

AIR POLLUTION ENGINEERING MANUAL

SECOND EDITION

U.S. ENVIRONMENTAL PROTECTION AGENCY

CONTENTS

CHAPTER 1. INTRODUCTION

THE LOS ANGELES BASIN	3
RULES AND REGULATIONS IN LOS ANGELES COUNTY	3
Regulation II: Permits	4
Regulation IV: Prohibitions	4
Rule 50: The Ringelmann Chart	4
Rule 51: Nuisance	4
Rule 52: Particulate Matter	5
Rule 53: Specific Contaminants	5
Rules 53.1, 53.2, and 53.3: Sulfur Production and Sulfuric Acid Plants	5
Rule 54: Dust and Fumes	5
Rule 56: Storage of Petroleum Products	5
Rules 57 and 58: Open Fires and Incinerators	5
Rule 59: Oil-Effluent Water Separators	5
Rule 61: Gasoline Loading Into Tank Trucks and Trailers	5
Rules 62, 62.1, and 62.2: Sulfur Content of Fuels	5
Rule 63: Gasoline Specifications	6
Rule 64: Reduction of Animal Matter	6
Rule 65: Gasoline Loading Into Tanks	6
Rule 66: Organic Solvents	6
Rule 66.1: Architectural Coatings	6
Rule 66.2: Disposal and Evaporation of Solvents	6
Rule 67: Fuel-Burning Equipment	6
Rule 68: Fuel-Burning Equipment - Oxides of Nitrogen	6
ROLE OF THE AIR POLLUTION ENGINEER	6
Accomplishments of the Permit System	6
USE OF THIS MANUAL	7
General Design Problems	7
Specific Air Pollution Sources	7

CHAPTER 2. AIR CONTAMINANTS

INTRODUCTION	11
FACTORS IN AIR POLLUTION PROBLEMS	11
TYPES OF AIR CONTAMINANTS	12
Organic Gases	12
Current Sources in Los Angeles County	12
Hydrocarbons - 12 . . . Hydrocarbon derivatives - 12	
Significance in Air Pollution Problem	14
Inorganic Gases	14
Current Sources in Los Angeles County	14
Oxides of nitrogen - 14 . . . Oxides of sulfur - 15 . . . Carbon monoxide - 15	
Significance in Air Pollution Problem	15
Oxides of nitrogen - 15 . . . Oxides of sulfur - 15 . . . Carbon monoxide - 16 . . .	
Miscellaneous inorganic gases - 16	
Aerosols	16
Current Sources in Los Angeles County	16
Carbon or soot particles - 16 . . . Metallic oxides and salts - 17 . . . Oily or tarry drop-	
lets - 17 . . . Acid droplets - 17 . . . Silicates and other inorganic dusts - 17 . . . Metallic	
fumes - 18	
Significance in Air Pollution Problem	18
AIR POLLUTION CONTROLS ALREADY IN EFFECT	18
CONTROL MEASURES STILL NEEDED	18
Motor Vehicle Emissions	20
Additional Controls Over Stationary Sources	20
Organic Gases	20
Oxides of Nitrogen	20
Other Contaminants	21

CHAPTER 3. DESIGN OF LOCAL EXHAUST SYSTEMS

FLUID FLOW FUNDAMENTALS	25
Bernoulli's Equation	25
Pitot Tube for Flow Measurement	25
Correction Factors	27
HOOD DESIGN	27
Continuity Equation	27
Air Flow Into a Duct	28
Null Point	28
Design of Hoods for Cold Processes	30
Spray Booths	32
Abrasive Blasting	32
Open-Surface Tanks	32
Design of Hoods for Hot Processes	34
Canopy Hoods	34
Circular high-canopy hoods - 34 Rectangular high-canopy hoods - 38	
Circular low-canopy hoods - 39 Rectangular low-canopy hoods - 40	
Enclosures - 41	
Specific Problems	42
Steaming tanks - 42 Preventing leakage - 42	
Hood Construction	43
High-Temperature Materials	43
Corrosion-Resistant Materials	43
Design Proportions	43
Transition to Exhaust Duct	43
DUCT DESIGN	44
General Layout Considerations	44
Types of Losses	44
Inertia Losses	44
Orifice Losses	44
Straight-Duct Friction Losses	45
Elbow and Branch Entry Losses	45
Exhaust system calculator - 45	
Contraction and Expansion Losses	47
Collection Equipment	47
Design Procedures	47
Methods of Calculation	47
Methods of Design	48
Calculation Procedures	49
Fan Static Pressure	50
Balanced-Duct Calculations	51
Blast Gate Method	52
Checking an Exhaust System	52
Illustrative Problem	52
Fan Curve Calculator	57
Corrections for Temperature and Elevation	57
Duct Construction	59
FAN DESIGN	60
Centrifugal Fans	60
Axial-Flow Fans	60
Fan Characteristics	61
Influence of Blade Shape	61
Geometrically Similar Fans	62
Multirating Tables	63
Fan Laws	63
Selecting a Fan From Multirating Tables	65
Construction Properties	65
Heat Resistance	65
Explosive-Proof Fans and Motors	65
Fan Drives	67

VAPOR COMPRESSORS	67
Types of Compressors	67
Positive-Displacement Compressors	68
Dynamic Compressors	69
Reciprocating Compressors	69
Use in Air Pollution Control	72
CHECKING OF EXHAUST SYSTEM	72
Theory of Field Testing	72
Quantity Meters	72
Velocity Meters	72
Pitot Tubes	72
Pitot Tube Traversing Procedure	73
Altitude and Temperature Corrections for Pitot Tubes	73
Swinging-Vane Velocity Meter	73
Calibrating the Velocity Meter	74
Uses of the Velocity Meter	75
COOLING OF GASEOUS EFFLUENTS	76
Methods of Cooling Gases	76
Dilution With Ambient Air	76
Quenching With Water	79
Natural Convection and Radiation	81
Forced-Draft Cooling	86
Factors Determining Selection of Cooling Device	86

