Contents

About the Editors	xiv
Editorial Committee	xiv
Authors	xv
Reviewers	xix
Preface	xxi
Chapter 1 Laboratory Quality Assurance	1
1.1 Introduction	1
1.2 Management's Role In Laboratory Quality Assurance	1
1.3 General Laboratory Operations	2
1.4 Personnel	3
1.5 Facilities	4
1.6 Equipment and Instrumentation	5
1.7 Laboratory Glassware and Plasticware	6
1.8 Media and Reagents	7
1.9 Record Keeping	9
1.10 Accreditation of Testing Laboratories	10
1.11 References	10
Chapter 2 Sampling Plans, Sample Collection, Shipment, and Preparation for Analysis	13
2.1 Introduction	13
2.2 General Considerations	13
2.3 Equipment, Materials, and Reagents	13
2.4 Precautions	14
2.5 Procedures	14
2.6 References	23
Chapter 3 Microbiological Monitoring of the Food Processing Environment	25
3.1 Introduction	25
3.2 Environmental Sampling Strategies	25
3.3 Sampling of Surfaces—Equipment and Physical Plant	26
3.4 Rinse Solution Method for Sampling Containers and Processing Equipment Systems	27
3.5 Surface Contact Methods	27
3.6 Microbiological Air-Sampling Strategies	30
3.7 Air-Sampling Methods	30
3.8 Aerosol Sampling and Measurement Guidelines	34
3.9 References	34
Chapter 4 Microscopic Methods	37
4.1 Introduction	37
4.2 General Procedures	37
4.3 Fluorescence Microscopy	37
4.4 Stains, Probes, and Indicators	38
4.5 Quantitation	40
4.6 References	42
Chapter 5 Cultural Methods for the Enrichment and Isolation of Microorganisms	45
5.1 Introduction	45
5.2 Enrichment Methods	45
5.3 Preenrichment	45
5.4 Selective Enrichment	46
5.5 Quality Assurance of Enrichment and Isolation Method	49

5.6	References	50
Chapter 6	Culture Methods for Enumeration of Microorganisms	53
6.1	Introduction	53
6.2	Dilutions	53
6.3	Plating Techniques	54
6.4	Most Probable Number Techniques	58
6.5	Membrane Filtration	61
6.6	Other Methods	61
6.7	Anaerobic or Other Atmospheres	61
6.8	References	62
Chapter 7	Aerobic Plate Count	63
7.1	Introduction	63
7.2	Microbiological Specifications	63
7.3	General Considerations	63
7.4	Equipment, Materials and Reagents	64
7.5	Precautions and Limitations	64
7.6	Standard Procedures	64
7.7	Alternative Methods	65
7.8	References	67
Chapter 8	<i>Enterobacteriaceae</i>, Coliforms, and <i>Escherichia coli</i> as Quality and Safety Indicators	69
8.1	Introduction	69
8.2	Definitions	70
8.3	Precautions	71
8.4	Equipment, Materials and Reagents	73
8.5	Sample Preparation	73
8.6	The <i>Enterobacteriaceae</i>	74
8.7	Coliforms	74
8.8	Fecal Coliform Group	76
8.9	<i>Escherichia coli</i>	76
8.10	Interpretation of Data: The Value of <i>Enterobacteriaceae</i> , Coliforms, and <i>E. coli</i> as Indicators of Quality and Indexes of Pathogens	79
8.11	Acknowledgments	80
8.12	References	80
Chapter 9	Enterococci	83
9.1	Introduction	83
9.2	General Considerations	83
9.3	Equipment, Materials, and Reagents	84
9.4	Precautions	84
9.5	Enumeration of Enterococci	85
9.6	Confirmation of Enterococci	85
9.7	References	86
Chapter 10	Rapid Methods for Detection, Identification, and Enumeration	89
10.1	Introduction	89
10.2	Antibody-Based Methods	89
10.21	Introduction	89
10.22	Immunofluorescence	89
10.23	Latex Agglutination	90
10.24	Immunoimmobilization	90
10.25	Enzyme immunoassay	90
10.26	Immunoprecipitate Detection	90
10.27	Immunoaffinity Chromatography and Immunomagnetic Separation	91
10.28	References	91
10.3	Nucleic Acid-Based Methods	93
10.31	Introduction	93
10.32	Hybridization	93
10.33	PCR	94
10.34	References	95
10.4	Biochemical and Enzymatic Methods	96
10.41	Introduction	96
10.42	Miniaturized Microbiological Methods	96
10.43	Commercial Miniaturized Diagnostic Kits ("Minikits")	96

