	List of Figures	ix
	List of Tables	xi
	Preface	xiii
	Acknowledgments	xv
Chapter 1	Introduction	1
	What is Ultraviolet Disinfection?	1
	How Does UV Disinfection Compare to Chemical Disinfection?	1
	History of Ultraviolet Disinfection	2
	Government Regulations	5
	Advantages and Disadvantages of UV Disinfection	6
	References	8
Chapter 2	Fundamentals of UV Light and Photochemistry	11
	Light and Photons	11
	UV Light Spectral Ranges	12
	Emission, Transmission, and Absorption of Light	13
	What Happens When UV Light Reaches Its Intended Target	19
	Laws of Photochemistry	19
	Advanced Oxidation Technologies	21
	References	22
Chapter 3	Mechanism of UV Disinfection	25
	Inactivation Mechanisms	25
	Reactivation Mechanisms	29
	UV Sensitivity of Microorganisms	31
	UV Dose (Fluence) in a UV Reactor	37
	References	39
Chapter 4	UV Disinfection Regulations Summary	41
	Regulatory Background	41
	Long-Term 2 Enhanced Surface Water Treatment Rule	43
	Ground Water Rule	45
	References	46
Chapter 5	UV Disinfection Equipment	49
	Types of Available UV Equipment	49
	UV Lamps	51
	UV Sensors	58

	Sleeves	59
	Ancillary Components	60
	Full-Scale Operating UV Disinfection Systems	60
	References	60
Chapter 6	Validation of UV Reactor Performance	63
	Regulatory Requirements	63
	Biodosimetry Process	64
	Overview of USEPA Recommended Approach	65
	Modeling UV Dose (Fluence) Distributions	71
	Validation Effects on UV Facility Design	74
	References	75
Chapter 7	Effects of Water Quality on UV Disinfection	77
	UV Transmittance	77
	Fouling	80
	Turbidity	81
	Upstream Treatment	82
	Algae	83
	Chlorine Reduction	83
	By-products From UV Treatment	84
	Site-Specific and Operational Issues	84
	References	85
Chapter 8	Potential Locations for UV Disinfection Facilities	87
	Filtered Water Systems	87
	Unfiltered Systems Applications	90
	Uncovered Reservoir Applications	90
	Groundwater Applications	91
	Small Systems	91
	Reuse Applications	91
	Reference	92
Chapter 9	UV Facility Design Issues	93
	Disinfection Goals	93
	Key Design Criteria	94
	Hydraulics	97
	Electric Power Systems	100
	Site Constraints/Layout	101
	Cost Estimation	102
	Design Tools Available	102
	Modeling to Assist Design	103
	References	103

Chapter 10	Start-up, Operations and Maintenance	105
	Operational Requirements	105
	Steps for Facility Start-up	106
	Routine Operations and Maintenance Tasks	108
	Monitoring	110
	Monitoring and Recording Frequencies	114
	Reporting Requirements	116
	Troubleshooting	116
	Reference	116
Chapter 11	Safety and Handling of UV Equipment	119
	UV Light Exposure	119
	Electrical Safety	120
	Burn Safety	120
	Lamp Break Issues	120
	Operator Health and Safety—Mercury Exposure Limits	121
	Mercury Release Response	121
	References	124
Chapter 12	Issues for a Water Utility Manager	125
	Using an Engineering Consulting Firm or <i>Go-it-Alone?</i>	125
	Information Needs	125
	Information to Provide and Questions for a Potential Engineering Consulting Firm	126
	Questions for a Potential UV Equipment Manufacturer	126
	Government Regulations	127
	Reference	127
Appendix A	Terms, Units, Symbols, and Definitions	133
	Index	139
	About the Authors	149