CHAPTER 4. AIR POLLUTION CONTROL EQUIPMENT FOR PARTICULATE MATTER

INERTIAL SEPARATORS	91
Single-Cyclone Separators	91
Theory of Operation	92
Separation Efficiency	93
Pressure Drop	93
Other Types of Cyclone Separators	94
High-Efficiency Cyclone Separators	94
Multiple-Cyclone Separators	94
Mechanical, Centrifugal Separators	94
Predicting Efficiency of Cyclones	95
Method of Solving a Problem	97
WET COLLECTION DEVICES	99
Theory of Collection	100
Mechanisms for Wetting the Particle	100
Types of Wet Collection Devices	101
Spray Chambers	101
Cyclone-Type Scrubbers	101
Orifice-Type Scrubbers	101
Mechanical Scrubbers	102
Mechanical, Centrifugal Collector With Water Sprays	102
High-Pressure Sprays	103
Venturi Scrubbers	104
Packed Towers	104
Wet Filters	105
The Role of Wet Collection Devices	105
BAGHOUSES	106
Filtration Process	106
Mechanisms	106
Direct interception - 108 . . Impingement - 109 . . Diffusion - 110 . . Electrostatics - 110	
Baghouse Resistance	110
Clean cloth resistance - 110 . . . Resistance of dust mat - 111 . . .	
Effect of resistance on design - 115	
Filtering Velocity	116
Filtering Media	118
Fibers	118
Cotton - 118 . . . Wool - 118 . . . Nylon - 118 . . . Dynel - 118 . . . Orlon and Dacron - 118 . . . Teflon - 119 . . . Glass - 119	

Yarn	119
Filament yarns - 119 . . . Staple yarns - 119	
Weave.	120
Plain weave - 120 . . . Twill weave - 120 . . . Satin weave - 120	
Finish.	120
Size and Shape of Filters.	121
Diameters of tubular filtering elements - 121 . . . Length of tubular bags - 121 . . .	
Length-to-diameter ratio - 121 . . . Multiple-tube bags - 122 . . . Envelope type - 122	
Installation of Filters	122
Arrangement	122
Bag Spacing.	123
Bag Attachment.	123
Bottom attachments - 123 . . . Top support - 123	
Cleaning of Filters.	124
Methods.	124
Manual cleaning - 124 . . . Mechanical shakers - 125 . . . Pneumatic shakers - 125 . . .	
Bag collapse - 127 . . . Sonic cleaning - 127 . . . Reverse airflow - 128 . . .	
Reverse-air jets - 128	
Cleaning Cycles	130
Manually initiated cycles - 130 . . . Semiautomatic cycles - 131 . . .	
Fully automatic cycles - 131 . . . Continuous cleaning - 131	
Disposal of Collected Dust.	131
Baghouse Construction.	132
Pushthrough versus Pullthrough.	132
Structural Design.	132
Hoppers.	132
Size - 132 . . . Slope of hopper sides - 133 . . . Gage of metal - 133 . . .	
Use of vibrators and rappers - 133 . . . Discharge - 134	
Maintenance	134
Service	134
Bag Replacement.	134
Precoating	135
SINGLE-STAGE ELECTRICAL PRECIPITATORS	135
History of Electrostatic Precipitation.	135
Origins of Electrostatic Principles	135
Early Experiments With Electrostatics on Air Contaminants.	137
Development of the First Successful Precipitator.	137
Improvements in Design, and Acceptance by Industry	138
Advantages and Disadvantages of Electrical Precipitation	138
Mechanisms Involved in Electrical Precipitation.	139
Diverse Applications of Electrical Precipitation	141
Construction Details of Electrical Precipitators	141
Discharge electrodes - 141 . . . Collecting electrodes - 141 . . .	
Tubular collecting electrodes - 141 . . . Removal of dust from collecting electrodes - 143 . .	
Precipitator shells and hoppers - 144	
High Voltage for Successful Operation.	145
Tube-type rectifiers - 145 . . . Solid-state rectifiers - 145	
Effects of Wave Form	145
Controlled Sparking Rate.	146
Operating Voltage	146
Uniform Gas Distribution	146
Cost of Electrical Precipitator Installations	146
Theoretical Analysis of Precipitator Performance	147
Particle charging - 147 . . . Particle migration - 148	
Theoretical Efficiency	149
Deficiencies in Theoretical Approach to Precipitator Efficiency.	150
Effects of Resistivity.	150
Methods of Reducing Reentrainment.	152
Practical Equations for Precipitator Design and Efficiency	153
Effects of Nonuniform Gas Velocity	154
Important Factors in the Design of a Precipitator	156
Summary and Conclusions.	156

TWO-STAGE ELECTRICAL PRECIPITATORS	156
Theoretical Aspects	158
Theory of Dust Separation	158
Particle Charging	159
Drift Velocity	159
Efficiency	160
Design Factors	160
Electrical Requirements	160
Air Capacity	161
Air Distribution	161
Auxiliary Controls	162
Construction and Operation	163
Assembly	163
Maintenance	163
Safety	163
Application	163
Two-Stage Precipitators of Special Design	165
Equipment Selection	165
OTHER PARTICULATE-COLLECTING DEVICES	166
Settling Chambers	166
Impingement Separators	166
Panel Filters	167
Precogners	168
 CHAPTER 5. CONTROL EQUIPMENT FOR GASES AND VAPORS	
AFTERBURNERS	171
Direct-Flame Afterburners	171
Design Principles	171
Afterburner Chamber	172
Gas Burners for Afterburners	172
Mixing-Plate Burners	172
Multi-Port Burners	172
Nozzle Mixing and Premixing Burners	173
Sources of Combustion Air for Gas Burners	174
Oil Firing of Afterburners	174
Afterburner Controls	175
Direct-Flame Afterburner Efficiency	175
Direct-Flame Afterburner Design Problem	176
Catalytic Afterburners	179
Operation	180
Efficiency	181
Recovery of Heat From Afterburner Exhaust Gases	181
Preheating of Afterburner Inlet Gases	182
BOILERS USED AS AFTERBURNERS	183
Conditions for Use	183
Manner of Venting Contaminated Gases	185
Adaptable Types of Equipment	187
Boilers and Fired Heaters	187
Burners	187
Safety	187
Design Procedure	187
Test Data	189
ADSORPTION EQUIPMENT	189
Types of Adsorbents	191
Use of Activated Carbon in Air Pollution Control	191
Saturation	191
Retentivity	192
Breakpoint	192
Adsorption of Mixed Vapors	192
Heat of Adsorption	192
Carbon Regeneration	193
Equipment Design	193