10.44	Chromogenic Media	99
10.45	Quantitative Enzymatic Methods	99
10.46	References	100
10.5	Membrane Filtration	100
10.51	Hydrophobic Grid Membrane Filter	100
10.52	References	103
10.53	Commercial References	105
10.6	Impedance, Conductance, and Capacitance	105
10.61	Theory	105
10.62	Commercial Systems	105
10.63	General Considerations and Precautions	106
10.64	Typical Applications	107
10.65	Interpretation of Results	109
10.66	References	109
10.67	Commercial References	111
10.7	Phage Probes	111
10.71	Introduction to Bacterial Viruses	111
10.72	Bacteriophage-Based Detection Methods	113
10.73	Conclusions	122
10.74	References	122
Chapter 11	Molecular Typing and Differentiation	127
11.1	Introduction	127
11.2	Cellular Fatty Acid Analysis	127
11.21	Introduction	127
11.22	Principle	130
11.23	Apparatus	130
11.24	Reagents	130
11.25	General Instructions	130
11.26	Limitations	131
11.27	Library	131
11.28	Similarity Index	132
11.29	References	132
11.3	Multilocus Enzyme Electrophoresis	132
11.31	Introduction	132
11.32	General Description of the Method	133
11.33	Interpretation of the Gels	135
11.34	References	135
11.4	Ribotyping	136
11.41	Introduction	136
11.42	Reagent Preparation	136
11.43	Lysis of Bacteria and DNA Extraction	137
11.44	DNA Digestion and Electrophoresis	137
11.45	Electrophoretic Transfer, Denaturation, and UV Cross-Linking	137
11.46	Hybridization and Detection	137
11.47	Patterns: Data Processing	137
11.48	Automated Ribotyping	137
11.49	References	138
11.5	Restriction Fragment Length Polymorphism Fingerprinting	138
11.51	Introduction	138
11.52	Genomic Target	138
11.53	Restriction Enzyme	139
11.54	Combining Assays	139
11.55	Other Considerations	139
11.56	References	140
11.6	Rapid PCR-Based Methods	140
11.61	Introduction	140
11.62	Preparation of Genomic DNA from Bacteria for Use with Rapid Methods ..	145
11.63	Notes	147
11.64	Preparation, Amplification, Detection and Analysis of PCR for Rapid Methods	147
11.65	Notes	149
11.66	References	151

11.7	Pulsed Field Gel Electrophoresis	154
11.71	Introduction	154
11.72	Utility of PFGE in Foodborne Outbreak Investigations	154
11.73	Interpretation of PFGE Results	154
11.74	Choosing a PFGE Protocol	154
11.75	Standard PFGE Protocol for Subtyping <i>E. coli</i> O157:H7	154
11.76	References	156
Chapter 12	Labor Savings and Automation	157
12.1	Introduction	157
12.2	Solid Samples	157
12.4	Liquid Samples	158
12.5	References	158
Chapter 13	Psychrotrophic Microorganisms	159
13.1	Introduction	159
13.2	Review of Methods Used to Enumerate Psychrotrophs in Foods	160
13.3	General Recommendations	161
13.4	Sample Preparation	162
13.5	Equipment, Media, Materials, and Reagents	162
13.6	Procedures for Enumeration of Psychrotrophs	162
13.7	Precautions	162
13.8	Rapid Detection	162
13.9	Interpretation	163
13.10	References	164
Chapter 14	Thermotolerant Microorganisms and Heat Resistance Measurements	167
14.1	Introduction	167
14.2	Heat Resistance Measurements	168
14.3	Methods for the Determination of Heat Resistance	169
14.4	Equipment, Materials, and Procedures	169
14.5	Interpretation	172
14.6	References	172
Chapter 15	Lipolytic Microorganisms	175
15.1	Introduction	175
15.2	General Considerations	177
15.3	Equipment, Materials, and Reagents	177
15.4	Procedures	178
15.5	Precautions	179
15.6	References	180
Chapter 16	Proteolytic Microorganisms	183
16.1	Introduction	183
16.2	General Considerations	184
16.3	Equipment, Materials, and Reagents	184
16.4	Procedures	184
16.5	Precautions	185
16.6	Interpretation	185
16.7	References	185
Chapter 17	Halophilic and Osmophilic Microorganisms	187
17.1	Introduction	187
17.2	Halophilic Microorganisms	187
17.3	Osmophilic Microorganisms	190
17.4	References	192
Chapter 18	Pectinolytic and Pectolytic Microorganisms	195
18.1	Introduction	195
18.2	Detecting Pectinolytic and Pectolytic Organisms	195
18.3	Visualization and Assay of Pectic Enzymes	197
18.4	Sources of Pectic Enzymes	197
18.5	Equipment, Materials, and Reagents	197
18.6	Procedures	198
18.7	Interpretation	198
18.8	References	198
Chapter 19	Acid-Producing Microorganisms	201
19.1	Introduction	201
19.2	General Considerations	201

