumption at the pan stage	497
Heating surface and ratio heating surface to volume	498
Height of massecuite, circulation, heating surface and graining volume	500
Capacity of pans	501
Sugar boiling procedures	503
Distribution of the pans between the various massecuites	508
Molasses	509
Conduct of the sugar boiling	512
Disposition of C sugar	519
A and B massecuites	520
Pan feed	521
Storage tanks for syrups and molasses	521
Proportions of syrup and molasses	522
Pans with mechanical circulation	523
Boiling house recovery	526
33. <i>Crystallisation</i>	529
Types of crystalliser	535
34. <i>Centrifugal separation</i>	547
A. Water turbines	566
B. Belt-driven centrifugals	569
C. Electrically driven centrifugals	573
Operation of centrifugals	586
35. <i>Storage and drying of sugar</i>	596
36. <i>Sugar</i>	604
37. <i>Molasses</i>	605
38. <i>Vacuum equipment</i>	606
The condenser	608
Air pumps	622
The barometric column	641
Water pumps	643
Spray ponds	645
Jet condensers	651
Steam ejector condensers	655
39. <i>Steam production</i>	658
Steam	658
Bagasse	673
Combustion of bagasse	680
Fuels other than bagasse	694

Furnaces	695
The grate	702
Horseshoe furnace	706
Ward furnace	707
Heating surface	707
Superheat and superheaters	708
Economisers	713
Air-heaters	720
Boiler settings	728
Draught	730
Fans	734
Boiler feed water	736
Steam accumulators	739
Steam-reducing valves	742
De-superheating	743
Types of boiler	744
Construction of boilers	747
Maintenance of boilers	749
Steam balance	749
40. <i>Steam engines</i>	759
41. <i>Steam turbines</i>	772
Concise theory of the steam turbine	772
42. <i>Electricity</i>	791
Alternators	797
Electric motors	799
Conductors	812
Electrification	814
43. <i>Pumps</i>	816
A. Reciprocating pumps	816
B. Centrifugal pumps	820
C. Rotary pumps	824
44. <i>Fluid flow in pipes</i>	828
A. Flow of water	828
B. Flow of steam	832
45. <i>Lubricants</i>	834
46. <i>Buildings</i>	838
47. <i>Lay-out of a factory</i>	850
48. <i>Accounting in the sugar factory</i>	854
Conversion tables – metric to British units	859
Conversion tables – British to metric units	861
Equivalents of foreign, British and metric units	863
Author Index	865
Subject Index	866