Fixed-Bed Adsorber	194
Conical fixed-bed adsorber - 196	
Continuous Adsorber	197
Pressure Drop	197
Operational Problems	198
Particulate Matter	198
Corrosion.	198
Polar and Nonpolar Compounds	198
VAPOR CONDENSERS.	198
Types of Condensers.	199
Surface and Contact Condensers	199
Typical Installations	201
Condensers in Control Systems	201
Subcooling Condensate	202
Contact Condensers	203
Sizing Contact Condensers	203
Surface Condensers	203
Characteristics of Condensation.	203
Design of Surface Condensers	203
Applications	207
GAS ABSORPTION EQUIPMENT	207
General Types of Absorbers.	208
Packed Tower Design	208
Packing Materials	209
Liquid Distribution.	209
Tower Capacity.	210
Tower Diameter	211
Number of Transfer Units (NTU)	213
Height of a Transfer Unit	214
Pressure Drop Through Packing.	216
Illustrative Problem	216
Plate or Tray Towers	220
Types of Plates.	220
Bubble Cap Plate Tower Design.	221
Liquid Flow.	221
Plate Design and Efficiency	221
Flooding	222
Liquid Gradient on Plate.	223
Plate Spacing.	224
Tower Diameter	224
Number of Theoretical Plates	225
Illustrative Problem	225
Comparison of Packed and Plate Towers	227
Vessels for Dispersion of Gas in Liquid	228
Spray Towers and Spray Chambers	228
Venturi Absorbers.	228
NOTATIONS	229

CHAPTER 6. METALLURGICAL EQUIPMENT

FURNACE TYPES.	233
Reverberatory Furnace	233
Cupola Furnace	234
Combustion Air.	234
Methods of Charging	235
Preheating Combustion Air	235
Electric Furnace.	236
Direct-Arc Furnace	236
Indirect-Arc Furnace	236
Induction Furnace	237
Resistance Furnace	237
Crucible Furnace	237
Tilting Furnace.	238

Pit Crucible	238
Stationary Crucible.	238
Pot Furnace	238
STEEL-MANUFACTURING PROCESSES	239
Open-Hearth Furnaces.	240
The Air Pollution Problem.	241
Hooding and Ventilation Requirements.	242
Air Pollution Control Equipment.	244
Electric-Arc Furnaces	245
The Air Pollution Problem.	246
Hooding and Ventilation Requirements.	246
Air Pollution Control Equipment.	252
Baghouse dust collectors - 252	
Electrical precipitators - 252	
Water scrubbers - 253	
Electric-Induction Furnace	254
The Air Pollution Problem.	254
Hooding and Ventilation Requirements.	255
Air Pollution Control Equipment.	255
IRON CASTING	256
Cupola Furnaces.	256
The Air Pollution Problem.	256
Hooding and Ventilation Requirements.	258
Air Pollution Control Equipment.	258
Afterburners - 259	
Baghouse dust collectors - 260	
Electrical precipitators - 260	
Illustrative Problem	262
Electric-Arc Furnaces	266
The Air Pollution Problem.	267
Hooding and Ventilation Requirements.	267
Air Pollution Control Equipment.	267
Baghouse dust collectors - 267	
Electrical precipitators - 267	
Induction Furnaces.	267
Reverberatory Furnaces.	267
SECONDARY BRASS- AND BRONZE-MELTING PROCESSES	269
Furnace Types	269
The Air Pollution Problem.	269
Characteristics of emissions - 269	
Factors causing large concentrations of zinc fumes - 270	
Crucible furnace--pit and tilt type - 272	
Electric furnace--low-frequency induction type - 272	
Cupola furnace - 273	
Hooding and Ventilation Requirements.	273
Reverberatory furnace--open-hearth type - 273	
Reverberatory furnace--cylindrical type - 275	
Reverberatory furnace--tilting type - 275	
Reverberatory furnace--rotary tilting type - 275	
Crucible-type furnaces - 278	
Low-frequency induction furnace - 278	
Cupola furnace - 279	
Air Pollution Control Equipment.	279
Baghouses - 279	
Electrical precipitators - 280	
Scrubbers - 282	
SECONDARY ALUMINUM-MELTING PROCESSES	283
Types of Process	283
Crucible Furnaces	283
Reverberatory Furnaces.	284
Fuel-Fired Furnaces.	284
Electrically Heated Furnaces	284
Charging Practices.	284
Pouring Practices	285
Fluxing	285
Cover fluxes - 286	
Solvent fluxes - 286	
Degassing fluxes - 286	
Magnesium-reducing fluxes - 286	
Magnesium reduction with chlorine - 287	
The Air Pollution Problem	287
Particle Size of Fumes From Fluxing.	288
Hooding and Ventilation Requirements	288
Air Pollution Control Equipment	289
SECONDARY ZINC-MELTING PROCESSES	293
Zinc Melting	293
The Air Pollution Problem.	293
Zinc Vaporization	293