19.3	Limitations	202
19.4	Equipment, Materials, and Reagents	202
19.5	Procedures	203
19.6	References	206
Chapter 20	Yeasts and Molds	209
20.1	Introduction	209
20.2	General Considerations	209
20.3	Precautions	210
20.4	Equipment, Materials, and Reagents	210
20.5	Procedures	210
20.6	Interpretation	211
20.7	New Methods under Development	211
20.8	References	213
Chapter 21	Detection and Enumeration of Heat-Resistant Molds	217
21.1	Introduction	217
21.2	General Considerations	217
21.3	Equipment, Materials, and Reagents	217
21.4	Procedures	218
21.5	Precautions	219
21.6	Interpretation	219
21.7	Taxonomy of Important Heat-Resistant Molds	219
21.8	References	221
Chapter 22	Mesophilic Aerobic Sporeformers	223
22.1	Introduction	223
22.2	Special Considerations	224
22.3	Sources of Error	224
22.4	Equipment, Materials, and Media	225
22.5	Procedures	225
22.6	Modifications	226
22.7	Interpretation	226
22.8	References	226
Chapter 23	Mesophilic Anaerobic Sporeformers	229
23.1	Introduction	229
23.2	General Considerations	231
23.3	Equipment, Materials, and Media	232
23.4	Precautions	232
23.5	Procedures	232
23.6	Interpretation of Results	235
23.7	References	235
Chapter 24	Aciduric Flat Sour Sporeformers	239
24.1	Introduction	239
24.2	General Considerations	240
24.3	Equipment, Materials, and Reagents	241
24.4	Procedures	241
24.5	Maintenance of Cultures	243
24.6	Precautions and Limitations of the Procedures	243
24.7	Interpretation	243
24.8	References	243
Chapter 25	Thermophilic Flat Sour Sporeformers	245
25.1	Introduction	245
25.2	General Considerations	245
25.3	Equipment, Materials, and Reagents	246
25.4	Precautions	246
25.5	Procedure	246
25.6	Interpretation of Results	247
25.7	References	248
Chapter 26	Thermophilic Anaerobic Sporeformers	249
26.1	Introduction	249
26.2	General Considerations	249
26.3	Equipment, Materials, and Solutions	249
26.4	Precautions	250
26.5	Procedure	250