Reduction Retort Furnaces	294
Reduction in Belgian Retorts.	294
The Air Pollution Problem.	295
Hooding and Ventilation Requirements.	295
Distillation Retort Furnaces.	295
The Air Pollution Problem.	296
Hooding and Ventilation Requirements.	296
Muffle Furnaces	297
The Air Pollution Problem.	297
Hooding and Ventilation Requirements.	298
Air Pollution Control Equipment	299
LEAD REFINING	299
Reverberatory Furnaces.	300
The Air Pollution Problem.	300
Hooding and Ventilation Requirements.	301
Air Pollution Control Equipment.	301
Lead Blast Furnaces.	302
The Air Pollution Problem.	302
Hooding and Ventilation Requirements.	302
Air Pollution Control Equipment.	302
Pot-Type Furnaces	303
The Air Pollution Problem.	304
Hooding and Ventilation Requirements.	304
Air Pollution Control Equipment.	304
Barton Process	304
METAL SEPARATION PROCESSES.	304
Aluminum Sweating	305
Zinc, Lead, Tin, Solder, and Low-Melting Alloy Sweating	305
The Air Pollution Problem.	306
Contaminants from aluminum-separating processes - 306	
Contaminants from low-temperature sweating - 306	
Hooding and Ventilation Requirements.	306
Air Pollution Control Equipment.	308
Aluminum-separating processes - 308 Low-temperature sweating - 308	
CORE OVENS	308
Types of Ovens.	309
Heating Core Ovens	311
Core Binders.	312
The Air Pollution Problem.	314
Hooding and Ventilation Requirements.	314
Air Pollution Control Equipment.	315
FOUNDRY SAND-HANDLING EQUIPMENT.	315
Types of Equipment	315
The Air Pollution Problem.	316
Hooding and Ventilation Requirements.	316
Shakeout grates - 317 Other sand-handling equipment - 317	
Air Pollution Control Equipment.	317
HEAT TREATING SYSTEMS	320
Heat Treating Equipment	320
The Air Pollution Problem.	320
Hooding and Ventilation Requirements.	321
Air Pollution Control Equipment.	321
CHAPTER 7. MECHANICAL EQUIPMENT	
HOT-MIX ASPHALT PAVING BATCH PLANTS	325
Introduction	325
Raw Materials Used	325
Basic Equipment	325
Plant Operation	325
The Air Pollution Problem	326
Hooding and Ventilation Requirements	328
Air Pollution Control Equipment	328

Variables Affecting Scrubber Emissions	330
Collection Efficiencies Attained	332
Future Trends in Air Pollution Control Equipment	333
CONCRETE-BATCHING PLANTS.	334
Wet-Concrete-Batching Plants	334
The Air Pollution Problem.	334
Air Pollution Control Equipment.	335
Cement-receiving and storage system - 335	
Cement weigh hopper - 336	
Gathering hoppers - 336	
Dry-Concrete-Batching Plants	336
The Air Pollution Problem.	337
Hooding and Ventilation Requirements.	337
Air Pollution Control Equipment.	337
Dust created by truck movement - 337	
Central Mix Plants.	337
The Air Pollution Problem.	338
Hooding and Ventilation Requirements.	339
Air Pollution Control Equipment.	339
CEMENT-HANDLING EQUIPMENT.	339
The Air Pollution Problem	339
Hooding and Ventilation Requirements	339
Receiving Hoppers	339
Storage and Receiving Bins	339
Elevators and Screw Conveyors	340
Hopper Truck and Car Loading	340
Air Pollution Control Equipment	340
ROCK AND GRAVEL AGGREGATE PLANTS.	340
The Air Pollution Problem	341
Hooding and Ventilation Requirements	341
Air Pollution Control Equipment	341
MINERAL WOOL FURNACES.	342
Introduction	342
Types and Uses of Mineral Wool Products	342
Mineral Wool Production.	342
The Air Pollution Problem	343
Hooding and Ventilation Requirements	344
Air Pollution Control Equipment	347
Baghouse Collection and Cupola Air Contaminants	347
Afterburner Control of Curing Oven Air Contaminants	347
Reducing Blowchamber Emissions.	349
Controlling Asphalt Fumes.	349
PERLITE-EXPANDING FURNACES	350
Introduction	350
Uses	350
Mining Sites	350
Perlite Expansion Plants.	350
Expansion Furnaces	350
Gas and Product Cooling.	350
Product Collectors and Classifiers	350
The Air Pollution Problem	351
Hooding and Ventilation Requirements	351
Air Pollution Control Equipment	351
FEED AND GRAIN MILLS.	352
Introduction	352
Receiving, Handling, and Storing Operations	353
Feed-Manufacturing Processes	354
The Air Pollution Problem	355
Receiving, Handling, and Storing Operations	356
Feed-Manufacturing Processes	357
Hooding and Ventilation Requirements	357
Receiving, Handling, and Storing Operations	357
Feed-Manufacturing Processes	358

Abrasive Materials.	397
Method of Propelling the Abrasive.	397
Equipment Used to Confine the Blast	398
The Air Pollution Problem	401
Hooding and Ventilation Requirements	401
Air Pollution Control Equipment	401
ZINC-GALVANIZING EQUIPMENT.	402
Introduction	402
Cleaning	402
Cover Fluxes	402
Foaming Agents	403
Dusting Fluxes	403
The Air Pollution Problem	403
Physical and Chemical Composition of the Contaminants	404
Hooding and Ventilation Requirements	404
Air Pollution Control Equipment	406
Baghouses	406
Electrical Precipitators	409
TIRE BUFFING EQUIPMENT.	410
Introduction	410
The Air Pollution Problem	411
Hooding and Ventilation Requirements	411
Air Pollution Control Equipment	412
Cyclones	412
Cyclones With Afterburners	413
Cyclones With Dry Filters.	413
Cyclones With Baghouses and Dry Filters.	413
Other Tread Removal Methods	413
Cutting Type Detreader	413
Water Spray at Rasp	414
Cost of Pollution Control	414
WOOD TREATING EQUIPMENT	414
Introduction	414
Methods of Treating Wood.	415
The Air Pollution Problem	418
Hooding and Ventilation Requirements	419
Air Pollution Control Equipment	419
CERAMIC SPRAYING AND METAL DEPOSITION EQUIPMENT.	421
Introduction	421
Ceramic Spraying	422
The Air Pollution Problem.	422
Air Pollution Control Equipment.	423
Metal Deposition.	429
The Air Pollution Problem.	431
Air Pollution Control Equipment.	432
CHAPTER 8. INCINERATION	
DESIGN PRINCIPLES FOR MULTIPLE-CHAMBER INCINERATORS	437
Retort Type	437
In-Line Type.	437
Description of the Process	439
Design Types and Limitations.	440
Comparison of Types.	440
Principles of Combustion	440
Design Factors.	441
Design Precepts	441
GENERAL-REFUSE INCINERATORS.	443
The Air Pollution Problem	444
Air Pollution Control Equipment	444
Design Procedure	445
General Construction.	446
Refractories	447