26.6	Interpretation	251
26.7	References	251
Chapter 27	Sulfide Spoilage Sporeformers	253
27.1	Introduction	253
27.2	General Considerations	253
27.3	Equipment, Materials, and Reagents	254
27.4	Precautions and Limitations of Procedure	254
27.5	Procedure	254
27.6	Interpretation	255
27.7	References	255
Chapter 28	Investigation of Foodborne Illness Outbreaks	257
28.1	Introduction	257
28.2	Purpose of Investigation	257
28.3	Theory of Investigation	258
28.4	Consideration of Samples	258
28.5	Equipment, Materials, and Solutions	258
28.6	Investigative Procedures	262
28.7	Analysis and Conclusion	263
28.8	Molecular Subtyping Techniques—Bacteria	264
28.9	Molecular Subtyping Techniques—Viruses	265
28.10	Conclusion	265
28.11	References	265
Chapter 29	Microbial Food Safety Risk Assessment	267
29.1	Introduction	267
29.2	Risk Assessment: A Tool for Decision-Making	267
29.3	Approaches to Microbial Food Safety Risk Assessment	268
29.4	Steps of Risk Assessment	270
29.5	Mathematical Approaches to Risk Assessment	272
29.6	Monte Carlo Analysis	274
29.7	Uncertainty & Variability	275
29.8	Applications of Risk Assessment	276
29.9	Summary	276
29.10	References	277
	Appendix 1: Common Distributions	280
Chapter 30	<i>Aeromonas</i>, <i>Arcobacter</i>, and <i>Plesiomonas</i>	283
30.1	<i>Aeromonas Hydrophila</i>	283
30.11	General Characteristic of the Genus	283
30.12	Ecology	283
30.13	Epidemiology	283
30.14	Isolation Media	285
30.15	Characterization and Speciation in the Genus <i>Aeromonas</i>	286
30.16	Handling of Samples	287
30.17	Equipment, Materials, and Reagents	287
30.18	Procedures	287
30.19	Interpretations	288
30.110	Media, Reagents, and Stains	288
30.111	References	288
30.2	<i>Arcobacter</i>	290
30.21	Introduction	290
30.22	General Considerations	292
30.23	Media and Reagents	292
30.24	Procedures	292
30.25	Identification Tests	293
30.26	References	294
30.3	<i>Plesiomonas Shigelloides</i>	296
30.31	Introduction	296
30.32	Ecology	296
30.33	Isolation and Identification	297
30.34	Equipment, Materials, and Solutions	297
30.35	Procedure	297
30.36	References	298

Chapter 31	<i>Campylobacter</i>	301
31.1	Introduction	301
31.2	General Considerations	302
31.3	Media and Reagents	302
31.4	Procedures	303
31.5	Identification Tests	304
31.6	Interpretation	307
31.7	References	307
Chapter 32	<i>Bacillus cereus</i>	311
32.1	Introduction	311
32.2	Procedure	313
32.3	Interpretation of Data	315
32.4	References	315
Chapter 33	<i>Clostridium botulinum</i> and Its Toxins	317
33.1	Introduction	317
33.2	Treatment of Specimens	318
33.3	Special Equipment and Supplies	318
33.4	Media and Reagents	319
33.5	Precautions and Limitations of Methods	319
33.6	Procedure for Identifying Viable <i>C. botulinum</i>	319
33.7	Identifying Botulinum Toxin in Foods	320
33.8	Identifying Botulinum Toxin in Clinical Specimens	321
33.9	Interpreting Data	322
33.10	References	323
Chapter 34	<i>Clostridium perfringens</i>	325
34.1	Introduction	325
34.2	Sampling	326
34.3	Equipment and Supplies	326
34.4	Special Reagents and Media	326
34.5	Recommended Controls	327
34.6	Precautions and Limitations of Methods	327
34.7	Procedure	327
34.8	Interpretation of Data	329
34.9	References	329
Chapter 35	Pathogenic <i>Escherichia coli</i>	331
35.1	Introduction	331
35.2	Conventional Isolation Procedures	332
35.3	Rapid Methods	335
35.4	Serotyping	336
35.5	Pathogenicity Testing	336
35.6	References	338
Chapter 36	<i>Listeria</i>	343
36.1	Introduction	343
36.2	General Considerations	346
36.3	Media, Reagents, and Equipment	346
36.4	Precautions and Limitations of the Methods	347
36.5	Procedures	348
36.6	Interpretation of Data	353
36.7	References	353
Chapter 37	<i>Salmonella</i>	357
37.1	General Basis of Methods	357
37.2	Treatment of Sample	364
37.3	Equipment and Supplies	364
37.4	Precautions and Limitations of Reference and Rapid Methods	365
37.5	Reference Method	367
37.6	Interpretation of Data—Reference Method	372
37.7	Rapid Screening Tests	372
37.8	AOAC-RI Performance Tested Methods	375
37.9	References	376
Chapter 38	<i>Shigella</i>	381
38.1	Introduction	381
38.2	Recommended Procedures	382

38.3	Precautions	384
38.4	References	385
Chapter 39	<i>Staphylococcus aureus</i> and Staphylococcal Enterotoxins	387
39.1	Introduction	387
39.2	General Considerations for Isolation of <i>S. aureus</i>	388
39.3	Precautions and Limitations of Methods	389
39.4	Equipment, Reagents and Media	390
39.5	Procedures	390
39.6	Additional Tests	392
39.7	General Considerations for Detection of Staphylococcal Enterotoxins	392
39.8	Handling of Samples	393
39.9	Examining Staphylococcal Isolates for Enterotoxin Production	393
39.10	Enterotoxin Identification in Foods	397
39.11	References	400
Chapter 40	<i>Vibrio</i>	405
40.1	Introduction	405
40.2	General Considerations	407
40.3	Equipment, Materials, and Reagents	408
40.4	Precautions	409
40.5	Procedures	409
40.6	Interpretation	416
40.7	Acknowledgment	416
40.8	References	416
Chapter 41	<i>Yersinia</i>	421
41.1	Introduction	421
41.2	Analysis for <i>Yersinia</i> in foods	422
41.3	<i>Yersinia</i> Identification Tests	426
41.4	References	426
Chapter 42	Waterborne and Foodborne Parasites	429
42.1	Introduction	429
42.2	Waterborne Parasites: Prevalence, Disease, Transmission, and Methods of Identification	431
42.3	Foodborne Parasites: Prevalence, Disease, Transmission, and Methods of Identification	434
42.4	Emerging Methods	437
42.5	References	437
Chapter 43	Toxigenic Fungi and Fungal Toxins	439
43.1	Introduction	439
43.2	Mycotoxins	439
43.3	Mycotoxicooses	441
43.4	Mycotoxin Producing Molds	443
43.5	Equipment, Material, and Reagents	444
43.6	Precautions	444
43.7	Media and Procedures	444
43.8	Reviews and Compendia	445
43.9	References	445
Chapter 44	Foodborne Viruses	447
44.1	Introduction	447
44.2	Foods To Be Tested	449
44.3	Detecting Viruses in Foods	449
44.4	Equipment, Materials and Reagents	452
44.5	Sample Processing Procedures	452
44.6	Cell Culture-Based Virus Assays	455
44.7	Virus Identification	456
44.8	Interpretation of Results	457
44.9	References	457
Chapter 45	Meat and Poultry Products	463
45.1	Introduction	463
45.2	Raw Meat and Poultry Products	464
45.3	Ready-to-Eat Meat and Poultry Products	466
45.4	Pathogens	469
45.5	Recommended Methods	469

45.6	References	469
Chapter 46	Eggs and Egg Products	473
46.1	Introduction	473
46.2	General Considerations	474
46.3	Normal Flora	474
46.4	Flora Changes in Spoilage	474
46.5	Pathogens of Concern	475
46.6	Indicators of Lack of Sanitation	476
46.7	Recommended Methods	476
46.8	Interpretation of Data	478
46.9	References	479
Chapter 47	Milk and Milk Products	483
47.1	Introduction	483
47.2	Raw Milk	483
47.3	Pasteurized Milk	484
47.4	Dried Products	486
47.5	Butter	486
47.6	Frozen Dairy Products	487
47.7	Concentrated Products	487
47.8	Fermented Dairy Products	488
47.9	Acid-Producing Bacteria in Dairy Foods	490
47.10	Additional Reading	493
47.11	References	493
Chapter 48	Fish, Crustaceans, and Precooked Seafoods	497
48.1	Introduction	497
48.2	Fresh and Frozen Fish and Crustaceans	497
48.3	Cooked Crustacean Products	499
48.4	Breaded and Prepared Seafood Products	500
48.5	Salted and Smoked Products	500
48.6	Other Seafood Products	501
48.7	Modified-Atmosphere Packaging and Storage	502
48.8	Recommended Methods	503
48.9	Interpretation of Results	503
48.10	References	504
Chapter 49	Molluscan Shellfish: Oysters, Mussels, and Clams	507
49.1	Introduction	507
49.2	Examination of Shellfish	508
49.3	Preparation of Sample for Examining Shellfish in the Shell	509
49.4	Microbiological Procedures	511
49.5	Interpretation of Data	511
49.6	Rapid Methods	512
49.7	International Microbiological Standards	512
49.8	References	513
Chapter 50	Fruits and Vegetables	515
50.1	Introduction	515
50.2	Fresh Produce	515
50.3	Processed Fruits and Vegetables	516
50.4	Recommended Methods	518
50.5	Interpretation of Data	518
50.6	References	518
Chapter 51	Fermented and Acidified Vegetables	521
51.1	Introduction	521
51.2	Normal Flora	522
51.3	Flora Changes in Spoilage	522
51.4	Pathogenic Microorganisms	524
51.5	Recommended Methods	524
51.6	Interpretation of Data	528
51.7	References	529
Chapter 52	Gums and Spices	533
52.1	Introduction	533
52.2	General Considerations	533
52.3	Normal Flora	534