Grates and Hearths	447
Air Inlets	447
Stack	449
Induced-Draft System	450
Operation	450
Illustrative Problem	450
MOBILE MULTIPLE-CHAMBER INCINERATORS	452
Design Procedure	452
Stack Requirements	452
Induced-Draft Fan System	452
Standards of Construction	454
Refractories	454
Grates	454
Air Inlets	454
Structure	454
Auxiliary Burners	454
Stack Emissions	454
Illustrative Problem	455
MULTIPLE-CHAMBER INCINERATORS FOR BURNING WOOD WASTE	460
Introduction	460
Description of the Refuse	460
The Air Pollution Problem	460
Air Pollution Control Equipment	460
Design Procedure	460
Incinerator Arrangements	463
Design Procedure for Mechanical Feed Systems	465
Surge Bin	465
Screw or Drag Conveying	466
Pneumatic Conveying	467
Standards for Construction	467
Refractories	468
Grates	468
Exterior Walls	468
Air Ports	468
Operation of Incinerators	469
Illustrative Problem	469
FLUE-FED APARTMENT INCINERATORS	471
Introduction	471
Description of Refuse	472
The Air Pollution Problem	472
Stack Emissions	472
Air Pollution Control Equipment	472
Installation of Afterburner on a Roof	473
Design Procedure	473
Draft control - 473 . . . Chute door locks - 474 . . . Design parameters - 474 . . .	
Limitations - 474 . . . Typical installations - 475	
Standards for Construction	476
Mounting and supports - 476 . . . Metals - 476 . . . Castable refractories - 476 . . .	
Firebrick - 476 . . . Insulating firebrick - 476 . . . Burners - 476 . . .	
Draft control damper - 477 . . . Chute door locks - 477	
Stack Emissions	477
Operation	477
Basement Afterburner	478
Design Procedure	478
Design parameters - 478 . . . Typical installation - 478	
Standards for Construction	479
Hot-zone refractory - 479 . . . Draft control damper - 479	
Stack Emissions	479
Operation	479
Multiple-Chamber Incinerator, Basement Installation	479
Design Procedure	479
Draft control - 480 . . . Typical installation - 480	

Standards for Construction.	481
Stack Emissions	481
Operation.	481
Illustrative Problem	481
PATHOLOGICAL-WASTE INCINERATORS.	484
The Air Pollution Problem	485
Air Pollution Control Equipment	485
Design Procedure	486
Ignition chamber - 487 Secondary combustion zone - 488 Stack design - 489	
Piping requirements - 489 Crematory design - 489	
Incinerator design configuration - 489	
Standards for Construction.	492
Stack Emissions	493
Operation.	493
Illustrative Problem	493
DEBONDING OF BRAKE SHOES AND RECLAMATION OF ELECTRICAL EQUIPMENT	
WINDINGS	496
Debonding of Brake Shoes	496
Reclamation of Electrical Equipment Winding	497
The Air Pollution Problem	498
Air Pollution Control Equipment	498
Primary Ignition Chamber.	499
Secondary Combustion Chamber.	499
Stack	499
Emissions	499
Typical Reclamation Equipment	499
Standards for Construction.	501
Illustrative Problem	501
DRUM RECLAMATION FURNACES.	506
Introduction	506
Description of the Furnace Charge	507
Description of the Process.	507
The Air Pollution Problem	507
Air Pollution Control Equipment	507
Primary Ignition Chamber, Batch Type.	507
Primary Ignition Chamber, Continuous Type	508
Afterburner (Secondary Combustion Chamber)	511
Draft	511
Standards for Construction.	511
Operation.	512

CHAPTER 9. COMBUSTION EQUIPMENT

GASEOUS AND LIQUID FUELS	535
Introduction	535

Gaseous Fuels	535
Oil Fuels	536
The Air Pollution Problem	537
Black Smoke	537
White Smoke	537
Particulate Emissions	538
Sulfur in Fuels	539
Sulfur Oxides	539
Oxides of Nitrogen	539
Air Pollution Control Methods.	540
Prohibitions Against Sulfur Emissions	540
Removal of Sulfur and Ash From Fuels	540
Illustrative Problem	541
GAS AND OIL BURNERS	542
Introduction	542
Draft Requirements	542
Gas Burners	542
Partially Aerated Burners	543
Multiple-Port Gas Burners	544
Forced-Draft Gas Burners.	544
Gas Flow Rates.	545
Oil Burners.	545
Viscosity and Oil Preheaters	549
The Air Pollution Problem	549
Smoke and Unburned Contaminants	549
Ash and Sulfur Oxides	553
Oxides of Nitrogen	553
Air Pollution Control Equipment	553
BOILERS, HEATERS, AND STEAM GENERATORS	553
Introduction	553
Industrial Boilers and Water Heaters	553
Power Plant Steam Generators	554
Refinery Heaters.	556
Hot Oil Heaters and Boilers	556
Fireboxes.	556
Soot Blowing	558
The Air Pollution Problem	560
Solid Particulate Emission During Normal Oil Firing	560
Soot-Blowing Particulates	561
Sulfur Dioxide	562
Sulfur Trioxide.	562
Excessive Visible Emissions	563
Oxides of Nitrogen	564
Estimating NO _x Emissions.	567
Air Pollution Control Methods.	567
Combustible Particulates	568
Soot Collectors.	568
Collection of Sulfur Oxides.	568
Wet absorption - 569 . . . Dry absorption - 569. . . Wet adsorption - 570 . . .	
Catalytic oxidation - 570 . . . Other processes for removing SO ₂ from stack gases - 570	
Controlling Oxides of Nitrogen.	570
Reduction of NO _x by modification of boiler operation - 571. . . Removal of NO _x by treatment of flue gas - 576	

CHAPTER 10. PETROLEUM EQUIPMENT

GENERAL INTRODUCTION.	581
Crude Oil Production	581
Refining	581
Flares and Blowdown Systems	581
Pressure Relief Valves	581
Storage Vessels	581
Bulk-Loading Facilities	582
Catalyst Regenerators	582

Effluent-Waste Disposal	584
Pumps and Compressors.	584
Air-Blowing Operations	584
Pipeline Valves and Flanges, Blind Changing, Process Drains	584
Cooling Towers.	584
Vacuum Jets and Barometric Condensers.	584
Effective Air Pollution Control Measures.	585
Marketing	585
WASTE-GAS DISPOSAL SYSTEMS	585
Introduction	585
Design of Pressure Relief System.	588
Safety Valves.	589
Rupture Discs	590
Sizing rupture discs - 592 . . . Sizing liquid safety valves - 593 . . .	
Sizing vapor and gas relief and safety valves - 594 . . .	
Installing relief and safety valves and rupture discs - 595 . . . Knockout vessels - 596 . . .	
Sizing a blowdown line - 598	
The Air Pollution Problem	604
Smoke From Flares	604
Noise From Flares.	604
Other Air Contaminants From Flares.	605
Air Pollution Control Equipment	605
Types of Flares	605
Elevated flares - 605 . . . Ground level flares - 610 . . . Effect of steam injection - 613 . .	
Design of a smokeless flare - 614 . . . Pilot ignition system - 616 . . .	
Instrumentation and control of steam and gas - 617 . . . Supply and control of steam - 618 . .	
Design of water-injection-type ground flares - 623 . . .	
Design of venturi-type ground flares - 624 . . . Maintenance of flares - 626	
STORAGE VESSELS.	626
Types of Storage Vessels	626
Pressure Tanks and Fixed-Roof Tanks	627
Floating-Roof Tanks	627
Conservation Tanks	628
Open-Top Tanks, Reservoirs, Pits, and Ponds.	631
The Air Pollution Problem	631
Factors Affecting Hydrocarbon Vapor Emissions.	631
Hydrocarbon Emissions From Floating-Roof Tanks	632
Withdrawal emissions - 634 . . . Application of results - 634	
Hydrocarbon Emissions From Low-Pressure Tanks	634
Hydrocarbon Emissions From Fixed-Roof Tanks.	638
Aerosol Emissions.	642
Odors.	642
Air Pollution Control Equipment	643
Seals for Floating-Roof Tanks.	644
Floating Plastic Blankets	644
Plastic Microspheres	645
Vapor Balance Systems	647
Vapor Recovery Systems.	647
Miscellaneous Control Measures	648
Masking Agents.	649
Costs of Storage Vessels.	649
LOADING FACILITIES	649
Introduction	649
Loading Racks	652
Marine Terminals	652
Loading Arm Assemblies	652
The Air Pollution Problem	653
Air Pollution Control Equipment	655
Types of Vapor Collection Devices for Overhead Loading	655
Collection of Vapors From Bottom Loading.	658
Factors Affecting Design of Vapor Collection Apparatus	659
Methods of Vapor Disposal.	660

CATALYST REGENERATION	662
Types of Catalysts	662
Loss of Catalyst Activity	664
Regeneration Processes	664
FCC Catalyst Regenerators	664
TCC Catalyst Regenerators	665
Catalyst Regeneration in Catalytic Reformer Units	665
The Air Pollution Problem	666
Air Pollution Control Equipment	667
Wet- and Dry-Type, Centrifugal Dust Collectors	667
Electrical Precipitators	668
Carbon Monoxide Waste-Heat Boilers	670
Economic Considerations	671
OIL-WATER EFFLUENT SYSTEMS	672
Functions of Systems	672
Handling of Crude-Oil Production Effluents	672
Handling of Refinery Effluents	673
Treatment of Effluents by Oil-Water Separators	673
Clarification of Final-Effluent Water Streams	673
Effluent Wastes From Marketing Operations	674
The Air Pollution Problem	675
Hydrocarbons From Oil-Water Separators	675
Treatment of Refinery Liquid Wastes at Their Source	677
Oil-in-water emulsions - 677 . . . Sulfur-bearing waters - 677 . . . Acid sludge - 678 . . .	
Spent caustic wastes - 679	
PUMPS	679
Types of Pumps	679
Positive-Displacement Pumps	680
Centrifugal Pumps	680
The Air Pollution Problem	681
Air Pollution Control Equipment	681
Results of Study to Measure Losses From Pumps	684
AIRBLOWN ASPHALT	685
Recovery of Asphalt From Crude Oil	686
Airblowing of Asphalt	686
The Air Pollution Problem	687
Air Pollution Control Equipment	687
VALVES	689
Types of Valves	689
Manual and Automatic Flow Control Valves	689
Pressure Relief and Safety Valves	690
The Air Pollution Problem	690
Total Emissions From Valves	691
Air Pollution Control Equipment	691
COOLING TOWERS	692
Characteristics of Cooling Tower Operation	693
The Air Pollution Problem	694
Air Pollution Control Equipment	695
MISCELLANEOUS SOURCES	695
Airblowing	695
Blind Changing	695
Equipment Turnarounds	696
Tank Cleaning	697
Use of Vacuum Jets	697
Use of Compressor Engine Exhausts	697