52.4	Post-Harvest Changes	535
52.5	Sampling and Preparation for Analysis	536
52.6	Methods	537
52.7	Interpretation of Data	537
52.8	References	538
Chapter 53	Salad Dressings	541
53.1	Introduction	541
53.2	General Considerations	541
53.3	Normal Flora	541
53.4	Floral Change in Spoilage	541
53.5	Human Disease Microorganisms	542
53.6	Microbial Indicators of Poor Sanitation	542
53.7	Equipment, Materials, and Solutions	542
53.8	Recommended Methods	543
53.9	Interpretation of Data	543
53.10	References	544
Chapter 54	Sweeteners and Starches	545
54.1	Introduction	545
54.2	General Considerations	545
54.3	Normal and Indicator Flora	546
54.4	Spoilage Organisms	546
54.5	Pathogens	547
54.6	Recommended Methods	547
54.7	Interpretation of Data	547
54.8	References	547
Chapter 55	Cereal and Cereal Products	549
55.1	Introduction	549
55.2	Factors Affecting Bioload	549
55.3	Methods	552
55.4	References	553
Chapter 56	Confectionery Products	555
56.1	Introduction	555
56.2	General Considerations	555
56.3	Spoilage of Confectionery	556
56.4	Pathogens	556
56.5	Microbial Control Procedures	556
56.6	Recommended Methods	557
56.7	Interpretation of Data	557
56.8	References	558
Chapter 57	Nut Meats	561
57.1	Introduction	561
57.2	General Considerations	561
57.3	Microflora	562
57.4	Pathogens	562
57.5	Molds and Mycotoxins	562
57.6	Laboratory Tests	562
57.7	References	563
Chapter 58	Fruit Beverages	565
58.1	Introduction	565
58.2	Normal Microflora	565
58.3	Pathogens	566
58.4	Spoilage	566
58.5	Recommended Methods	566
58.6	Interpretation of Data	567
58.7	References	567
Chapter 59	Soft Drinks	569
59.1	Introduction	569
59.2	Microbiology	569
59.3	Sanitation	570
59.4	Equipment, Media, and Reagents	570
59.5	Recommended Methods	570
59.6	Interpretation of Data	571

59.7	References	571
Chapter 60	Bottled Water	573
60.1	Introduction	573
60.2	Types of Microorganisms	574
60.3	Equipment, Media, and Reagents	574
60.4	Recommended Methods	574
60.5	Interpretation of Data	575
60.6	Acknowledgments	576
60.7	References	576
Chapter 61	Canned Foods—Tests for Commercial Sterility	577
61.1	Introduction	577
61.2	General Considerations	578
61.3	Equipment, Materials, and Reagents	578
61.4	Precautions	579
61.5	Procedure	579
61.6	Interpretation of Data	581
61.7	References	582
Chapter 62	Canned Foods—Tests for Cause of Spoilage	583
62.1	Introduction	583
62.2	Microbiology of Canned Foods	583
62.3	Examination Methods for Diagnosing Spoilage Conditions in Canned Foods	586
62.4	Keys to Probable Cause of Spoilage	596
62.5	Addresses for Some Firms Listed in References	596
62.6	References	596
Chapter 63	Media, Reagents, and Stains	601
63.1	Culture Media, Introduction	601
63.2	Equipment	605
63.3	Alphabetical Listing of Culture Media	607
63.4	Alphabetical Listing of Reagents, Diluents, and Indicators	636
63.5	Stains, Introduction	646
63.6	Alphabetical Listing of Stains	646
63.7	References	648
63.8	Acknowledgments	648
Chapter 64	Measurement of Water Activity (a_w), Acidity, and Brix	649
64.1	Measurement of a_w	649
64.2	Equipment	650
64.3	Calibration	652
64.4	Measurement of Samples	653
64.5	Precautions and Limitations	653
64.6	Measurement of Acidity	654
64.7	pH Measurements	654
64.8	Titrateable Acidity	656
64.9	Brix	656
64.10	References	657