CHAPTER 11. CHEMICAL PROCESSING EQUIPMENT

RESIN KETTLES	701
Types of Resins	701
Phenolic Resins	701
Amino Resins	702
Polyester and Alkyd Resins	702

Polyurethane	703
Thermoplastic Resins	703
Polyvinyl Resins	703
Polystyrene.	704
Petroleum and Coal Tar Resins	704
Resin-Manufacturing Equipment	704
The Air Pollution Problem	705
Air Pollution Control Equipment	706
VARNISH COOKERS.	708
Introduction	708
Definitions - Products and Processes.	708
Major Types of Varnish Cooking Equipment	709
The Air Pollution Problem	711
Hooding and Ventilation Requirements	711
Air Pollution Control Equipment	712
Scrubbers.	714
Condensers.	715
Afterburners	715
SULFURIC ACID MANUFACTURING	716
Contact Process	716
The Air Pollution Problem	718
Air Pollution Control Equipment	719
Sulfur Dioxide Removal	719
Acid Mist Removal.	720
Electrical precipitators - 720 . . . Packed-bed separators - 720 . . .	
Wire mesh mist eliminators - 721 . . . Ceramic filters - 722 . . .	
Sonic agglomeration - 722 . . . Miscellaneous devices - 722	
SULFUR SCAVENGER PLANTS.	722
Introduction	722
Sulfur in Crude Oil.	722
Removal of H ₂ S From Refinery Waste Gases.	723
The Air Pollution Problem	726
Air Pollution Control Equipment	726
Incineration Requirements.	727
Stack Dilution Air	732
Incinerator Stack Height	732
Plant Operational Procedures	733
Tail Gas Treatment	734
PHOSPHORIC ACID MANUFACTURING	734
Phosphoric Acid Process	734
The Air Pollution Problem	735
Hooding and Ventilation Requirements	736
Air Pollution Control Equipment	736
SOAP, FATTY ACID, AND GLYCERINE MANUFACTURING EQUIPMENT.	737
Introduction	737
Raw Materials	738
Fatty Acid Production	739
Glycerine Production	740
Soap Manufacturing	743
Soap Finishing	744
The Air Pollution Problem	745
Air Pollution Control Equipment	746
SYNTHETIC DETERGENT SURFACTANT MANUFACTURING EQUIPMENT	749
Introduction	749
Raw Materials	749
Processes	750
Oleum Sulfonation	750
The Air Pollution Problem.	751
Air Pollution Control Equipment.	751
Oleum Sulfonation and Sulfation	752
Process.	752
The Air Pollution Problem.	752

Sulfur Trioxide Vapor Sulfonation	753
The Air Pollution Problem.	754
Air Pollution Control Equipment.	755
Sulfur Trioxide Liquid Sulfonation.	755
The Air Pollution Problem.	755
Air Pollution Control Equipment.	755
Chlorosulfuric Acid Sulfation	756
The Air Pollution Problem.	756
Air Pollution Control Equipment.	757
Sulfoalkylation	757
The Air Pollution Problem.	759
Air Pollution Control Equipment.	759
SYNTHETIC DETERGENT PRODUCT MANUFACTURING EQUIPMENT	759
Introduction	759
Raw Materials	759
Processes	761
Slurry Preparation.	761
The Air Pollution Problem.	761
Air Pollution Control Equipment.	761
Spray Drying.	762
The Air Pollution Problem.	762
Air Pollution Control Equipment.	764
Granule Handling.	764
The Air Pollution Problem.	764
Air Pollution Control Equipment.	765
GLASS MANUFACTURE.	765
Types of Glass	765
Glass-Manufacturing Process	765
Handling, Mixing, and Storage Systems for Raw Materials	767
The Air Pollution Problem.	767
Hooding and Ventilation Requirements.	767
Air Pollution Control Equipment.	768
Continuous Soda-Lime Glass-Melting Furnaces	769
The Air Pollution Problem.	769
Source test data - 770 . . . Opacity of stack emissions - 771	
Hooding and Ventilation Requirements.	771
Air Pollution Control Methods.	773
Control of raw materials - 775 . . . Batch preparation - 775 . . . Checkers - 777 . . .	
Preheaters - 777 . . . Refractories and insulation - 778 . . . Combustion of fuel - 778 . . .	
Electric melting - 779 . . . Baghouses and centrifugal scrubbers - 779	
Glass-Forming Machines	781
The Air Pollution Problem.	781
Air Pollution Control Methods.	781
FRIT SMELTERS	782
Introduction	782
Raw Materials	782
Types of Smelters	783
Frit Manufacturing.	783
Application, Firing, and Uses of Enamels	787
The Air Pollution Problem	787
Hooding and Ventilation Requirements.	787
Air Pollution Control Equipment	788
FOOD PROCESSING EQUIPMENT	788
Coffee Processing	791
Batch Roasting	791
An Integrated Coffee Plant.	791
The Air Pollution Problem.	793
Hooding and Ventilation Requirements.	793
Air Pollution Control Equipment.	793
Smokehouses	794
The Smoking Process	794
Atmospheric Smokehouses	794

Recirculating Smokehouses	795
Smoking by Immersion.	795
Smoking by Electrical Precipitation.	795
The Air Pollution Problem.	796
Hooding and Ventilation Requirements.	796
Air Pollution Control Equipment.	796
Afterburners - 796 Electrical precipitators - 797	
Electrical precipitation versus incineration - 797	
Bypassing control devices during nonsmoking periods - 798	
Deep Fat Frying	799
The Air Pollution Problem.	799
Hooding and Ventilation Requirements.	800
Air Pollution Control Equipment.	800
Livestock Slaughtering.	801
The Air Pollution Problem.	801
Air Pollution Control Equipment.	801
Edible-Lard and Tallow Rendering	802
Dry Rendering	803
Batchwise rendering - 803 Continuous low-temperature rendering - 803	
Wet Rendering	803
The Air Pollution Problem.	803
Hooding and Ventilation Requirements.	803
Air Pollution Control Equipment.	804
FISH CANNERIES AND FISH REDUCTION PLANTS	804
Wet-Fish Canning	805
Tuna Canning.	805
Cannery Byproducts	806
Fish Meal Production	806
Fish Solubles and Fish Oil Production	807
Digestion Processes.	809
The Air Pollution Problem	809
Odors From Meal Driers	809
Smoke From Driers	810
Dust From Driers and Conveyors	810
Odors From Reduction Cookers	811
Odors From Digesters.	811
Odors From Evaporators	811
Odors From Edibles Cookers	811
Hooding and Ventilation Requirements	811
Air Pollution Control Equipment	812
Controlling Fish Meal Driers	812
Incinerating Drier Gases.	812
Chlorinating and Scrubbing Drier Gases.	812
Controlling Reduction Cookers and Auxiliary Equipment	813
Controlling Digesters	814
Controlling Evaporators	814
Collecting Dust.	815
Controlling Edible-Fish Cookers	815
REDUCTION OF INEDIBLE ANIMAL MATTER	815
Batchwise Dry Rendering	816
Continuous Dry Rendering.	817
Wet Rendering	818
Refining Rendered Products.	819
Drying Blood.	819
Processing Feathers.	820
Rotary Air Driers	820
The Air Pollution Problem	820
Cookers as Prominent Odor Sources	822
Odors From Air Driers	822
Odors and Dust From Rendered-Product Systems	822
Grease-Processing Odors	823
Raw-Materials Odors	823

Hooding and Ventilation Requirements	823
Emission Rates From Cookers	824
Emission Rates From Driers	825
Air Pollution Control Equipment	825
Controlling High-Moisture Streams	825
Subcooling Condensate	826
Condenser Tube Materials	826
Interceptors in Cooker Vent Lines	826
Vapor Incinerator	827
Condensation-Incineration Systems	827
Carbon Adsorption of Odors	828
Odor Scrubbers	829
Odor Masking and Counteraction	829
ELECTROPLATING	829
The Air Pollution Problem	830
Hooding and Ventilating Requirements	831
Air Pollution Control Equipment	831
Scrubbers	831
Mist Inhibitors	831
INSECTICIDE MANUFACTURE	832
Methods of Production	832
Solid-Insecticide Production Methods	833
Liquid-Insecticide Production Methods	835
The Air Pollution Problem	836
Hooding and Ventilation Requirements	836
Air Pollution Control Equipment	837
HAZARDOUS RADIOACTIVE MATERIAL	838
Hazards in the Handling of Radioisotopes	838
The Air Pollution Problem	838
Characteristics of Solid, Radioactive Waste	838
Characteristics of Liquid, Radioactive Waste	838
Problems in Control of Airborne, Radioactive Waste	839
Hooding and Ventilation Requirements	839
Hooding	839
Ventilation	839
Air Pollution Control Equipment	840
Reduction of Radioactive, Particulate Matter at Source	840
Design of Suitable Air-Cleaning Equipment	841
Reverse-jet baghouse - 841 Wet collectors - 841	
Electrical precipitators - 842 Glass fiber filters - 842 Paper filters - 843	
Disposal and Control of Solid, Radioactive Waste	843
Disposal and Control of Liquid, Radioactive Waste	843
OIL AND SOLVENT RE-REFINING	844
Re-refining Process for Oils	844
Re-refining Process for Organic Solvents	844
The Air Pollution Problem	845
Air Pollution From Oil Re-refining	845
Air Pollution From Solvent Re-refining	846
Air Pollution Control Equipment	846
Oil Re-refining	846
Solvent Re-refining	846
CHEMICAL MILLING	846
Description of the Process	846
Etchant Solutions	848
The Air Pollution Problem	849
Mists	849
Vapors	849
Gases	849
Solvents	849
Hooding and VentilationsRequirements	849
Air Pollution Control Equipment	849
Corrosion Problems	850

CHAPTER 12. ORGANIC SOLVENT EMITTING EQUIPMENT

SOLVENTS AND THEIR USES.	855
Introduction	855
Rule 66.	855
Limitations on the Use of Photochemically Reactive Solvents	857
Baking and Curing Operations	857
Air Pollution Control Measures	857
SURFACE COATING OPERATIONS.	858
Introduction	858
Types of Equipment	858
Spray Booths	858
Flowcoating Machines	858
Dip Tanks.	860
Roller Coating Machines	861
The Air Pollution Problem	861
Air Contaminants From Paint Spray Booths.	861
Air Contaminants From Other Devices	863
Hooding and Ventilation Requirements	863
Requirements for Paint Spray Booths	863
Requirements for Other Devices.	863
Air Pollution Control Equipment	864
Control of Paint Spray Booth Particulates.	864
Control of Organic Vapors From Surface Coating Operations	865
PAINT BAKING OVENS AND OTHER SOLVENT-EMITTING OVENS	865
Introduction	865
Bake Oven Equipment	866
Batch Type Ovens	866
Continuous Ovens.	866
Heating of Ovens	866
Oven Circulating and Exhaust Systems	867
Air Seals	867
The Air Pollution Problem	867
Hooding and Ventilation Requirements	868
Air Pollution Control Equipment	869
Other Ovens Emitting Air Contaminants	870
Can Lithograph Oven.	870
Printing System Ovens.	871
SOLVENT DEGREASERS	871
Introduction	871
Design and Operation.	871
Types of Solvent	871
The Air Pollution Problem	872
Hooding and Ventilation Requirements	872
Air Pollution Control Methods.	873
Methods of Minimizing Solvent Emissions.	873
Tank Covers	873
Controlling Vaporized Solvent	874
